# SUMMARY OF MAIN ECONOMIC DEVELOPMENTS AND MONETARY POLICY IN MARCH 2005

## Real Economy

March industrial output rose 13.6 percent compared to the previous month, coming in line with expectations. Nevertheless, the annual growth rate of the economy for the first quarter of 2005 slowed by 2.5 percentage points to 5.3 percent versus the final quarter of 2004, mostly as a result of weaker external demand.

Developments in industry and the resumption of seasonal activities in the tertiary sector and construction led to the further downtrend in unemployment rate, which was 6 percent, 0.2 percentage points below the average for the last three quarters during which this indicator had shown atypical stability. As the number of the unemployed saw little change in 2005 Q1 and the respondents polled by the NIS indicated relative stability of the number of employees in industry and services sectors during this period (except retail trade for which they envisaged a slight increase), the increase in staff numbers economy-wide, up 137 thousand in March 2005 compared to December 2004 (twice larger than a year earlier), could be accounted for by some labour contracts becoming formal after the fiscal easing.

Consumer demand still put pressures in spite of the deceleration of annual growth rate of whole-economy net average wage (11.3 percent compared to a peak of 15.1 percent in January). Whole-economy net average wage exceeded once again ROL 7 million (up 4.9 percent in real terms versus February) because of the following: (i) bonuses and financial inducements; (ii) 2004 tax refunds as a result of overpayments; (iii) larger output in some sectors; (iv) wage bargaining.

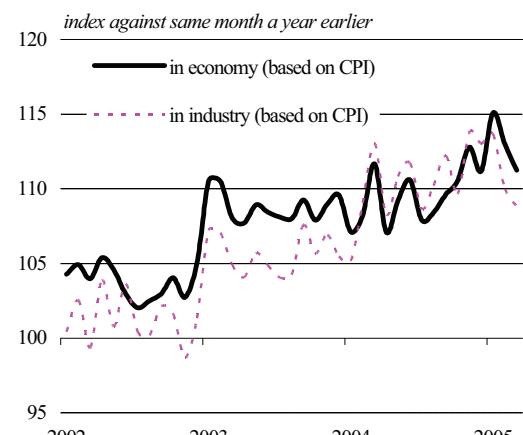

Even though the annual growth of trade sector slowed over February, with the 12-month rate of increase of retail trade (except of motor vehicles) decelerating to 17.8 percent, consumption of goods and services remained sturdy, fostered by larger household incomes and readily available borrowings.

### Macroeconomic Indicators

	percentage change	
	Mar.'05/ Mar.'04	3 mths '05 / 3 mths '04
1. Industrial output	4.0	5.3
2. Foreign trade		
2.1. Exports	18.9	17.4

### Net Real Wage

*Source: NIS, NBR calculations*

Source: NIS, NBR

Source: NIS, NBR calculations

Trade deficit (fob/fob) widened further during the period under review (up 38 percent versus February), although its annual growth rates slacked off (about 40 percentage points from the previous month to 48.1 percent), owing mainly to the decelerating imports of intermediate goods (by 10 percentage points to a 15.2 percent annual increase). The faster annual growth rate of exports (around 9 percentage points against February to 18.9 percent) was due widely to the favourable developments on world markets.

In line with expectations, the downward drift in annual growth of industrial producer prices for the domestic market carried on into March, touching 13.6 percent (12.9 percent in the manufacturing sector), chiefly on account of favourable developments of raw material costs in some sub-sectors. Developments in a couple of sectors (chemicals and metallurgy) appear to indicate the producers' propensity to adjust profit margins in order to consolidate their market shares. The rise in industrial producer prices for the domestic market looks set to accelerate in the period ahead as a result of direct and/or ripple effects of administered price adjustment and higher excise duties levied on fuels.

The 12-month CPI decreased to 8.7 percent in the month under consideration owing solely to the slackening of the growth rate of market prices (0.3 percentage points to 7.9 percent), administered price adjustment (water, sewerage, refuse collection, city transport) entailing a 11.5 percent

annual change for this category of prices.

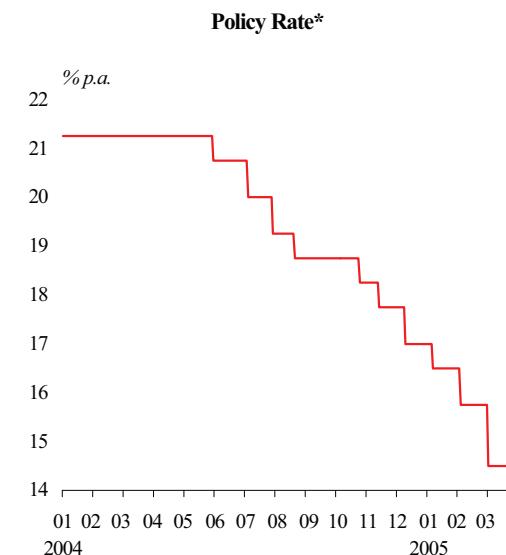

## Monetary Policy

March 2005 saw yet another cut in policy rate amid strengthening disinflation and the approaching liberalisation of non-residents' access to ROL-denominated deposits with local banks. Policy rate was lowered by 1.25 percentage points from February, pushing the ceiling of interest rate accepted on the NBR's one-month deposit-taking operations down to 14.5 percent. The actual interest rate on the central bank's deposit-taking operations witnessed a sharper fall, i.e. 2.3 percentage points, following the adoption of the new operational framework by the NBR a month earlier in order to deter speculative capital inflows.

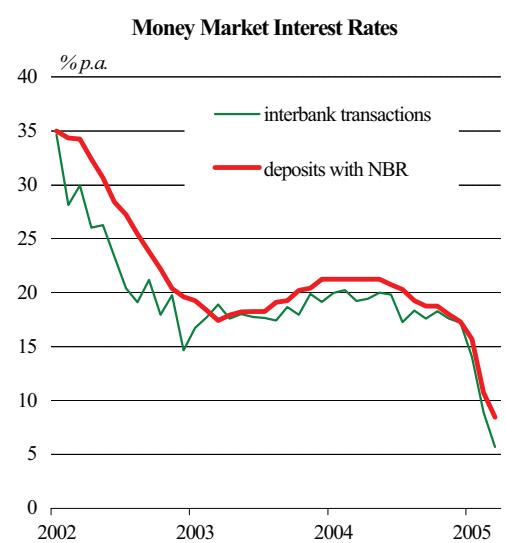

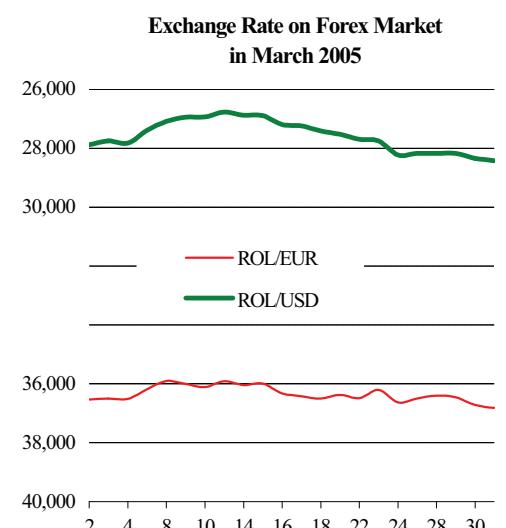

Monetary conditions eased compared with the previous months, the policy rate cut being also accompanied by a slowdown in the appreciation of the ROL against the EUR. The slacker pace of ROL appreciation in nominal terms versus the EUR was largely driven by the relative compression in oversupply of foreign currency in the interbank market, which was also attributed to some foreign investors' shifting to other financial markets. The effect of this change in focus was heightened by the central bank's intervention in the foreign exchange market, which was chiefly aimed at maintaining, as from March, a relatively steady level of foreign exchange reserves (in terms of import months).

The same as in the preceding months, the average balance of the monetary authority's sterilisation operations kept expanding, exceeding that of banks' holdings on current accounts with the central bank more than three times; banks resorted heavily to the deposit facility, thereby contributing to the mopping-up of liquidity surplus. As a result, the decline in interbank rates outpaced that recorded by the yields on the central bank's open market instruments, with interbank average rates (5.7 percent) nearing the interest rate on the deposit facility.

Interest rates applied by banks to non-bank clients fell further, albeit at a more sluggish pace compared to that seen a month earlier. However, the average interest rate on new medium-term loans extended to individuals posted the fastest contraction in 21 months, i.e. 2.5 percentage points.

\* maximum interest rate on one-month sterilisation operations

## **LEGISLATIVE INDEX**

### **Main Rules and Regulations Adopted in the Economic, Financial, and Banking Areas in March 2005**

---

**Order No. 246/4** March 2005 issued by the minister of public finance approves the Methodological norms on the use and filling in of the payment order for the State Treasury (*Monitorul Oficial al României* No. 206/10 March 2005).

**Law No. 48/17** March 2005 approves Government Emergency Ordinance No. 111/2003 on the use of proceeds from privatisation and realisation of banks' non-performing assets. The proceeds that the Authority for State Assets Recovery collected from the realisation of banks' non-performing assets, after the deduction of outlays envisaged by the institution's budget and made in accordance with the legal provisions in force, shall be used for the redemption of government securities to lower domestic public debt (*Monitorul Oficial al României* No. 239/22 March 2005).

**Order No. 51/21** March 2005 issued by the President of the Competition Council approves the enforcement of Instructions regarding the interest rate applied in the case of recovery or repayment of unlawful or prohibited grant-in-aid. When the reference rate of the National Bank of Romania increases or decreases by more than 5 percentage points as compared to the established interest rate, the interest rate applied in the case of recovery and repayment of unlawful or prohibited grant-in-aid shall be changed accordingly (*Monitorul Oficial al României* No. 253/25 March 2005).

**Government Decision No. 184/9** March 2005 approves the Strategy for fostering privatisation and investment for companies in the portfolio of the Ministry of Economy and Commerce for 2005, as well as other measures for its implementation (*Monitorul Oficial al României* No. 255/28 March 2005).

**Government Emergency Ordinance No. 24/24** March 2005 amends and supplements Law No. 571/2003 on the Tax Code (*Monitorul Oficial al României* No. 263/30 March 2005).

**Law No. 70/31** March 2005 approves Government Ordinance No. 95/2004 on settling some financial matters. The Government Ordinance approves the increase in public spending and public deficit for 2004 by ROL 930.6 billion, and in the budgetary reserve fund available to the Government by ROL 970.6 billion (*Monitorul Oficial al României* No. 283/5 April 2005).

## **Main Regulations Issued by the National Bank of Romania in March 2005**

**Circular No. 8/1** March 2005 sets at 10.75 percent per annum the reference rate of the National Bank of Romania for March 2005 (*Monitorul Oficial al României* No. 195/8 March 2005).

**Circular No. 9/1** March 2005 amends Regulation No. 1/2004 issued by the National Bank of Romania on performing foreign currency operations, as subsequently supplemented (*Monitorul Oficial al României* No. 195/8 March 2005).

**Norms No. 2/2** March 2005 refer to cash operations performed between credit institutions and the State Treasury on the one hand and the National Bank of Romania on the other, as well as the settlement of such operations. The norms set the principles and the manner of carrying out cash operations in ROL by credit institutions and the State Treasury in relation to the National Bank of Romania (*Monitorul Oficial al României* No. 290/6 April 2005).

## METHODOLOGICAL NOTES

**Annex 1** | Monthly data on the main social and economic indicators (data released by the National Institute of Statistics in the Monthly Statistical Bulletin) are preliminary and may be revised subsequently; the final update is made on a yearly basis, based on company surveys and on specific yearly surveys conducted by the National Institute of Statistics. Starting 2004, the base year for computing the industrial production index has been 2000. Starting January 2005, the sample underlying the survey used for measuring wages and the number of employees was subject to alteration. Data series are updated permanently after being released by the National Institute of Statistics.

**Annex 2** | For 2005, consumer price indices are calculated on the basis of 2003 average prices and weights based on average expenses in Household Survey.

**Annex 6** | **BUBID** – interest rate on deposits taken by banks, **BUBOR** – interest rate on deposits made by banks.

**Annexes 7, 8** | Starting May 2003, **interest rates applied by banks** have been calculated in compliance with NBR Norms No. 2/21 February 2003. The said Norms govern the methodology for determining and reporting the average interest rates on current loans and deposits, as well as the average interest rates on new loans and deposits. Data are released by Romanian credit institutions: banks, Romanian legal entities, the branches of banks – foreign legal entities – operating in Romania, and by the central bodies of credit co-operatives.

**Annexes 9a, 10** | **The monthly reference rate**, laid down by Circular No. 3/1 February 2002, is calculated as an arithmetic mean (weighted by the volume of transactions), between interest rates on deposits taken by the NBR and reverse repo operations in the month prior to that when the release was made. The annual average reference rate of the NBR is calculated as an arithmetic mean (weighted by the volume of transactions), between monthly reference rates of the NBR.

**Open market operations performed by the NBR and lending and deposit facilities granted to banks** are

stipulated in NBR Regulation No. 1/30 March 2000. Open market operations performed by the NBR (deposit-taking operations and issues of certificates of deposit) show daily averages of both transactions performed in the reference period (flow data) and their end-of-period balance (stock data). The average interest rate in the reporting month is calculated as an arithmetic mean weighted by the volume of transactions for interest rates on flow/stock operations.

**Annex 9b** | **Standing facilities (lending and deposit facilities) granted by the NBR to banks** are resorted to by banks, on their initiative, in order to cover their temporary liquidity requirements.

**The interest rate on marginal lending facility** is the rate at which banks are granted overnight liquidity.

**The interest rate on marginal deposit facility** is the rate at which banks may place with the NBR their liquidity surplus at the end of the business day. The interest rates on standing facilities are established by the NBR Board, in accordance with the monetary policy objectives.

**Annex 9c** | NBR Regulation No. 6/24 July 2002 establishes the regime of required reserves. According to the provisions of the said regulation, banks/central bodies of credit co-operatives shall hold funds in ROL and foreign currency in accounts opened with the NBR during the maintenance period (from the 24th of the current month to the 23rd of the following month). **Required reserve ratio** applies during the observance period (from the 24th of the previous month to the 23rd of the current month) to the average level of balance sheet liabilities of banks (countrywide) and the aggregate balance sheet liabilities of credit co-operative networks. **Remuneration of required reserves** represents the interest rate equal to at least the average interest rate applied by banks on demand deposits and is applicable to the actual reserves.

Starting December 2002, the **equity interests in international bodies**, as well as the **liabilities** against them have been re-classified as foreign assets and foreign liabilities respectively.

**Interbank assets** cover credits to banks, State Treasury's investments with banks and forex deposits with banks in Romania. **Interbank liabilities** include banks' deposits in both ROL and foreign currency with the central bank. **Other assets/liabilities** include items (accounts) relative to the central bank's own activity (assets – tangible fixed assets, debtors, prepaid expenses, etc.; liabilities – settlements, creditors, etc.).

**Annexes 10, 12** **General Account of Treasury** includes receipts and payments accounts related to the government budget, local budgets, state social security budget and extrabudgetary funds with banks.

**Annexes 10, 12, 14** **Monetary gold** represents the central bank's gold holdings and it is part of international reserves. The National Bank of Romania's stock of monetary gold is **valued in euro** at the price on the London Bullion Market on the last day of the month. Until the end of 2004, the stock of gold was **valued in ROL** at a sole domestic price, while gold inflows and outflows were valued in ROL at the current price. The stock of gold will be revalued at end of year only. Starting January 2005, the stock of gold has been valued in ROL at market price.

**Annex 11** The banks whose licences were revoked are included with their last reporting month, i.e. February 2002 for *Banca Româna de Scont*, March 2002 for *Banca de Investitii si Dezvoltare*, April 2002 for *Banca Turco-Româna*, April 2003 for *Banca Columna*, by adjusting the item "Household deposits" with payments made to depositors. The Central Body of Credit Co-operatives CREDITCOOP was included in May 2003.

**Annex 12** **Net foreign assets** of banks are calculated by subtracting foreign liabilities in convertible currency from foreign assets in convertible currency (reserve assets plus equity interests in foreign banks).

**Annex 13a** According to the international standard definition, **Romania's international investment position** includes a country's stock of foreign assets and liabilities at a given moment. The standard table on the international investment position comprises the stocks of foreign assets and liabilities at the beginning and at the end of the period as well as the financial transactions, exchange rate movements, price movements on the international market and other financial changes that occurred over the same period. Financial transactions referred

to in the international investment position are included in the balance-of-payments financial account.

**Annex 13b** **Medium- and long term external debt** (private debt, non-guaranteed debt) includes the balance of medium- and long-term deposits of foreign banks with resident banks.

**Annex 15a** **Monthly volume of transactions in the interbank forex market** represents the sum of the daily highs of sales and purchases. Average annual volume of forex transactions is calculated as an arithmetic mean of monthly forex transactions. **The average monthly exchange rate** (ROL/EUR and ROL/USD) is calculated as a simple arithmetic mean of daily exchange rates on the forex market communicated by the National Bank of Romania. **The average annual exchange rate** (ROL/EUR and ROL/USD) is calculated as a simple arithmetic mean of average monthly rates.

**Annex 16a** **The BET (Bucharest Exchange Trading) index** is the BSE's first official index launched on 22 September 1997. It reflects the overall trend in prices of the ten most liquid shares, serving as a support for risk management in the trading of derivatives, i.e. futures and options. The index is calculated as a capitalisation-weighted average of the securities that make up the index portfolio. Shares must be listed on the BSE's first tier and must have the largest market capitalisation (market capitalisation of companies whose shares are in the BET basket must account for more than 60 percent of total stock market capitalisation); as far as liquidity is concerned, the value of trades in the last 3/6/9 months must be higher than 70 percent of total turnover.

**The Composite Index of Bucharest Stock Exchange (BET-C)** represents the movements of shares traded on the Bucharest Stock Exchange. The calculation method is the same as that used for the BET index. The index basket is updated automatically by including the new companies, at the price set on the day next to their being listed. Furthermore, the BET-C reflects the changes to the registered capital of listed companies. Investment funds are not included in the basket of BET and BET-C indices. In order to avoid a small number of companies to weigh on the index, the share of any company in the index basket must not be higher than 20 percent.

**BET-FI Index** was originally computed for the five Financial Investment Companies listed and is envisaged to

include all investment funds to be listed subsequently. The index was launched on 1 November 2000; its start value equalled 1,000 points as of 31 October 2000; the calculation method is the same as that used for the BET-C Index (weighted to capitalisation and updated consistent with capital increases using closing prices).

**Annex 16b** | **RASDAQ Composite Index** was launched on 31 July 1998, its start value equalling 1,000 points. Every company listed on the RASDAQ Electronic Stock Exchange is included in the index calculation in order to capture the global trend in share prices. In terms of the calculation method, this index belongs to the set of stock market indices computed by weighting for market capitalisation. The share of a symbol in the index is no higher than 25 percent of total capitalisation of the symbols included in RASDAQ-C. **RAQ-I and RAQ-II indices** were launched concurrently with the introduction of the two upper tiers in order to reflect the overall development of the prices of top companies listed on RASDAQ's first and second tiers. The calculation method is the same as that used for RASDAQ-C. They were launched on 28 October 2002 and their start value equalled 1,079.216 points.

**Annexes 18a, 18b** | Starting 1 January 2003, the **methodology of loan classification and establishment of specific risk provisions** was changed by Regulation No. 5/2002, as amended by Regulation No. 7/2002. The new regulation introduces among others a new loan classification criterion, i.e. the debtor's financial performance that adversely affects the indicators defining asset quality and capital adequacy.

**Annexes 19a, 19b, 19c, 19d** | **The credit risk information** encompasses identification data on a debtor – non-bank,

legal or natural entity – and on the following ROL- and foreign-exchange-denominated operations whereby credit institutions face credit risk exposure to the respective debtor: (a) loans and (b) commitments assumed by the credit institution on behalf of the debtor. The risk information refers to the exposure of each credit institution in the Romanian banking system to a single debtor, which may be equal to or higher than ROL 200 million. Starting August 2004, following the entry into force of Regulation No. 4/2004 on organisation and operation of Credit Risk Bureau with the National Bank of Romania, the former has also been receiving reports on loans overdue for more than 30 days in respect of individuals whose exposure is less than ROL 200 million.

Starting September 2003, CREDITCOOP – Central Body has also submitted reports to the Credit Information Bureau.

**The loan maturity** is consistent with Law No. 58/1998 – Banking Act, as amended and supplemented subsequently; **type of ownership of borrower** consistent with Methodological Norms No. 370542/1999 issued by the Ministry of Finance (Types of Ownership Nomenclature); this classification meets the analysis requirements of the National Bank of Romania; **type of loans granted to non-bank, legal and natural entities (by risk)** consistent with the Chart of Accounts for Banks and the norms for its implementation (1997), as amended and supplemented subsequently; **currency-denomination of loans** consistent with applicable regulations worldwide; the classification meets the analysis requirements of the National Bank of Romania; **activity of borrower** according to Order No. 601/2002, issued by the president of the National Institute of Statistics, on updating CANE; the classification meets the analysis requirements of the National Bank of Romania.
