SUMMARY OF MAIN ECONOMIC DEVELOPMENTS AND MONETARY POLICY IN NOVEMBER 2006

Real Economy

In November 2006, industrial output stayed virtually flat at the October level, with both the gross data series and the working day-adjusted data series displaying small volume changes of -0.8 percent and -0.1 percent respectively. However, the annual growth rate of industrial output was high (7.4 percent), mainly on account of manufacturing (whose output increased by 8.8 percent) where the fastest-growing sub-sectors were further those related to construction¹. Manufacturing is likely to fare better in the period ahead – although the non-seasonally adjusted figure of the confidence indicator calculated by DGECFIN declined by 0.7 points versus October, the current level of this indicator (2.9) lies slightly above the average for the past seven months, when industry reported the best performance year so far.

The same as in October, the registered unemployment rate remained low (5.1 percent for the gross series and 5.2 percent for the seasonally-adjusted series), which is indicative of tight conditions on the labour market. The annual growth rate of wages was still high in real terms and accelerated slightly as compared with the prior month to reach its highest reading in 2006, i.e. 12.1 percent, largely due to some incidental factors (bonuses and incentives) which were manifest mainly in the public sector (up 4.9 percentage points to 20.2 percent).

The turnover in trade and services sector continued to expand at a sustained pace as concerns both purchases of goods (commodities and auto vehicles) and market services to population. The same as in the previous month, the annual growth rates of durables sales were generally below the average for January-September, as illustrated by the sales of electronics, household appliances and furniture, which dropped for the first time in eight months (by 2.1 percent in annual terms), on the one hand, and by the sales of auto vehicles, on the other. Both developments can be attributed to the expected changes in the customs regime following Romania's accession to the European Union.

Calculations based on data supplied by NIS and NBR

Labour Force

Source: NIS

¹ Woodworking: 10.9 percent, chemicals: 12.1 percent, building materials: 23.3 percent, metallic construction: 14.2 percent, furniture: 29.6 percent.

In November, the annual pace of increase of current account deficit slowed to 24 percent, which represented half of the average change during January–October 2006. This development was widely accounted for by the trade in goods, given that the growth rate of exports added 4.9 percentage points to 20.9 percent while that of imports decelerated by 3 percentage points to 23.1 percent. Nevertheless, the cumulative value of the current account deficit for January–November 2006 stood 44.8 percent higher than that recorded in the same year-earlier period, owing largely to the developments in the trade balance.

In November, the annual growth rate of industrial producer prices for the domestic market remained unchanged from the prior month at 10.9 percent. Nevertheless, mining reported stronger growth (up 3.3 percentage points), due possibly to costlier natural gas. Across manufacturing, the disinflation posted by industrial producer prices for the domestic market was further manifest, yet their growth rate was above the average industry-wide for the fifth consecutive month.

Annual inflation rate declined to 4.67 percent in November, merely 0.13 percentage points below the previous month's reading. The slackening of disinflation was attributable to the highest monthly inflation rate displayed year so far, i.e. 1.09 percent. Behind this stood largely the following: (i) the 17.52 percent hike in prices for heating; (ii) the 5.68 percent rise in prices for natural gas starting with the second 10-day period of the month; (iii) the 23.49 percent increase in the price for eggs, the seasonal impact of scant supply being associated with producers' efforts to offset the heavy losses caused by bird flu earlier in the year.

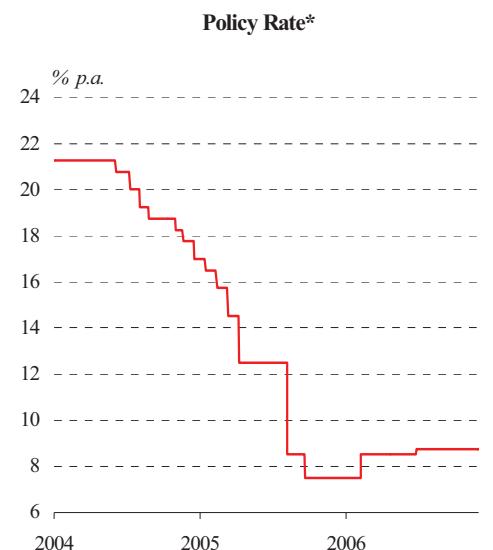

Monetary Policy

In its meeting of 10 November 2006, the National Bank of Romania Board decided to maintain the policy rate at 8.75 percent and to continue to pursue firm control over money market liquidity. These decisions took into account the assumed step-up, in the period ahead, of the influence of some factors likely to generate inflation, as reflected by the updated projection of macroeconomic developments in the medium term. From this perspective, the National Bank of Romania Board showed concern for the major inflationary risks emanating from the rise, in the near term, of the projected level of excess demand – largely as a result of the anticipated easing of the fiscal stance – and from the ongoing large adjustment of administered prices and hikes in indirect taxes throughout the forecast horizon.

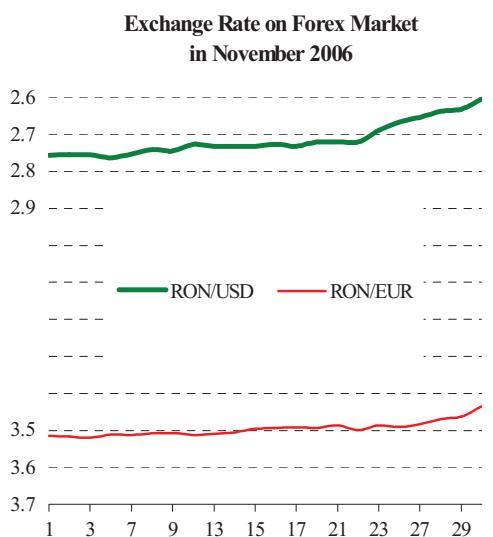

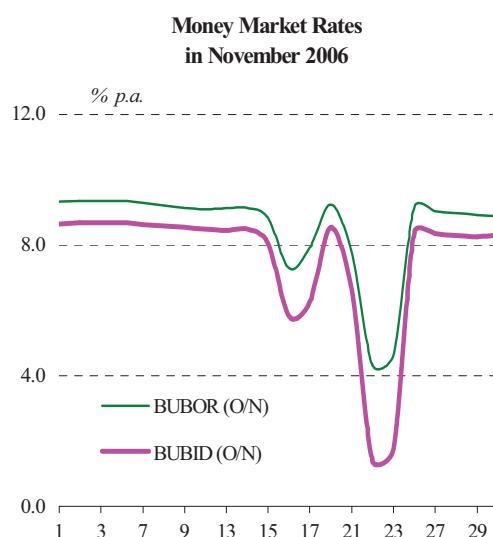

Over the period, the central bank continued to steadily mop up the excess liquidity in the money market by absorbing entirely the credit institutions' amounts bid at the auctions for one-month deposits. Nevertheless, the average daily flow of sterilisation operations decreased 35.8 percent month on month to RON 286.1 million, reflecting the relatively stronger contractionary impact of autonomous factors of liquidity during the reported period. Also as a result of the latter phenomenon, the cumulative volume of the credit institutions' bids submitted to the monthly auction for certificates of deposit fell below the established threshold (75 percent of the pre-announced amount), which caused the National Bank of Romania to reject all the bids.

In this context, the average interest rate on interbank deposits (the National Bank of Romania excluded) added 0.34 percentage points against October to 7.80 percent. This increase was prompted by overnight rates exceeding slightly the policy rate in the first half of November, on the one hand, and these interest rates going down more slowly in the final week of the maintenance period, on the other; this downtrend even came to a temporary halt amid the atypical growth in some credit institutions' demand for reserves.

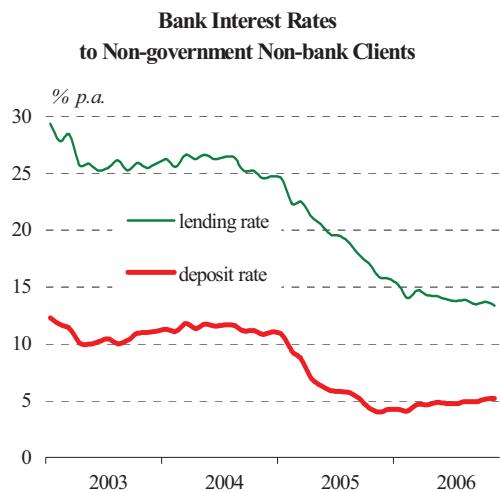

The domestic currency strengthened against the euro at a faster pace (0.7 percent in nominal terms over the previous month). However, the acceleration was slower in the first 10-day periods of November, against the backdrop of pressures induced by the wide trade deficit. The decrease in the RON/EUR exchange rate gathered pace thereafter, driven by the substantial rise in speculative capital inflows. The resurgence of such flows was

*) maximum interest rate on one-month deposit-taking operations

attributed to renewed investor interest in investments on financial markets across the region, on the one hand, and expectations of a sharper downturn in the RON/EUR exchange rate ahead of Romania's accession to the EU, on the other. As a result, the RON/EUR exchange rate saw a fast decline, closing the month at a record low since end-2002.

Average interest rates applied by credit institutions to non-banks displayed smaller fluctuations compared with October, staying on the preceding months' trend. Average interest rate on new loans inched down 0.53 percentage points month on month to 12.24 percent, both corporate and household loans being applied similar size downward adjustments. By contrast, average interest rate on new time deposits edged up against October to 6.34 percent, with lower interest rates on household deposits being offset by higher interest rates on corporate deposits.

LEGISLATIVE INDEX

Main Rules and Regulations Adopted in the Economic, Financial and Banking Areas in November 2006

Government Emergency Ordinance No. 87 of 8 November 2006 amends and supplements Law No. 32/2000 on insurance companies and insurance supervision (*Monitorul Oficial al României* No. 916/10 November 2006).

Law No. 404 of 9 November 2006 on financing development assistance under the framework of the national development policy for international co-operation (*Monitorul Oficial al României* No. 947/23 November 2006).

Decision No. 1250 of 13 November 2006 issued by the president of the National Regulatory Authority in Natural Gas Sector amends and supplements the criteria and methods for approving prices and setting administered prices in the natural gas sector, as approved by Decision No. 1078/2003 issued by the president of the National Regulatory Authority in Natural Gas Sector (*Monitorul Oficial al României* No. 936/20 November 2006).

Order No. 113132 of 17 November 2006 issued by the president of the Insurance Supervisory Commission enforces the Norms on the percentage shares for the insurers' contribution to the Guarantee Fund for 2007 (*Monitorul Oficial al României* No. 967/4 December 2006).

Government Emergency Ordinance No. 90 of 20 November 2006 provides for the revision of the state social security budget for 2006 (*Monitorul Oficial al României* No. 945/23 November 2006).

Government Emergency Ordinance No. 91 of 22 November 2006 sets certain measures concerning the state social security system and the health social insurance system (*Monitorul Oficial al României* No. 958/28 November 2006).

Law No. 422 of 22 November 2006 on the organisation and operation of the statistical system of international trade in goods (*Monitorul Oficial al României* No. 967/4 December 2006).

Law No. 441 of 27 November 2006 amends and supplements Law No. 31/1990 on commercial companies, as republished, and Law No. 26/1990 on the Trade Register, as republished (*Monitorul Oficial al României* No. 955/28 November 2006).

Main Regulations Issued by the National Bank of Romania in November 2006

Circular No. 21 of 1 November 2006 sets at 8.75 percent per annum the reference rate of the National Bank of Romania for November 2006 (*Monitorul Oficial al României* No. 908/8 November 2006).

Regulation No. 8 of 7 November 2006 on "know-your-customer" standards for non-bank financial institutions (*Monitorul Oficial al României* No. 941/21 November 2006).

Circular No. 22 of 9 November 2006 on the putting into circulation, for numismatic purposes, of a coin dedicated to the Densuș Church (*Monitorul Oficial al României* No. 921/14 November 2006).

Circular No. 23 of 14 November 2006 on the putting into circulation of the banknote with a face value of RON 200 (*Monitorul Oficial al României* No. 953/27 November 2006).

Circular No. 24 of 28 November 2006 on the cessation to be legal tender and exchange of ROL notes and coins (*Monitorul Oficial al României* No. 989/12 December 2006).

Methodological Notes

Annex 1

Monthly data on the main social and economic indicators (data released by the National Institute of Statistics in the Monthly Statistical Bulletin) are preliminary and may be revised subsequently; the final update is made on a yearly basis, based on company surveys and on specific yearly surveys conducted by the National Institute of Statistics. Starting with 2004, the base year for computing the industrial production index has been 2000. Starting with January 2006, the sample underlying the survey used for measuring wages and the number of employees has been subject to alteration. Data series are updated on a regular basis after being released by the National Institute of Statistics.

Annex 2

Starting with January 2006, fixed-base monthly consumer price indices are calculated on the basis of 2004 average prices and weights based on average expenses in Household Survey.

Annex 6

BUBID – interest rate on deposits taken by banks, **BUBOR** – interest rate on deposits made by banks.

Annexes 7, 8

Starting with May 2003, **interest rates applied by the banking system** have been calculated in compliance with NBR Norms No. 2/21 February 2003. The said Norms govern the methodology for determining and reporting the average interest rates on current loans and deposits, as well as the average interest rates on new loans and deposits. Data are released by Romanian credit institutions: banks, Romanian legal entities, the branches in Romania of banks, foreign legal entities, savings and loan banks for housing, and by the central bodies of credit co-operatives.

Annex 9a

The monthly reference rate, laid down by Circular No. 3/1 February 2002, is calculated as an arithmetic mean (weighted by the volume of transactions) between interest rates on deposits taken by the NBR and reverse repo operations in the month prior to that when the release was made. The annual average reference rate of the NBR is calculated as an arithmetic mean (weighted by the volume of transactions) between monthly reference rates of the NBR.

Open market operations performed by the NBR and lending and deposit facilities granted to credit institutions are stipulated in NBR Regulation No. 1/30 March 2000. Open market operations performed by the NBR (deposit-taking operations and issues of certificates of deposit) show daily averages for both transactions performed in the reference period (flow data) and their balance (stock data). The average interest rate in the reporting month is calculated as an arithmetic mean weighted by the volume of transactions for interest rates on flow/stock operations.

Annex 9b

Standing facilities (lending and deposit facilities) granted by the National Bank of Romania to credit institutions are resorted to by credit institutions, on their initiative.

The interest rate on marginal lending facility is the rate at which banks are granted overnight liquidity. **The interest rate on marginal deposit facility** is the rate at which banks may place with the NBR their liquidity surplus at the end of the business day. The interest rates on standing facilities are established by the NBR Board, in accordance with the monetary policy objectives.

Annex 9c

NBR Regulation No. 6/24 July 2002, as subsequently amended, establishes the regime of required reserves. According to the provisions of the said regulation, banks/central houses of credit co-operatives shall hold funds in RON and foreign currency in accounts opened with the NBR during the maintenance period (from the 24th of the current month to the 23rd of the following month). **Required reserve ratio** applies during the observance period (from the 24th of the previous month to the 23rd of the current month) to the average level of balance sheet liabilities of banks and the aggregate balance sheet liabilities of credit co-operative networks. **Remuneration of required reserves** represents the interest rate equal to at least the average interest rate applied by banks on demand deposits and is applicable to actual reserves.

Annex 10

Starting with December 2002, the **equity interests in international financial institutions**, as well as the **liabilities** against them have been re-classified as foreign assets and foreign liabilities respectively. **Interbank assets** cover credits to banks, bank deposits and forex deposits with banks in Romania. **Interbank liabilities** include banks' deposits in both RON and foreign currency with the central bank. **Other assets/liabilities** include items (accounts) relative to the central bank's own activity (assets – tangible fixed assets, debtors, prepaid expenses, etc.; liabilities – settlements, creditors, etc.).

Annexes 10, 12

General Account of Treasury includes receipts and payments accounts related to the government budget, local budgets, state social security budget and extrabudgetary funds with banks.

Monetary gold represents the central bank's gold holdings and is part of international reserves. The National Bank of Romania's stock of monetary gold is **valued in euro** at the price on the London Bullion Market on the last day of the month. Until the end of 2004, the stock of gold was **valued in domestic currency** at a sole domestic price, while gold inflows and outflows were valued in domestic currency at the current price. The stock of gold will be revalued at end of year only. Starting with January 2005, the stock of gold has been valued in domestic currency at market price.

Annex 11

The Central House of CREDITCOOP Credit Co-operatives was included in May 2003. The banks whose licences were revoked were included until end-November 2005, with their last reporting month, i.e. February 2002 for *Banca Română de Scont*, April 2002 for *Banca Turco-Română*, April 2003 for *Banca Columna*, by adjusting the item "Household deposits" with payments made to depositors.

Annex 12

Net foreign assets of the banking system are calculated by subtracting foreign liabilities in convertible currency from foreign assets in convertible currency (reserve assets plus equity interests in foreign banks).

Annex 13a

According to the international standard definition, **Romania's international investment position** includes a country's stock of foreign assets and liabilities at a given moment. The standard table on the international investment position comprises the stocks of foreign assets and liabilities at the beginning and at the end of the period, as well as the financial transactions, exchange rate movements, price movements on the international market, and other financial changes over the same period. Financial transactions referred to in the international investment position are included in the balance-of-payments financial account.

Annex 13b

Medium- and long-term external debt (non-guaranteed debt) includes the balance of medium- and long-term deposits of foreign banks with resident banks.

Annex 15a

Monthly volume of transactions in the interbank forex market represents the sum of the daily highs of sales and purchases. The average annual volume of forex transactions is calculated as an arithmetic mean of monthly forex transactions.

The average monthly exchange rate (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of daily exchange rates on the forex market communicated by the National Bank of Romania. **The average annual exchange rate** (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of average monthly rates.

Annex 16a

The BET (Bucharest Exchange Trading) index is the BSE's first official index launched on 22 September 1997. It reflects the overall trend in prices of the ten most liquid shares, serving as a support for risk management in the trading of derivatives, i.e. futures and options. The index is calculated as a capitalisation-weighted average of the securities that make up the index basket. Shares must be listed on the BSE's first tier and must have the largest market capitalisation (market capitalisation of companies whose shares are in the BET basket must account for more than 60 percent of total stock market capitalisation); as far as liquidity is concerned, the value of trades in the last 3/6/9 months must be higher than 70 percent of total turnover.

The Composite Index of Bucharest Stock Exchange (BET-C) represents the movements of shares traded on the Bucharest Stock Exchange. The calculation method is the same as that used for the BET index. The index basket is updated automatically by including the new entrants, at the price set on the day next to their being listed. Furthermore, the BET-C reflects the changes to the registered capital of listed companies.

Investment funds are not included in the basket of BET and BET-C indices. In order to avoid a small number of companies to weigh on the index, the share of any company in the index basket must not be higher than 20 percent.

BET-FI Index was originally computed for the five Financial Investment Companies listed and is envisaged to include all investment funds to be listed subsequently. The index was launched on 1 November 2000; its start value equalled 1,000 points as of 31 October 2000; the calculation method is the same as that used for the BET-C Index (weighted to capitalisation and updated consistent with capital increases using closing prices).

Annex 16b

RASDAQ Composite Index was launched on 31 July 1998, its start value equalling 1,000 points. Every company listed on the RASDAQ Electronic Exchange is included in the index calculation in order to capture the global trend in share prices. In terms of the calculation method, this index belongs to the set of stock market indices computed by weighting to market capitalisation. The share of a symbol in the index is no higher than 25 percent of total capitalisation of the symbols included in RASDAQ-C. **RAQ-I and RAQ-II indices** were launched concurrently with the introduction of the two upper tiers in order to reflect the overall development of the prices of top companies listed on RASDAQ's first and second tiers. The calculation method is the same as that used for RASDAQ-C. They were launched on 28 October 2002 and their start value equalled 1,079.216 points.

Annexes 18a, 18b

Starting 1 January 2003, the methodology of loan classification and establishment of specific risk provisions was changed by Regulation No. 5/2002, as amended by Regulations Nos. 7/2002 and 8/2005. Regulation No. 8/2005 specifies the financial performance of debtors – natural entities, which shall be rated from A to E, according to the criteria set by credit institutions via internal regulations (depending on income characteristics: certainty, currency denomination, amount after payment of other financial obligations, etc.).

Annexes 19a, 19b, 19c, 19d

The credit risk information encompasses identification data on a debtor – non-bank, legal or natural entity – and on the following RON- and foreign exchange-denominated operations whereby credit institutions face credit risk exposure to the respective debtor: (a) loans and (b) commitments assumed by the credit institution on behalf of the debtor.

The risk information refers to the exposure of each credit institution in the Romanian banking system to a single debtor, which may be equal to or higher than RON 20,000. Starting with August 2004, following the entry into force of Regulation No. 4/2004 on the organisation and operation of Credit Information Bureau with the National Bank of Romania, the former has also been receiving reports on loans overdue for more than 30 days in respect of individuals whose exposure is less than RON 20,000. CREDITCOOP Central House and RAIFFEISEN BANCA PENTRU LOCUINTE also submit reports to the Credit Information Bureau starting with September 2003 and June 2006 respectively.

The loan maturity is consistent with Law No. 58/1998 –The Banking Act, as amended and supplemented subsequently; **type of ownership of borrower** is consistent with Order No. 1214/18.07.2006 issued by the Minister of Public Finance (Types of Ownership Nomenclature); this classification meets the analysis requirements of the National Bank of Romania; **type of loans granted to non-bank, legal and natural entities (by risk)** is consistent with the Chart of Accounts for Banks and the norms for its implementation (1997), as amended and supplemented subsequently; **currency denomination of loans** is consistent with applicable regulations worldwide; the classification meets the analysis requirements of the National Bank of Romania; **activity of borrower** is consistent with Order No. 601/2002, issued by the president of the National Institute of Statistics, on updating CANE; the classification meets the analysis requirements of the National Bank of Romania.
