## Summary of the main economic developments and monetary policy in June 2018

#### **Industrial output**

Source: NIS, DG ECFIN

#### **Labour force**

Source: NIS, NEA, NBR calculations

## **Real economy**

In June 2018, the annual dynamics of industrial output volume stepped up to 4.6 percent, adding 3.6 percentage points from a month earlier, on the back of developments in all three main sub-sectors: mining, energy and manufacturing. The improvement in manufacturing performance (up 3.5 percentage points to an annual rate of 5.3 percent) was due to the faster annual dynamics1 in the industries integrated within the global production networks, i.e. transport equipment industry and the related sub-sectors (rubber manufacturing, electrical equipment), being bolstered by both robust demand and the diversification of the product range (the start of production of a new motorcar model). Moreover, swifter paces of increase were also seen in hydrocarbon processing, once the activity of a refinery was resumed after an overhaul, the chemical industry and metallurgy, which benefited from a favourable international environment (supply deficit on the European market, as a result of the reduction in some production facilities), as well as in the manufacture of wood and furniture. The short-term expectations of manufacturing companies remain moderately positive, the EC-DG ECFIN confidence indicator decreasing slightly to 0.7 points.

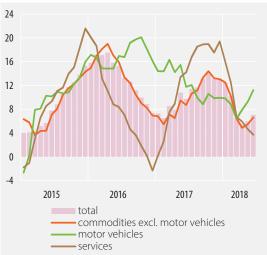

The excess labour supply contracted in June 2018, with the registered unemployment rate<sup>2</sup> dropping to post-2000 lows, i.e. 3.6 percent, and the ILO unemployment rate<sup>2</sup> falling close to the historical low, i.e. 4.5 percent. Furthermore, while the labour absorption capacity of the economy continued to undergo a slightly downward adjustment, the job vacancy rate consolidated the downtrend it had embarked on since mid-2017. Hence, the labour market tightness indicator kept on flattening out. For the period ahead, the results of the DG ECFIN Survey show improvements in

Up to values ranging between 13.3 percent and 21.5 percent.

Seasonally adjusted data.

#### **Domestic trade and services**

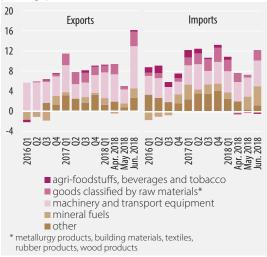

annual percentage change; 3-month moving average

#### International trade in goods

contributions to the annual growth rate (in terms of value); percentage points

Source: NIS, Eurostat – ComExt, NBR calculations

expectations on employment in trade as well as a relative stability in the remaining sectors. The annual growth rate of the average net nominal wage earnings economy-wide remained robust, i.e. 14.3 percent (a level similar to that registered in the period from April to May), reflecting the difficulties of companies in recruiting personnel against the background of severe shortage of workforce.

In June 2018, trade and services saw further robust developments, the annual growth rate standing at approximately 7 percent, due to the rise in households' disposable income and the advance in lending. The breakdown shows that the volume of durables sales continued to post swift dynamics (about 8 percent), albeit slightly decelerating from the previous month, amid the slower pace of growth in the automotive trade. As for the other categories of durables, the turnover volume increased at a faster clip, the 30 percent advance in online purchases standing out in this respect. Looking at non-durables, the turnover volume remained at a level similar to that seen in May, as the lower sales of fuels, possibly in association with the hike in fuel prices, were offset by the brisker rise in trade in food items. As far as receipts from market services to households are concerned, the slacker annual growth rate (down to 1.3 percent) may be partly ascribed to weather conditions that were less favourable for leisure activities. However, a recovery is anticipated, in view of the vacation vouchers being granted in the budgetary sector.

In the reviewed month, exports of goods resumed their fast growth pace (16.2 percent³ year on year, up 11 percentage points from May), the major contribution coming further from sales of machinery, equipment, transport equipment and parts (including rubber products). Additionally, brisker increases were also reported by exports of other categories of goods, such as petroleum, metal and chemical products, which also benefit from the hike in international prices. Although imports of goods witnessed a similar evolution (up 11.7 percent), being spurred by purchases of intermediate and capital goods, their growth rate stood below that of exports. Trade deficit⁴ totalled EUR 1,166 million, standing slightly above the level recorded in the same year-ago period.

According to NIS preliminary data.

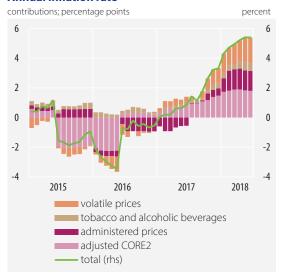

Calculated based on BPM6 methodology.

#### Industrial producer prices for the domestic market

annual percentage change 12 8 4 0 -4 -8 -12 2015 2017 2018 2016 total --- intermediate goods -- capital goods --- consumer goods energy

Source: NIS, Eurostat

#### **Annual inflation rate**

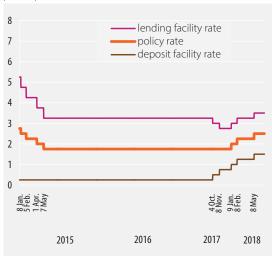

Source: NIS, NBR calculations

In June 2018, the annual dynamics of industrial producer prices on the domestic market accelerated to 6.1 percent (up 0.8 percentage points from the previous month), largely on account of energy prices (up 2 percentage points to 11.9 percent). This development was mainly supported by the growth in the hydrocarbon processing sub-sector (up 8 percentage points to 35.7 percent), correlated with the high oil price, being also backed by the monthly depreciation of the leu versus the US dollar. A similar, albeit smaller contribution was also made by prices of intermediate goods, amid the rise in commodity prices over the past months and the higher energy costs. Moreover, the annual dynamics of producer prices of consumer goods picked up slightly, yet stood well below the values of over 3 percent recorded in the period from April 2017 to March 2018.

The annual rate of increase of consumer prices was similar to that registered in May (5.4 percent). Specifically, the step-up in the dynamics of fuel prices to a post-2005 high of 17.4 percent was offset by the slacker annual growth pace of prices of tobacco products (ascribed to a base effect) and the slight slowdown in the adjusted CORE2 inflation. In the latter case, the annual dynamics slowed down further (to 2.91 percent) due to the fade away of pressures exerted by some agri-food commodity prices and because of the base effect of the shocks in prices of meat products from April to June 2017.

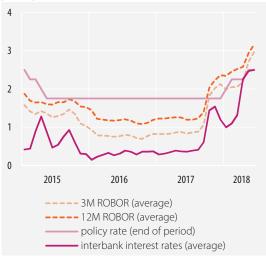

#### **Policy rates**

percent per annum

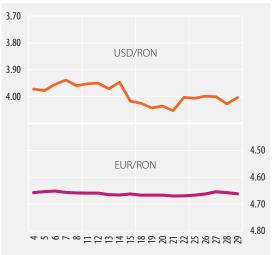

#### **Money market rates**

percent per annum

## Exchange rate calculated and released by the NBR

June 2018

## **Monetary policy**

In June, monetary policy was implemented in line with the decisions taken by the NBR Board in its meeting of 7 May 2018, namely to increase the monetary policy rate to 2.50 percent from 2.25 percent, as well as to raise the deposit facility rate to 1.50 percent from 1.25 percent and the lending facility rate to 3.50 percent from 3.25 percent. Moreover, the minimum reserve requirement ratios on leu- and foreign currency-denominated liabilities of credit institutions were kept at 8 percent.

Daily ON rates on the interbank money market stayed in the vicinity of the monetary policy rate for most of the reported month, as the central bank continued to mop up the net liquidity surplus in the banking system by conducting one-week deposit-taking operations via fixed-rate tenders with full allotment on a weekly basis. Their volume shrank further, given the contraction of the net liquidity surplus in the banking system under the impact of autonomous factors. Liquidity conditions even turned restrictive towards end-June<sup>5</sup>, a context in which very short term rates on the interbank money market climbed and remained close to the upper bound of the corridor defined by interest rates<sup>6</sup>, while longer-term (3M-12M ROBOR) rates saw a steepening of the upward path they had embarked on at the beginning of the period<sup>7</sup>, widening their spread against the policy rate.

The EUR/RON exchange rate rose relatively sharply during the first two 10-day periods of June, peaking at a new historical high<sup>8</sup>, as the influences generated by the decline in global risk appetite<sup>9</sup> – already manifest regionally – became prevalent on the domestic market as well. Afterwards, the currency pair tended to revert to slightly lower values, although the leu weakened 0.5 percent versus the euro over the month as a whole<sup>10</sup>.

With a view to covering their reserve shortfall, some credit institutions resorted during this period to the central bank's lending facility, for the first time in about four years.

In June, the average interbank deposit rate continued to advance relatively quickly (adding 0.41 percentage points against May), reaching 2.82 percent.

During the reported month as a whole, their averages went up by around 0.25 percentage points versus May, with the 3M rate hitting 2.97 percent and the 6M and 12M rates reaching 3.07 percent and 3.17 percent respectively.

<sup>&</sup>lt;sup>8</sup> 4.6695 on 21 June.

<sup>9</sup> Amid higher US Treasury yields and a stronger US dollar versus the major currencies.

<sup>10</sup> At the same time, the Hungarian forint softened against the euro by 1.8 percent, the Polish zloty by 0.4 percent, and the Czech koruna by 0.5 percent.

## Credit institutions' interest rates on loans and deposits

Credit institutions' interest rates applicable to non-bank customers stuck to their upward path.

Specifically, the average remuneration of new time deposits advanced for both non-financial corporations, up 0.35 percentage points from May to 2.21 percent, and households, up 0.09 percentage points to 1.18 percent. In turn, the lending rate on new business to non-financial corporations added 0.18 percentage points to 5.57 percent, owing to increases in both types of loans (below and above EUR 1 million equivalent), whereas that on new business to households witnessed a slight downward adjustment of 0.05 percentage points, to 8.16 percent, exclusively due to the larger weight of housing loans (bearing lower interest rates) in the flow of credit to this segment.

## Legislative Index

## Main rules and regulations adopted in the economic, financial, and banking areas in June 2018

**Law No. 126** of 11 June 2018 on the markets in financial instruments (*Monitorul Oficial al României* No. 521/26 June 2018).

**Law No. 145** of 20 June 2018 approving Government Emergency Ordinance No. 18/2018 on adopting some fiscal and budgetary measures and amending and supplementing some legal acts (*Monitorul Oficial al României* No. 515/22 June 2018).

**Law No. 150** of 22 June 2018 approving Government Ordinance No. 30/2017 amending and supplementing Law No. 207/2015 on the Tax Procedure Code (*Monitorul Oficial al României* No. 523/26 June 2018).

**Order No. 2423** of 27 June 2018 issued by the Minister of Public Finance on the issue prospectus for the benchmark government bonds for July 2018 (*Monitorul Oficial al României* No. 543/29 June 2018).

## Main regulations issued by the National Bank of Romania in June 2018

**Circular No. 16** of 13 June 2018 on putting into circulation, for numismatic purposes, a silver coin dedicated to 200 years since Ion Ionescu de la Brad's birth (*Monitorul Oficial al României* No. 511/21 June 2018).

**Circular No. 17** of 19 June 2018 on the interest rates on leu- and USD-denominated required reserves starting with the 24 May – 23 June 2018 maintenance period (*Monitorul Oficial al României* No. 511/21 June 2018).

**Order No. 5** of 25 June 2018 on the opening of an account in lei by the Bank Deposit Guarantee Fund with the National Bank of Romania (*Monitorul Oficial al României* No. 564/5 July 2018).

<sup>\*)</sup> the accrued interest payable related to financial liabilities is also included.

Note: According to ESA 2010, the IMF's SDR allocations are included in foreign liabilities.

 $The outstanding \ loans \ and \ deposits \ at \ the \ end \ of \ the \ reported \ month \ do \ not \ include \ the \ accrued \ interest \ receivable/payable.$ 

The outstanding loans at the end of the reported month include non-performing loans.

<sup>1)</sup> Pursuant to NBR Order No. 13/2011 until December 2013. Starting 1 January 2014, the said Order was implicitly repealed once the new CRD IV regulatory framework at EU level (Directive 2013/36/EU and Regulation (EU) No. 575/2013) was enforced. As of June 2014, indicators are determined based on the information submitted by banks according to Commission Implementing Regulation (EU) No. 680/2014 laying down implementing technical standards with regard to supervisory reporting of institutions according to Regulation (EU) No. 575/2013 of the European Parliament and of the Council. Once Implementing Regulation (EU) No. 680/2014 entered into force, the leverage ratio was included in the reporting statements in compliance with the said technical standards and is reported accordingly by credit institutions.

<sup>2)</sup> Indicators cover solely credit institutions which are Romanian legal entities and Creditcoop; foreign bank branches do not report on solvency, own funds and credit classification. As concerns the liquidity ratio, the branches of foreign banks from EU Member States have been exempted from submitting liquidity reports as of October 2015.

<sup>3)</sup> According to NBR Order No. 27/2010 and NBR Order No. 2/2011, as subsequently amended and supplemented.

<sup>4)</sup> Determined based on reports from all banks: both those which use the standardised approach to credit risk and those applying internal ratings-based models.

<sup>5)</sup> In line with EBA's definition, implemented in the national framework via NBR Order No. 6/2014, non-performing exposures are those that satisfy any of the following criteria:
i) material exposures which are more than 90 days past due; ii) the debtor is assessed as unlikely to pay its credit obligations in full without realisation of collateral, regardless of the existence of any past due amount or of the number of days past due. In June 2015, the methodological notes on the FINREP framework at solo level were amended so as to include cash balances with the central bank and other demand deposits with credit institutions in the non-performing exposure report form. Starting 1 January 2018, NBR Order No. 6/2014 was repealed by NBR Order No. 9/2017 following the coming into force of IFRS 9 "Financial instruments".

 $<sup>6)\,</sup>According \,to\,NBR\,Order\,No.\,\,22/2011\,\,and\,\,NBR\,Regulation\,No.\,\,25/2011; the\,liquidity\,ratio\,\,is\,\,expressed\,\,in\,\,units.$ 

<sup>7)</sup> Pursuant to Commission Delegated Regulation (EU) 2015/61 to supplement Regulation (EU) No 575/2013; the indicator shall be equal to the ratio of a credit institution's liquidity buffer to its net liquidity outflows over a 30 calendar day stress period and shall be expressed as a percentage.

<sup>\*)</sup> refers to the exposure to a single debtor, which may be equal to or higher than lei 20,000.

Note: NBR Regulation No. 2/2012 on the organisation and functioning of the Central Credit Register operated by the National Bank of Romania became effective on 1 February 2012 and was subsequently amended by NBR Regulation No. 4/2015, NBR Regulation No. 4/2016 and, as of 1 February 2018, by NBR Regulation No. 3/2017.

<sup>\*\*)</sup> Reporting institutions are credit institutions, non-bank financial institutions included in the Special Register (NBFI), electronic money institutions with significant lending activity (EMI) and payment institutions with significant lending activity (PI).

<sup>\*)</sup> It refers to the exposure to a single debtor, which is equal to or higher than lei 20,000. The granted amount is the loan granted or the commitment undertaken according to the contract. The granted amount is not updated in the current month for the loans or commitments in foreign exchange reported in previous months.

Note: NBR Regulation No. 2/2012 on the organisation and functioning of the Central Credit Register operated by the National Bank of Romania became effective on 1 February 2012 and was subsequently amended by NBR Regulation No. 4/2015, NBR Regulation No. 4/2016 and, as of 1 February 2018, by NBR Regulation No. 3/2017.

## 11.4. Loans granted by credit institutions\*

(lei million)

<sup>\*)</sup> It refers to the exposure to a single debtor, which is equal to or higher than lei 20,000. The granted amount is the loan granted according to the contract. The granted amount is not updated in the current month for the loans or commitments in foreign exchange reported in previous months.

Note: NBR Regulation No. 2/2012 on the organisation and functioning of the Central Credit Register operated by the National Bank of Romania became effective on 1 February 2012 and was subsequently amended by NBR Regulation No. 4/2015, NBR Regulation No. 4/2016 and, as of 1 February 2018, by NBR Regulation No. 3/2017.

#### 11.5. Debts overdue for more than 30 days incurred by individuals

<sup>\*)</sup> It refers to the exposure to a single debtor, which is equal to or higher than lei 20,000. The granted amount is the loan granted or the commitment undertaken according to the contract.

The granted amount is not updated in the current month for the loans or commitments in foreign exchange reported in previous months.

 $Note: NBR\ Regulation\ No.\ 2/2012\ on\ the\ organisation\ and\ functioning\ of\ the\ Central\ Credit\ Register\ operated\ by\ the\ National\ Bank\ of\ Romania\ became\ effective\ on\ Note to the Central\ Credit\ Register\ operated\ by\ the\ National\ Bank\ of\ Romania\ became\ effective\ on\ Note to the\ Note to$ 

<sup>1</sup> February 2012 and was subsequently amended by NBR Regulation No. 4/2015, NBR Regulation No. 4/2016 and, as of 1 February 2018, by NBR Regulation No. 3/2017.

<sup>\*)</sup> It refers to the exposure to a single debtor, which is equal to or higher than lei 20,000. The granted amount is the loan granted according to the contract. The granted amount is not updated in the current month for the loans or commitments in foreign exchange reported in previous months.

Note: NBR Regulation No. 2/2012 on the organisation and functioning of the Central Credit Register operated by the National Bank of Romania became effective on

<sup>1</sup> February 2012 and was subsequently amended by NBR Regulation No. 4/2015, NBR Regulation No. 4/2016 and, as of 1 February 2018, by NBR Regulation No. 3/2017.

# Methodological notes

#### 1. Main macroeconomic indicators

Data series on the main economic and social indicators are taken from the publications of the National Institute of Statistics (Monthly Statistical Bulletin, Industry Statistical Bulletin, Prices Statistical Bulletin, Statistical Yearbook) or its Tempo-Online database; some of these data are preliminary and may be revised subsequently.

Data series are updated on a regular basis once they are published by the NIS.

Starting January 2018, the amount of the average gross wage earnings economy-wide reflects the transfer to employees of those parts of social security and health contributions that were previously paid by employers. As a result, the annual changes in the average gross wage earnings economy-wide reported for 2018 are not comparable with the data series recorded prior to this moment.

Annual data for economy-wide number of employees and average earnings are taken from the "Earnings and labour cost" bulletin, published by the NIS.

CORE1 is the core inflation measure that reflects changes in market prices; CORE1 is calculated based on the overall CPI excluding administered prices.

CORE2 is the core inflation measure that reflects changes in market prices with relatively low volatility; CORE2 is calculated based on the headline CPI excluding administered prices and highly volatile prices (vegetables, fruit, eggs, fuels).

The adjusted CORE2 is the core inflation measure that excludes from the headline CPI a number of prices on which monetary policy (via aggregate demand management) has limited or no influence: administered prices, volatile prices (vegetables, fruit, eggs and fuels), prices of tobacco products and alcoholic beverages.

The annual data on core inflation measures are based on NBR calculations.

The harmonised index of consumer prices (HICP) is obtained based on the Eurostat methodology (2015 = 100).

# 3. Monetary policy indicators

# 3.1. Open market operations performed by the National Bank of Romania

Open market operations performed by the NBR and standing facilities granted by the central bank to eligible participants are laid down in NBR Regulation No. 1/2000 republished, as subsequently amended and supplemented.

The volume of open market operations performed by the NBR is shown as daily averages for both transactions performed in the reported period (flows) and their balance (stocks). The average interest rate in the reporting month is calculated as an arithmetic mean (weighted by the volume of transactions) of interest rates on flow/stock operations.

#### 3.2. Standing facilities granted by the National Bank of Romania to eligible counterparties

The NBR's standing facilities (lending and deposit facilities) are resorted to by eligible counterparties at their initiative.

The interest rate on the marginal lending facility is the rate at which eligible counterparties are granted overnight liquidity. The interest rate on the marginal deposit facility is the rate at which eligible counterparties may place excess liquidity with the NBR at the end of the day (overnight). Starting 7 May 2008, the interest rates on the NBR's standing facilities have been set up to form a symmetrical corridor around the monetary policy rate. The corridor around the policy rate was gradually narrowed from  $\pm 4$  percentage points to  $\pm 1$  percentage point as of 8 November 2017.

#### 3.3. Minimum reserve requirements

Minimum reserves requirements (MRR) are leu- and foreign currency-denominated holdings of credit institutions kept in accounts opened with the National Bank of Romania.

The calculation base for the MRR is the daily average (for the observation period) of the outstanding leu- and foreign currency-denominated liabilities in banks' balance sheets (except for interbank liabilities, financial obligations to the NBR and equity capital). The observation period and the maintenance period come in succession and last one month each; the observation period starts on the 24<sup>th</sup> of the previous month and ends on the 23<sup>rd</sup> of the current month. Minimum reserve requirement ratios may vary by currency and residual maturity of the items included in the calculation base (below or over 2 years). MRR are provisioned as daily average of holdings in the NBR accounts during the maintenance period.

# 4. Reserve money

Starting December 2014, data for preparing monetary indicators are reported in accordance with the provisions of Regulation ECB/2013/33, implemented by the National Bank of Romania into Chapter II of Title I of NBR Regulation No. 4/2014 on reporting statistical data and information to the National Bank of Romania, as subsequently amended and supplemented, hereinafter referred to as the Regulation.

# 5. Monetary balance sheets of monetary financial institutions

According to ESA 2010 methodology (the European System of National and Regional Accounts), monetary financial institutions include the following institutional sectors: (i) central bank (S121) – the National Bank of Romania; (ii) deposit-taking corporations except the central bank (S122), which comprise credit institutions and deposit-taking corporations other than credit institutions, the latter category including: (a) financial corporations and quasi-corporations, except those classified in the central bank and the money market funds subsectors, which are principally engaged in financial intermediation and whose business is to receive deposits and/or close substitutes for deposits from institutional units, hence not only from monetary financial institutions, and to grant loans and/or to make investments in debt securities and (b) electronic money institutions, which are principally engaged in financial intermediation in the form of electronic money issuance; (iii) money market funds (MMFs) (S123) – financial corporations that issue investment fund shares or units as substitutes for deposits and make investments primarily in money market fund shares/units, short-term debt securities and/or deposits, aiming to achieve the investment objective of maintaining the principal of the fund and providing returns in line with the money market rates.

In the monetary balance sheets of monetary financial institutions, the accrued interest receivable/payable related to financial assets and liabilities is recorded under remaining assets/remaining liabilities.

#### 5.2. Aggregate monetary balance sheet of other monetary financial institutions

The aggregate monetary balance sheet of other monetary financial institutions includes on-balance sheet assets and liabilities of credit institutions (banks, Romanian legal persons; branches of foreign credit institutions; credit cooperative organisations), money market funds, as well as electronic money institutions.

# **5.3.** Net consolidated balance sheet of monetary financial institutions (NBR and other monetary financial institutions)

The net consolidated balance sheet of monetary financial institutions shows the aggregation of the National Bank of Romania's monetary balance sheet with that of other monetary financial institutions (credit institutions, money market funds and electronic money institutions), in which the relations within and between these institutional sectors were considered on a net basis.

# 6. Broad money M3 and its counterparts

Monetary aggregates have been defined in compliance with the methodology of the European Central Bank.

Narrow money (M1) comprises currency in circulation (banknotes and coins) plus overnight deposits (deposits immediately convertible into cash or used for making payments via bank transfer).

Intermediate money (M2) comprises M1 plus deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months. Broad money (M3) comprises M2 plus marketable instruments issued by monetary financial institutions, money market instruments, in particular money market fund shares/units and borrowings from repurchase agreements (their highly liquid nature makes of these instruments close substitutes for deposits).

Broad money M3 counterparts are net foreign assets and net domestic assets.

Net foreign assets are calculated by subtracting foreign liabilities from foreign assets. Foreign assets include: loans to non-residents; deposits placed with non-residents; holdings of debt securities issued by non-residents; asset holdings and other equity stakes with non-residents; monetary gold. Foreign liabilities include funds taken from non-residents: deposits, debt securities issued on external markets. Starting with December 2014, SDR allocations from the IMF are included under foreign liabilities, in line with the new international statistical standards (ESA 2010).

Net domestic assets are calculated by subtracting domestic liabilities (except for M3 components) from domestic assets.

Domestic assets include: loans to residents; holdings of debt securities issued by residents; asset holdings and other equity stakes with residents. Domestic liabilities (except for M3 components) include funds taken from residents: deposits with an agreed maturity of over two years (including deposits redeemable at notice of over three months), debt securities with a maturity of over two years issued on the domestic market, capital and reserves.

# 7. Breakdown of monetary financial institutions' deposits and loans by institutional sector

The breakdown of financial instrument holders and issuers by institutional sector is based on the ESA 2010 methodology and is shown in detail in Chapter I of Title I of NBR Regulation No. 4/2014

on reporting statistical data and information to the National Bank of Romania, as subsequently amended and supplemented, hereinafter referred to as the Regulation.

These are: non-financial corporations, financial corporations (central bank, deposit-taking corporations except the central bank, money market funds (MMFs), non-MMF investment funds, other financial intermediaries, financial auxiliaries, captive financial institutions and money lenders, insurance corporations and pension funds), general government, households, non-profit institutions serving households, non-residents.

Non-government credit (i.e. loans to the private sector) are the loans granted by credit institutions to households and legal entities (non-financial corporations and non-monetary financial institutions).

Government credit includes the loans granted to the general government (central government, local government, administration of social security funds), as well as the debt securities issued by these institutional sectors. The outstanding loans and deposits at the end of the reported month do not include the accrued interest receivable/payable. The outstanding loans at the end of the reported month include non-performing loans.

Indicators related to households also include non-profit institutions serving households.

# 7.1. Deposits of non-government resident clients

Current accounts, demand deposits and all time deposits, regardless of maturity, are included.

The outstanding deposits at the end of the reported month do not include the accrued interest payable.

#### 8. Assets and liabilities of non-MMF investment funds

Investment funds are defined in Article 1 of Regulation (EU) No. 1073/2013 of the European Central Bank of 18 October 2013 concerning statistics on the assets and liabilities of investment funds (recast) (ECB/2013/38), implemented by the NBR into Chapter V of Title I of NBR Regulation No. 4/2014 on reporting statistical data and information to the National Bank of Romania, as subsequently amended and supplemented, hereinafter referred to as the Regulation, as collective investment undertakings that invest in financial and/or non-financial assets to the extent that their objective is investing capital raised from the public.

Pension funds and money market funds (MMFs) are not included.

Until December 2014, data on the assets and liabilities of non-MMF investment funds were reported in accordance with the provisions of Regulation (EC) No. 958/2007 of the European Central Bank of 27 July 2007 concerning statistics on the assets and liabilities of investment funds (ECB/2007/8), implemented by the NBR into Chapter V of Title I of NBR Regulation No. 31/2011.

Data on the assets and liabilities of non-MMF investment funds are published in terms of aggregate monthly stocks. Monthly changes in stocks may be the result of financial transactions, revaluations due to price and exchange rate movements or reclassifications and other statistical adjustments.

In the statistics of assets and liabilities of non-MMF investment funds, the accrued interest receivable/payable on loans and deposits is recorded under remaining assets/remaining liabilities.

The value of debt securities held includes the related claim. Indicators related to households also include non-profit institutions serving households.

The types of instruments representing assets and liabilities of non-MMF investment funds, as well as the classification of their counterpart by institutional sector, are fully harmonised with the methodology under the European System of National and Regional Accounts (ESA 2010).

# 9. On-balance sheet assets and liabilities of non-bank financial institutions in the General Register

Starting with 31 March 2008 until 31 December 2014, data on non-bank financial institutions (or financial corporations engaged in lending) are reported in accordance with the methodology under Guideline 2009/23 of the European Central Bank amending Guideline ECB/2007/9 on monetary, financial institutions and markets statistics. This methodology was implemented into Chapter IV "Statistics regarding on-balance sheet assets and liabilities of non-bank financial institutions" of Title I of NBR Regulation No. 31/2011 on reporting statistical data and information to the National Bank of Romania, as amended and supplemented by NBR Regulation No. 3/2013.

Starting with 31 March 2015, data on non-bank financial institutions are reported in accordance with the methodology under Guideline 2014/15 of the European Central Bank on monetary, financial institutions and markets statistics (recast), as subsequently amended and supplemented. This methodology was implemented into Chapter IV "Statistics regarding on-balance sheet assets and liabilities of non-bank financial institutions" of Title I of NBR Regulation No. 4/2014 on reporting statistical data and information to the National Bank of Romania, as subsequently amended and supplemented. The on-balance sheet assets and liabilities are broken down by financial instrument and institutional sector, in accordance with the methodology provided under the European System of National and Regional Accounts (ESA 2010).

The balance sheet breakdown by type of non-bank financial institutions is in line with the lending activities regulated by Law No. 93/2009 on non-bank financial institutions and with the General Register entries.

Based on the data submitted by non-bank financial institutions and in keeping with the analysis requirements, loans are classified by institutional sector (households, non-financial corporations, other sectors and non-residents), type of financing (consumer, housing and other loan types), original maturity (up to 1 year, over 1 year and up to 5 years, and over 5 years) and currency (lei, EUR and other).

In the statistics of on-balance sheet assets and liabilities of non-bank financial institutions, the accrued interest receivable/payable on loans and deposits is recorded under remaining assets/remaining liabilities.

# 10. Interest rates applied by credit institutions

Starting with December 2014, interest rates on outstanding loans/deposits and lending and deposit rates on new business are calculated in line with the methodology laid down in Regulation (EU) No. 1072/2013 of the European Central Bank of 24 September 2013 concerning statistics on interest rates applied by monetary financial institutions (recast) (ECB/2013/34). This methodology was implemented by the National Bank of Romania into Chapter III of Title I of NBR Regulation No. 4/2014 on reporting statistical data and information to the National Bank of Romania, as subsequently amended and supplemented, hereinafter referred to as the Regulation.

Until December 2014, interest rates on outstanding loans/deposits and lending and deposit rates on new business were calculated in line with the provisions of Regulation (EC) No. 63/2002 of the European Central Bank of 20 December 2001 concerning statistics on interest rates applied by monetary financial institutions to deposits and loans vis-à-vis households and non-financial corporations (ECB/2001/18), as amended by Regulation (EC) No. 290/2009 of the European Central Bank of 31 March 2009 (ECB/2009/7). This methodology was implemented by the National Bank of Romania into Chapter III of Title I of NBR Regulation No. 31/2011 on reporting statistical data and information to the National Bank of Romania, as amended and supplemented by NBR Regulation No. 3/2013.

Interest rates are calculated as an arithmetic mean of annualised rates weighted by the outstanding amounts of loans/deposits at the end of the reported month or by the new loan/deposit contracts during the reported month.

The calculation base of interest rates on outstanding loans at the end of the reported month does not include non-performing loans and loans for debt restructuring granted at below market rates. The calculation base of lending rates on new business does not include overdrafts, revolving credit, claims related to credit cards, non-performing loans and loans for debt restructuring granted at below market rates.

The outstanding loans and deposits at the end of the reported month as well as the volume of new loan/deposit contracts in the reported month do not include the accrued interest receivable/payable.

The annualised rate is the interest rate agreed between the credit institution and the customer for a deposit or loan, converted to an annual basis and quoted in percentages per annum.

Pursuant to the Regulation, interest rates are calculated for the following institutional sectors: non-financial corporations, households and non-profit institutions serving households (indicators related to households also include non-profit institutions serving households), as well as for the following balance sheet items: loans (total), overdrafts, revolving credit, claims related to (extended and opportunity) credit cards, housing loans, consumer credit, other lending (including also business development loans granted to freelancers and family associations), overnight deposits, deposits redeemable at notice, time deposits and repo agreements.

#### 11. Credit risk indicators

#### 11.1. Key prudential indicators

As of 1 January 2014, NBR Order No. 13/2011 regarding reporting minimum capital requirements for credit institutions was implicitly repealed, once the new CRD IV [Directive 2013/36/EU and Regulation (EU) No. 575/2013] regulatory framework came into force. As of June 2014, indicators are determined based on the information submitted by banks according to Commission Implementing Regulation (EU) No. 680/2014 laying down implementing technical standards with regard to supervisory reporting of institutions according to Regulation (EU) No. 575/2013 of the European Parliament and of the Council. For this purpose, pursuant to Article 92(2) of Regulation (EU) No. 575/2013, institutions shall calculate their capital ratios as follows: (a) the Common Equity Tier 1 capital ratio is the Common Equity Tier 1 capital of the institution expressed as a percentage of the total risk exposure amount; (b) the Tier 1 capital ratio is the Tier 1 capital of the institution expressed as a percentage of the total risk exposure amount; (c) the total capital ratio (previously known as the solvency ratio) is the own funds of the institution expressed as a percentage of the total risk exposure amount.

The leverage ratio measures to what extent credit institutions' own funds cover the funding of their business. It was calculated, according to the NBR definition until end-December 2013, as the ratio of Tier 1 capital to the average value of assets. Once Commission Implementing Regulation (EU) No. 680/2014 entered into force, the leverage ratio was included in the reporting statements in compliance with the said technical standards and is reported accordingly by credit institutions. Thus, credit institutions calculate their leverage ratios in line with the methodology laid down in Regulation (EU) No. 575/2013 by dividing their capital measure (Tier 1 capital) by their total exposure measure (the sum of the exposure values of all assets and off-balance sheet items not deducted when determining the capital measure).

Starting with January 2012, given the amendments to the regulatory framework, in view of the harmonisation of the chart of accounts and the financial and prudential reporting system with the new rules required by the switch to the IFRS, certain loan portfolio quality indicators determined based on financial statements (whose numerator represented "past-due and doubtful claims") could no longer be calculated and were therefore replaced by the following indicators: (i) impaired loans to non-bank clients (net value)/total non-bank loan portfolio (net value); (ii) impaired loans to non-bank clients (net value)/total assets (net value) and (iii) impaired loans to non-bank clients (net value)/total liabilities.

In compliance with the provisions of NBR Order No. 27/2010 for the approval of the Accounting Regulations pursuant to the IFRS applicable to credit institutions, effective 1 January 2012, as subsequently amended and supplemented, the key elements that led to the introduction of the said indicators were as follows:

- (a) the different grouping of assets and liabilities;
- (b) the restructuring of "past-due claims" and "doubtful claims" accounts based on the IFRS presentation requirements and the FINREP reporting requirements (financial reporting framework for prudential supervision at individual level, established based on NBR Order No. 3/2011). Thus, while "past-due claims" included, in line with the previous accounting regulations, only overdue instalments, the remainder of the loan being recognised in the current accounts, the IFRS rules require that the full amount of the loan to be repaid shall be disclosed as overdue (principal, interest, amounts to be amortised). "Doubtful claims" included only disputed claims, while, according to the IFRS, the item "impaired loans" was introduced, consisting of assets for which there is objective evidence of impairment (loss-generating events, such as an increase in unemployment rate in the geographic area of the debtors, a decline in prices of mortgaged property in the relevant areas, observable data that indicate a quantifiable contraction in expected future cash flows) and which include loans that are not yet overdue and undisputed claims;
- (c) the mandatory introduction of the effective interest rate method in the implementation of the IFRS (previously optional, along with the linear method) for scheduling the amounts relative to the effective yield of a debt security, thus impacting the asset value;
- (d) the introduction of some new accounts representing "amounts to be amortised" to recognise the amounts, other than interest, that are taken into account when calculating the effective interest rate (e.g. collected commissions); and
- (e) the recognition in the balance sheet, in the context of the switch to the IFRS, of the items "Receivables written off, but still followed up" and "Receivables from penalties claimed" previously recorded as off balance sheet items (making the necessary adjustments for impairment losses and keeping them on balance sheet until they no longer generate future benefits).

The non-performing loan ratio is the key loan portfolio quality indicator. By end-April 2014, this indicator was calculated based on prudential reports on loan classification and provisioning as the ratio of the gross exposure to non-bank loans and interest overdue for more than 90 days and/or for which legal proceedings were initiated against the operation or the debtor (classified in national regulations under "Loss 2") to total classified loans to non-bank clients and related interest, off-balance sheet items excluded.

Starting May 2014, the "Non-performing loan ratio" is no longer calculated based on data reported by banks pursuant to NBR Regulation No. 16/2012 on classification of loans and investments, because it reflects only partially the degree of non-performance in the banking system (after the

switch to IFRS, the above-mentioned Regulation was amended for the purpose of determining prudential filters and covers only banks that calculate the minimum capital requirement for credit risk according to the standardised approach). To this end, from March 2014 to November 2015, the non-performing loan ratio was determined in line with the NBR methodology based on reports from all banks (both those which establish the minimum capital requirement for credit risk according to the standardised approach and those applying internal rating models) including all loans more than 90 days past due and/or in which case legal proceedings were initiated.

Following the coming into force of the technical standards for reporting forborne and non-performing exposures issued by the European Banking Authority (EBA)<sup>1</sup>, implemented in the national legislation in the FINREP reports at solo level, which harmonise the definitions applicable across the EU, it was necessary to revise the calculation methodology of "the non-performing loan ratio" in order to correlate it with the EBA methodology.

According to the EBA definition applied to consolidated financial reports pursuant to Commission Implementing Regulation (EU) 2015/227 amending Implementing Regulation (EU) No 680/2014 "non-performing exposures are those that satisfy any of the following criteria:

- (a) material exposures which are more than 90 days past due;
- (b) the debtor is assessed as unlikely to pay its credit obligations in full without realisation of collateral, regardless of the existence of any past due amount or of the number of days past due".

Specifically, starting December 2015, the "non-performing loan ratio based on EBA definition" is calculated as a ratio of the gross carrying amount of non-performing loans and advances (template F18.00, lines 70 and 250, column 60) to the total gross carrying amount of loans and advances (template F18.00, lines 70 and 250, column 10).

As for liquidity, banks are required to calculate the liquidity ratio as a ratio of effective liquidity to required liquidity for each maturity bucket (up to 1 month, between 1 month and 3 months, between 3 and 6 months, between 6 and 12 months, and more than 12 months). These provisions are currently part of NBR Regulation No. 25/2011 on the liquidity of credit institutions (effective January 2012). Credit institutions have to maintain the liquidity ratio – calculated for all operations in lei equivalent – of at least 1 for the following maturity buckets: up to 1 month, between 1 month and 3 months, between 3 and 6 months, and between 6 and 12 months. Moreover, according to the provisions of the European regulatory framework, credit institutions shall calculate and report to the National Bank of Romania the liquidity coverage ratio (LCR). Specifically, pursuant to Art. 4 of Commission Delegated Regulation (EU) 2015/61 to supplement Regulation (EU) No 575/2013 of the European Parliament and the Council with regard to liquidity coverage requirement for credit institutions, the above-mentioned indicator shall be equal to the ratio of a credit institution's liquidity buffer to its net liquidity outflows over a 30 calendar day stress period and shall be expressed as a percentage. Credit institutions shall maintain a liquidity coverage ratio of at least 100 percent. The reporting frequency, format and instructions were set by Implementing Regulation (EU) No 680/2014 laying down implementing technical standards with regard to supervisory reporting of institutions of the liquidity coverage requirement.

#### 11.2. Credit risk information

# 11.3. Loans granted and commitments assumed by credit institutions

Commission Implementing Regulation (EU) No. 2015/227 of 9 January 2015 amending Implementing Regulation (EU) No 680/2014 laying down implementing technical standards with regard to supervisory reporting of institutions according to Regulation (EU) No 575/2013 of the European Parliament and of the Council.

#### 11.4. Loans granted by credit institutions

# 11.5. Debts overdue for more than 30 days incurred by individuals

Past-due debts for more than 30 days in the repayment of loans by individuals are reported by the Credit Bureau, based on the data supplied by credit institutions and non-bank financial institutions participating in the Credit Bureau System. In these reports, the outstanding amount recorded with the Credit Bureau represents the value of the past-due debt (principal, interest and penalty rate) in relation to the concerned loan, denominated in the loan currency.

# 11.6. Loans granted and commitments assumed by NBFI + EMI + PI

### 11.7. Loans granted by NBFI + EMI + PI

The credit risk information encompasses identification data on a borrower – individual or non-bank legal entity – and the following leu- and foreign currency-denominated operations whereby reporting institutions face risk exposure to the respective borrower via: (a) loans granted and (b) commitments assumed by the reporting institution on behalf of the debtor.

The credit risk information refers to the exposure of each reporting institution to a single borrower, which may be equal to or higher than lei 20,000.

The borrower's ownership type is consistent with MPF Order in force approving the Financial Reporting System for economic agents (Types of Ownership Nomenclature); the type of loan granted to individuals and non-bank legal entities (by risk) observes the accounting rules compliant with the International Financial Reporting Standards applicable to credit institutions and with the accounting rules compliant with EU Directives (2012); the loan currency respects the globally applicable regulations; activity of borrower is consistent with Order No. 337/2007, issued by the President of the National Institute of Statistics, on the updating of NACE. The classification meets the analysis requirements of the National Bank of Romania.

Tables 11.2., 11.3., 11.4., 11.6. and 11.7. show credit risk information reported to the Central Credit Register.

Data series for the past 84 months are updated on a monthly basis.

#### 11.8. Rejected debit payment instruments

# 11.9. Account holders that generated payment incidents

Tables 11.8. and 11.9. provide information on the rejected debit payment instruments registered in the Payment Incidents Register database, as well as on the accountholders that generated payment incidents related to cheques, bills of exchange- and promissory notes.

As regards the number of account holders, the monthly values represent the number of account holders reported to the Payment Incidents Register (PIR) in the respective month. The arithmetic sum of account holders calculated for several months is not the same with the number of account holders reported once to the PIR over that period, as the same account holder can be reported with payment incidents in different months.

#### 12. Money market indicators

#### 12.1. Interbank operations

According to NBR Norms No. 14 of 1 November 2007 amending and supplementing NBR Norms No. 4/1995 on the functioning of the interbank money market, BUBID and BUBOR become ROBID and ROBOR as follows: (i) ROBID: the interest rate on operations to raise funds and (ii) ROBOR: the interest rate on operations to invest funds.

# 13. Foreign exchange market indicators

# 13.1. Interbank foreign exchange market

The monthly volume of transactions in the interbank foreign exchange market represents the sum of the daily transactions, i.e. the daily highs between sales and purchases. The average annual volume of foreign exchange transactions is calculated as an arithmetic mean of monthly foreign exchange transactions.

The average monthly exchange rate (EUR/RON and USD/RON) is a simple arithmetic mean of daily exchange rates calculated and released by the National Bank of Romania every business day at 1:00 PM, based on the quotes of the banks licensed to perform foreign exchange transactions. The average annual exchange rate (EUR/RON and USD/RON) is calculated as a simple arithmetic mean of average monthly rates.

### 14. Capital market indicators

# 14.1. Bucharest Stock Exchange – Regulated market

The BET (Bucharest Exchange Trading) index is the BSE's first official index. It is calculated as a weighted average (with free float capitalisation) of the prices of stocks that make up the index basket. BET index has a variable number of constituents, with a minimum of 10 companies and a maximum of 15 companies.

Financial investment companies are not included in the basket of BET index. In order to prevent the developments in a small number of companies from having a significant impact on the index, the weight of any company in the index basket is limited to maximum 20 percent.

The BET-FI index is the first sector index developed by the BSE. It was originally calculated for the 5 financial investment companies listed and was envisaged to include all the financial investment companies to be listed subsequently. Its calculation methodology is the same as that used for the BET index.

The BET-XT and BET-NG indices were launched on 1 July 2008, the methodology for their calculation being similar to that described above. The BET-XT index covers the developments in the 25 most liquid and most heavily traded companies on the regulated market, including financial investment companies, each accounting for no higher than 15 percent of the index basket.

The BET-NG index is a sector index reflecting developments in the share prices of the companies traded on the BSE regulated market whose core business is related to the energy sector and its related utilities. The maximum weight a company can hold in the index basket is 30 percent.

The BET Plus index, launched on 23 June 2014, reflects the evolution of Romanian companies listed on the BSE regulated market that meet the minimum selection criteria (in terms of liquidity and free-float value), except for financial investment companies. Similarly to the other indices developed by the BSE, the methodology of the BET Plus index takes into consideration the trades recorded on the main market segment ('Regular').

The ROTX (Romanian Traded Index) is a real time reflection of the movements of the blue chip stocks traded on the BSE. There is no fixed number of shares included in the ROTX index portfolio, as the key selection criteria are liquidity and market capitalisation. Calculated in lei, euro and US dollars and disseminated in real time by the Wiener Börse AG, the ROTX index is designed as a tradable index and can be used as an underlying asset for derivatives and structured products.

#### 15. Romania's balance of payments and international investment position indicators

# 15.1. Balance of payments

The balance of payments summarises economic and financial transactions between residents and non-residents of Romania with the rest of the world during a specific time period. It consists of the goods and services account, the primary income account, transfers without a *quid pro quo* (donations, grants and the like), as well as financial claims and obligations. Its main items are the current account, the capital account, and the financial account.

- a) The national legal framework: (i) Law No. 312/2004 on the Statute of the National Bank of Romania: the National Bank of Romania is legally empowered to compile the balance of payments (Article 9 para. (2)); (ii) Law No. 226/2009 on the organisation and functioning of official statistics in Romania: (Article 6 paras. (3)-(5)); (iii) NBR Regulation No. 4/2014 on reporting statistical data and information to the National Bank of Romania, as subsequently amended and supplemented.
- **b)** The international legal framework: (i) Regulation (EC) No 184/2005 of the European Parliament and of the Council on Community statistics concerning balance of payments, international trade in services and foreign direct investment, as subsequently amended and supplemented; (ii) Guideline 2011/23 of the European Central Bank on the statistical reporting requirements of the European Central Bank in the field of external statistics, as subsequently amended and supplemented.
- c) The international methodological standard on balance of payments compilation is ensured by the IMF's sixth edition of the Balance of Payments and International Investment Position Manual (BPM6). In order to ensure consistence between international macroeconomic statistics, the BPM6 was prepared in line with the revised OECD Benchmark Definition of Foreign Direct Investment (2008 Benchmark Definition) and the System of National Accounts (2008 SNA).
- d) Data sources: (i) quarterly sample-based or comprehensive direct statistical surveys on foreign direct investment; international trade in services; and other financial information in relation to non-residents; (ii) data collected on a monthly basis from credit institutions in virtue of NBR Regulation No. 4/2014 on reporting statistical data and information to the National Bank of Romania, as subsequently amended and supplemented, related to transactions with non-residents on their own behalf and account; (iii) security-by-security data collection system for holdings and issues of securities; (iv) monetary statistics; (v) statistics on international trade in services; (vi) administrative sources; (vii) monthly estimates referring mainly to balance-of-payments items for which data are available on a quarterly basis.

# e) Concepts and definitions

**I. Current account.** The current account reflects the provision or acquisition of real resources by the Romanian economy to or from the rest of the world, as well as unilateral transactions, without a *quid pro quo*.

The current account is subdevised into goods, services, primary income, secondary income.

On the credit side, transactions show the part of the reporting economy's domestic product supplied to other economies (exports of goods and services), income from using factors of production in foreign production process (compensation of employees and investment income) as well as the receipt of real or financial resources from abroad without a *quid pro quo*.

On the debit side, transactions show acquisition of goods and services from abroad (imports), income owed to non-residents for using their factors of production, real or financial resources granted to non-residents without a *quid pro quo*.

89

**I.1. Goods** – show international export/import transactions implying the change of ownership over the respective goods, unlike the export/import transactions reflected by the NIS statistics on international trade in goods that capture the circulation, i.e. dispatches/arrivals, of goods.

Trade in goods statistics exclude the value of goods that cross the border but do not change economic ownership (goods for processing, identified based on the type of transaction), but include the net value of processing services, which is recorded under "Manufacturing services on physical inputs owned by others".

- **I.1.1. General merchandise** shows exports and imports of goods that are subject to a change in economic ownership between residents and non-residents and cross the country border. Data are recorded at FOB values. Imports FOB are calculated by the NBR based on the CIF/FOB conversion factor set by the NIS.
- **I.1.2. Merchanting** is defined as the purchase of goods by a resident (of the compiling economy) from a non-resident combined with the subsequent resale of the same goods to another non-resident without the goods being present in the compiling economy. Acquisition of goods is recorded as negative exports of goods. Sale of goods is recorded as positive exports of goods. The difference between the selling price and the acquisition price is shown in "net exports of goods under merchanting". Transactions are recorded at market values.
- **I.2. Services** are the result of a production activity that changes the conditions of the consuming units (individuals, legal entities or economic goods), or facilitates the exchange of products or financial assets.
- **I.2.1. Manufacturing services on physical inputs owned by others** covers the goods for processing, assembly, labelling by an entity that does not own the goods concerned. It reflects the net value of processing services (which may include the costs for acquiring materials by the service provider).
- **I.2.2. Maintenance and repair services** refers to maintenance and repair work by residents on goods that are owned by non-residents (and vice versa). Repairs and maintenance on ships, aircraft, and other transport equipment are included in this item. Construction maintenance and repairs as well as maintenance and repairs of computers are excluded.
- **I.2.3. Transport** is the process of carriage of people and objects from one location to another as well as related supporting and auxiliary services. It includes postal and courier services. Transport can be classified according to: mode of transport and what is carried (passengers, freight, other auxiliary services uploading, downloading, storage etc.).
- **I.2.4. Travel** credits cover the value in exchange for tourist services supplied to non-residents during visits to Romania and outside Romania and travel debits cover the value in exchange for tourist services provided to Romanian nationals outside Romania. The item includes business travel such as training courses, business meetings, conferences, events, etc. Another breakdown of travel shows: accommodation services, food-serving services, local transport services, cultural activities, recreational services, travel arrangements, goods and services acquired by persons during their stays abroad (e.g., souvenirs, provision of access to the Internet in hotels, etc.), health- and education-related services involving conveyance of customers (patients, students) from the home country to the host country.
- **I.2.5. Construction** refers to the total value of construction works carried out over less than one year. It records on a gross basis the creation, renovation, repair, or extension of buildings,

land improvements of an engineering nature, and other such engineering constructions as roads, bridges, dams and so forth.

- **I.2.6.** Insurance and pension services include services of providing direct insurance, reinsurance, and auxiliary services, pension fund services. The value of these services is linked to the fees included in the premiums, not the premiums themselves.
- **I.2.7. Financial services** cover financial intermediary and auxiliary services, except insurance and pension fund services. They include both services charged for by explicit charges and financial intermediation service charges indirectly measured, abbreviated as FISIM.
- **I.2.8. Charges for the use of intellectual property** include charges for the use of proprietary rights that can arise from research and development as well as from marketing activities (patents, trademarks, copyrights, industrial processes and designs including trade secrets, franchises) as well as charges for licenses to reproduce or distribute (or both) intellectual property, and related rights.

### I.2.9. Telecommunications, computer, and information services

Telecommunications services encompass the transmission of sound, images, data, or other information by telephone, telex, telegram, radio and television cable transmission, radio and television satellite, e-mail, facsimile, and so forth, including business network services, teleconferencing, and support services. Also included are mobile telecommunications services, Internet backbone services, and online access services, including provision of access to the Internet.

Computer services consist of hardware- and software-related services and data-processing services. Also included are hardware and software consultancy and implementation services; maintenance and repairs of computers and peripheral equipment; data recovery services, provision of advice and assistance on matters related to the management of computer resources; analysis, design, and programming of systems ready to use (including web page development and design), and technical consultancy related to software; licenses to use non-customised (mass-produced) software; the development, production, supply, and documentation of customised software, including operating systems made to order for specific users; systems maintenance and other support services, such as training provided as part of consultancy; data-processing services, such as data entry, tabulation, and processing on a time-sharing basis; webpage hosting services (i.e., the provision of server space on the Internet to host clients' webpages); and computer facilities management.

Information services comprise news agency services as well as other information provision services: database services (database conception, data storage, and the dissemination of data and databases, including directories and mailing lists) both online and through magnetic, optical, or printed media; and web search portals. They also include direct non-bulk subscriptions to newspapers and periodicals, whether by mail, electronic transmission, or other means; other online content provision services; and library and archive services. Downloaded content that is not software (included in Computer Services) or audio and video (included in Audio-visual and related services) is included in information services.

- **I.2.10. Other business services** covers research and development services, professional and management consulting services, technical, trade-related, and other business services.
- **I.3. Primary income** shows the return that accrues to institutional units for their contribution to the production process or for the provision of financial assets and renting natural resources, as reflected by the flows between resident and non-resident institutional units.

91

- **I.3.1. Compensation of employees** presents remuneration in return for the labour input to the production process contributed by an individual in an employer-employee relationship over a period less than one year.
- **I.3.2. Investment income** is derived from the provision/use of financial assets in a resident-non-resident relationship. It includes equity (dividends, reinvested earnings) and interest. In the balance of payments, investment income is classified according to the type of investment: direct investment income, portfolio investment income, other investment income and income on reserve assets. For the definitions of the types of investment, see the financial account.
- **I.3.3. Other primary income** classifies income by institutional sector of the reporting economy (general government or other sectors) and includes taxes on production and imports and subsidies on products and production. The non-refundable EU funds in the form of subsidies from the European Agricultural Guarantee Fund are recorded under other primary income of the general government.
- **I.4. Secondary income** encompasses current transfers between residents and non-residents. A transfer is an entry that corresponds to the provision of a good, service, financial asset, or other non-produced asset by an institutional unit to another institutional unit when there is no corresponding return of an item of economic value. Current transfers consist of all transfers that are not capital transfers.

Current transfers are classified by the institutional sector providing or receiving the transfer: general government or other sectors. Current transfers of the general government comprise current taxes on income, wealth etc., social contributions, social benefits, current international cooperation, miscellaneous current transfers and the contribution to the EU budget (calculated based on value added tax and gross national income). They include non-refundable EU funds for current expenditure drawn from the European Social Fund, and partly from the European Agricultural Fund for Rural Development.

Current transfers of other sectors include current taxes on income, wealth etc., social contributions, social benefits, net non-life insurance premiums, non-life insurance claims, miscellaneous current transfers (personal transfers between resident and non-resident households, including workers' remittances).

**II. Capital account** covers acquisition and disposal of non-produced, non-financial assets between residents and non-residents and capital transfers.

# II.1. Acquisition and disposal of non-produced, non-financial assets

Non-produced, non-financial assets consist of: natural resources, contracts, leases, and licenses and marketing assets (trademarks) and goodwill. This item records only acquisition and disposal of such assets, not their use.

**II.2. Capital transfers** consist in changes in ownership over fixed assets, transfers of funds connected to or conditional on the acquisition or disposal of a fixed asset and the cancellation of liabilities by the creditors without a quid pro quo. Capital transfers can be made in cash or in kind (such as debt forgiveness). The distinction between current transfers and capital transfers is, actually, the use of the transfer by the recipient country.

Capital transfers include: (i) taxes on capital; (ii) capital transfers for investment and (iii) other capital transfers and are classified according to the institutional sector initiating or receiving the transfer in the reporting economy; general government or other sectors. The capital transfers of

the general government include non-refundable EU funds used for fixed capital formation and drawn from the European Regional Development Fund, the Cohesion Fund, and partly from the European Agricultural Fund for Rural Development.

#### III. Financial account

The financial account records net transactions that involve financial assets and liabilities and that take place between residents and non-residents. The net acquisition of financial assets is the difference between the acquisition of assets and the reduction in assets, while the net incurrence of liabilities is determined as the difference between the incurrence of liabilities and the reduction in liabilities.

Based on the functional category, the financial transactions are classified as: (i) direct investment; (ii) portfolio investment; (iii) financial derivatives; (iv) other investment and (v) reserve assets.

#### III.1. Direct investment

Direct investment implies a long-term investment relationship between a resident and a non-resident entity; it usually involves a significant degree of influence exerted by the investor on the management of the enterprise in which he has invested.

The direct investment components are: **equity**, namely the paid-up capital and the reserves related to a non-resident investor holding at least 10 percent of the subscribed share capital of a resident enterprise, the related **reinvested earnings**, as well as **debt instruments** (e.g., loans) between the investor or the group to which the investor belongs and the enterprise in which he has invested.

**III.2. Portfolio investment** is defined as cross-border transactions and positions involving debt or equity securities, other than those included in direct investment or reserve assets. Portfolio investment includes securities such as **equity**, **investment fund shares** and **debt instruments**, except when they are classified either as direct investment or reserve assets.

#### III.3. Financial derivatives

A financial derivative contract is a financial instrument that is linked to another specific financial instrument or indicator or commodity and through which specific financial risks (such as interest rate risk, foreign exchange risk, equity and commodity price risks, credit risk, and so on) can be traded in their own right in financial markets. This category is identified separately from the other categories because it relates to risk transfer, rather than supply of funds or other resources. Unlike other functional categories, no primary income accrues on financial derivatives.

Due to the fact that in the case of financial derivative transactions the distinction between assets and liabilities is difficult, a convention was established at European level whereby all transactions with such instruments are recorded in the balance of payments as net acquisition of financial assets.

**III.4. Other investment** is a component that consists of transactions other than those included in direct investment, portfolio investment, financial derivatives and reserve assets.

**III.4.1. Equity other than that related to direct investment and portfolio investment** reflects the participation in the capital of some international organisations, as well as the less than 10 percent participation in the share capital of quasi-corporations.

**III.4.2. Currency and deposits** include currency in circulation and deposits. Deposits are standard, non-negotiable contracts, generally offered by deposit-taking corporations, allowing the placement and the subsequent withdrawal of an amount of money by a creditor.

**III.4.3. Loans** include all loans, including housing loans, financial lease and repos. All repurchase agreements are considered collateral loans, rather than simple sales/purchases of securities and are recorded under other investment.

**III.4.4. Trade credit and advances** are financial claims arising from credit extended directly by the suppliers of goods and services to their customers and advances for work that is in progress or is yet to be undertaken. Trade credit and advances arise when payment for goods or services is not made at the same time as the change in ownership of a good or provision of a service.

**III.4.5. SDR allocations** – a component presenting a recipient's liability in relation to the IMF, with a corresponding entry under reserve assets.

**III.5. Reserve assets** are those external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate, and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing). Reserve assets must be foreign currency assets, claims on non-residents and assets that actually exist.

#### Residents

- natural entities Romanian, foreign and stateless citizens residing in Romania, as attested by identity documents issued according to the law;
- legal entities and any other entities headquartered in Romania, as well as natural entities,
   Romanian, foreign and stateless citizens residing in Romania, which are authorised and/or registered to operate in Romania independently, according to the legal regulations in force;
- branches, agencies, representative offices, offices of foreign legal entities or other foreign entities, registered and/or authorised to operate in Romania; and;
- embassies, consulates and other permanent representative offices and missions of Romania abroad.

#### Non-residents

- natural entities foreign, Romanian and stateless citizens residing abroad, as attested by identity documents issued according to the law;
- legal entities and any other entities headquartered abroad, as well as individuals, foreign, Romanian and stateless citizens residing abroad, which are authorised and/or registered to operate abroad, independently, according to the legal regulations in force;
- branches, agencies, representative offices, offices and any other undertakings of Romanian legal entities or other Romanian entities registered and/or licensed to operate abroad; and
- embassies, consulates and other permanent representative offices and missions of other countries in Romania, as well as international organisations or representative offices of such organisations operating in Romania.

# 15.4. Long-term external debt

Gross external debt is the outstanding amount of those actual current, and not contingent, liabilities that require future payments of principal and/or interest by the debtor and that are owed to non-residents by residents of an economy (according to the definition in *External Debt Statistics: Guide for Compilers and Users*). Statistics on gross external debt are compiled in compliance with the IMF and

the EU methodology (*Balance of Payments Manual* – BPM6; *Manual on Government Deficit and Debt* – *Implementation of ESA 2010, 2014 Edition*). External public debt is recognised, monitored and managed by the Ministry of Public Finance (Law No. 313/2004, as subsequently amended and supplemented). Capital transactions in the form of long-term (LT) external private debt shall be notified to the NBR pursuant to NBR Regulation No. 4/2014 on reporting statistical data and information to the National Bank of Romania, as subsequently amended and supplemented.

According to BPM6, SDR allocations from the IMF are treated as long-term external debt.

# 15.5. International investment position

Statistical data on Romania's international investment position are compiled based on IMF and EU methodology (*Balance of Payments Manual – BPM6*).

Romania's international investment position covers the country's stock of external assets and liabilities (between residents and non-residents) at a given time. Closing stocks are calculated based on the opening stocks and the information on financial flows (included in the balance-of-payments financial account) by taking into account exchange rate changes, international price changes, and other financial adjustments over the period under review.

The breakdown of international investment position reveals the main functional categories: direct investment, portfolio investment, financial derivatives, other investment and reserve assets. They comprise financial instruments such as equity, debt securities, financial derivatives, other equity, currency and deposits, loans, trade credits, pension and insurance schemes, other assets/liabilities, special drawing rights (SDRs), gold and other reserve assets. Financial instruments also contain information on their maturity.

Data on international investment position are compiled on a quarterly basis and revised in March/ September each year for the previous reference period.
