SUMMARY OF MAIN ECONOMIC DEVELOPMENTS AND MONETARY POLICY IN APRIL 2005

Real Economy

In 2005 Q1, real GDP rose 5.9 percent compared with the same year-earlier period. The annual growth rate of GDP was 3.8 percentage points lower than the previous quarter's reading because of the marked increase in the negative contribution of net external demand.

Both segments of domestic demand upheld the growth in GDP, yet the rate of increase in investment, albeit faster than in 2004 Q4 (5.2 percent compared with 2.7 percent) fell short of its 5-year average¹. Household actual final consumption further advanced at a brisk pace (12.5 percent) amid the increase in household incomes following the introduction of the flat tax rate, the raise in whole-economy gross minimum wage, and wage bargaining in the private sector. Stronger purchasing power was reflected by the twofold increase in the contribution of purchases of goods and services to final private consumption (12.1 percentage points). By contrast, "self-consumption and purchases on the agri-food market" and "provision of services by private and public administration" saw their contributions contracting noticeably (to merely 0.2 percentage points each) after overcoming the consumption 'peaks' associated with the bumper grain harvest and the run-up to the election in 2004. Oddly enough, considering the post-election period, the annual growth rate of public administration actual final consumption stepped up to 5.8 percent from 3.6 percent in 2004 Q4, due largely to bigger payrolls in the administrative sector.

Annual growth rate of gross fixed capital formation accelerated by 2.5 percentage points. This development was driven by retooling (including purchases of transport means), while the increase in the volume of new construction works slowed further.

The negative gap between annual growth rates of imports and exports of goods and services widened eight times as against the previous quarter, pushing the negative contribution to GDP growth of net external demand sharply higher (-6 percentage points). With the annual rate of increase of exports remaining unchanged at 8.8 percent, the abovementioned dismal

Calculations based on data supplied by NIS and NBR

¹ Approximately 8 percent

performance was attributed to the faster growth rate of imports in real terms (which added 8.4 percentage points to 18.4 percent) amid the rather low capacity of domestic supply to meet demand² and the sharp strengthening of the domestic currency against the euro.

Industrial output dropped by 4.5 percent month on month in line with expectations, with mining and energy sectors bearing the brunt of the decline. Nevertheless, statistical evidence shows that annual growth rate accelerated by 3.8 percentage points to as much as 7.8 percent, being propelled by both domestic and external demand.

The downswing in industrial activity brought staff cuts in its tail, which were however offset economy-wide by the jobs created in construction and other seasonal activities. Under the circumstances, registered unemployment rate dropped 0.3 percentage points month on month to 5.7 percent. Nevertheless, the effects of fiscal easing on the formalisation of employment contracts in the informal economy appear to be wearing off, as illustrated by the April rise in the number of employees across the economy (15.3 thousand), far below the monthly increases seen in 2005 Q1.

Consumer demand stepped up, given the higher-than-expected rise in average net wage economy-wide in the considered month to roughly ROL 7.4 million (up 5 percent in nominal terms against March), mainly on the back of: (i) bonuses and incentive pays granted on the occasion of Easter holidays, including in the industries facing profitability-related problems, such as the mining and energy sectors and (ii) profit-sharing in some private services companies. The said developments were mirrored by the thriving activity in retail trade (except for motor vehicles), with sales growing at a faster tempo than in both the previous month and the same period of last year, by 0.8 percentage points and 5.2 percentage points respectively.

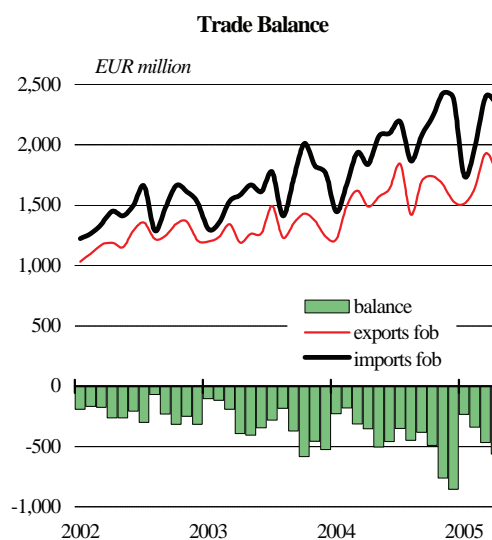

Even though in April the annual growth rate of exports accelerated slightly from March, up 1.4 percentage points to 20.4 percent, the development could not offset the widening of the trade deficit whose rate of increase added 10.8 percentage points to 59.6 percent.

Consistent with expectations, the index of producer prices for the domestic market reverted to an upward trend, with its annual rate of increase speeding up to 14.7 percent against the background of adjustments to administered prices. The effect of

² Home sales posted slower growth rates for most groups of products (except capital goods, thanks to good performance of transport means).

this increase fed through into prices in manufacturing only to a small extent (their annual growth rate stood 0.3 percentage points higher), possibly owing to stiffer competition and the negotiations of utilities contracts prior to the considered period.

April saw a temporary halt in disinflation, the annual growth rate of consumer prices jumping from 8.7 percent in March to 10 percent. The drivers of this development were the adjustments to administered prices and the implementation of a new stage of the schedule of bringing domestic excise duties in line with those in the EU. As far as regulated prices are concerned, the most significant adjustments were detected for natural gas price, which went up 26.9 percent month over month, amid the alignment to the import price and the introduction of a new billing system. Changes to the excise duties regime weighed heavily on the prices of tobacco and fuels which picked up 5.6 percent and 4.2 percent respectively; in the latter case, the increase may also reflect the higher oil price on the world's markets.

Money Market Interest Rates

On 7 April 2005, the National Bank of Romania decided to cut the policy rate by 2 percentage points³ to 12.5 percent. The decision was grounded on two main reasons, namely stronger support of ROL exchange rate movements to disinflation and the approaching liberalisation of non-residents' access to ROL-denominated time deposits with local banks⁴. In view of the recent decline in money market rates, the central bank lowered the interest rates on its standing facilities; thus, the rate on the deposit facility was reduced to 4 percent, from the previous 5 percent, and the rate on the marginal lending facility was cut from 25 percent to 20 percent.

Nevertheless, the decline in the average actual interest rate on deposit-taking operations slowed sharply⁵, putting a brake on the easing trend of monetary conditions. To this development also contributed the stronger appreciation in real terms of the domestic currency versus the euro, which occurred amid the relative stabilisation of the nominal exchange rate of the ROL, induced largely by the expectations of most foreign market participants. The latest stage of capital account liberalisation was implemented successfully without adverse effects on either the relatively smooth trajectory of the ROL/EUR rate.

Interbank money market rates and the actual interest rates on deposits taken by the National Bank of Romania posted divergent developments. The former interest rates became increasingly volatile particularly towards the end of the maintenance period when the marginal lending facility was resorted to, for the first time in almost two and a half years. The short-lived rise in demand for near-term funding and the subsequent halt in the downtrend of the actual interest rates on NBR deposit-taking operations pushed short-term interest rates higher; as a result, average interest rate on interbank deposits picked up slightly against the preceding month.

Interest rates attached to some newly-issued government bonds with maturities of 3 and 5 years grew as well. A novelty saw the primary market for government securities, i.e. the start of launching Treasury notes with maturities of 7, 10, 12 and 15 years.

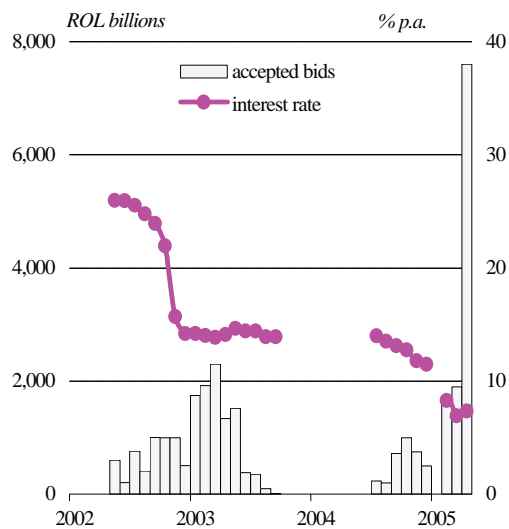

³ The heftiest cut in 11 months

⁴ On 11 April 2005

⁵ Its level was merely 0.5 percentage points below the March figure.

By contrast, most of the interest rates applied by banks to non-bank clients were headed downwards, at a quicker rate than that recorded a month earlier. The average interest rate on new time deposits fell 2 percentage points and the average interest rate on new loans contracted 0.9 percentage points.

Government Bond Issues

LEGISLATIVE INDEX

Main Rules and Regulations Adopted in the Economic, Financial, and Banking Areas in April 2005

Order No. 384/1 April 2005 issued by the minister of public finance governs the interest rates applied by the State Treasury to time deposits. Starting with 6 April 2005, the interest rate on Treasury certificates that were changed into time deposits with the State Treasury is set at 10 percent per annum (*Monitorul Oficial al României* No. 285/5 April 2005).

Law No. 79/7 April 2005 approves Government Ordinance No. 4/2005 on the approval of Romania's public indebtedness ceiling for 2005 (*Monitorul Oficial al României* No. 309/13 April 2005).

Order No. 3104/13 April 2005 issued by the president of the Insurance Supervisory Commission approves the Norms on the establishment, management and use of the guarantee fund (*Monitorul Oficial al României* No. 321/15 April 2005).

Government Decision No. 316/14 April 2005 approves the statistical research programme for 2005 drafted by the National Institute of Statistics (*Monitorul Oficial al României* No. 383/6 May 2005).

Order No. 467/14 April 2005 issued by the minister of public finance approves the Guidelines on the establishment and submission of public institutions' financial statements in 2005. Starting with the financial statements for 2005 Q1, public institutions shall revalue monetary items expressed in foreign exchange (deposits and similar items, claims, debts) at the exchange rate announced by the National Bank of Romania, valid for the last reporting day. The deadline for submission of financial statements related to 2005 Q1 is 16 May 2005 (*Monitorul Oficial al României* No. 351/26 April 2005).

Order No. 102 094/34/15/7 April 2005 issued by the minister of economy and commerce and the president of the National Agency for Mineral Resources approves the reference price of natural gas extracted in Romania starting 2005 Q2. As from April 2005, the reference price of natural gas extracted in Romania is ROL 3,640, 233/1000 Nm³ (*Monitorul Oficial al României* No. 340/21 April 2005).

Order No. 507/20 April 2005 issued by the minister of public finance approves Central Tax Commission's Decision No. 1 of 18 March 2005 on the approval of solutions relative to the unitary enforcement of provisions on excise duties, VAT and tax procedure-related issues (*Monitorul Oficial al României* No. 360/27 April 2005).

Main Regulations Issued by the National Bank of Romania in April 2005

Norm No. 8/1 April 2005 extends the period of enforcement of provisions under Art. 8 para. (1) of Norm No. 4/2004 on the statistical reporting of data underlying Romania's balance of payments from 3 months to 6 months (*Monitorul Oficial al României* No. 288/6 April 2005).

Norm No. 9/1 April 2005 on the special settlement regime. The provisions of the Norm apply to credit institutions authorised by the National Bank of Romania and govern payments and collections of credit institutions under the special settlement regime in relation to the other credit institutions and the State Treasury (*Monitorul Oficial al României* No. 288/6 April 2005).

Circular No. 10/1 April 2005 sets the NBR policy rate at 8.45 percent per annum starting April 2005 (*Monitorul Oficial al României* No. 288/6 April 2005).

Circular No. 11/1 April 2005 repeals National Bank of Romania Circular No. 9/2001 on funds transfers executed by the National Bank of Romania and the National Company for Funds Transfer and Settlement TransFonD joint-stock company, as the National Bank of Romania's agent, as subsequently amended (*Monitorul Oficial al României* No. 288/6 April 2005).

Regulation No. 4/1 April 2005 on the foreign exchange regime. The Regulation refers to foreign currency operations performed between residents and non-residents; foreign currency operations between residents; the regime applicable to non-residents; the regime applicable to residents (*Monitorul Oficial al României* No. 297/8 April 2005).

Norm No. 3/1 April 2005 on the operation of interbank foreign exchange market. In accordance with the Norm, the interbank foreign exchange market is the market where foreign exchange transactions are performed by intermediaries as well as by the National Bank of Romania (*Monitorul Oficial al României* No. 297/8 April 2005).

Norm No. 4/1 April 2005 on performing exchange transactions. The Norm establishes the categories of entities that may be authorised to perform exchange transactions; the location where exchange transactions may be performed; the exchange transactions that may be performed by the specified entities; authorisation and assignment of statistical codes; operating conditions for the specified entities (*Monitorul Oficial al României* No. 297/8 April 2005).

Norm No. 5/1 April 2005 on authorising foreign currency operations. The Norm lays down the categories of operations subject to authorisation; the operations in securities normally dealt in on the money market; operations in current and deposit accounts in foreign currency and domestic currency opened abroad by residents with credit institutions and other like institutions (*Monitorul Oficial al României* No. 297/8 April 2005).

Norm No. 6/1 April 2005 on physical import and export of cash payment instruments. The Norm lays down the cash payment instruments and the manner in which natural and legal entities may bring into or take out of Romania cash payment instruments in foreign currency and domestic currency (*Monitorul Oficial al României* No. 297/8 April 2005).

Norm No. 7/1 April 2005 on the protective measures that may be taken following liberalisation of operations in deposit accounts in domestic currency (*Monitorul Oficial al României* No. 297/8 April 2005).

Circular No. 12/5 April 2005 on putting into circulation, for numismatic purposes, of a silver coin with face value of ROL 500 occasioned by the 125th anniversary of the National Bank of Romania (*Monitorul Oficial al României* No. 326/18 April 2005).

Order No. 1/231/6/7 April 2005 issued by the governor of the National Bank of Romania and the president of the National Agency for Consumer Protection approves the Norms for enforcing Law No. 289/2004 on the legal regime of consumer credit contracts for natural entities (*Monitorul Oficial al României* No. 326/18 April 2005).

Circular No. 13/11 April 2005 modifies the interest rates on required reserves in domestic currency and in euro, and the penalty rate on deficit reserves in domestic currency. Starting with the 24 April-23 May 2005 maintenance period, the interest rate on required reserves in domestic currency is set at 2 percent per annum; the interest rate on required reserves in euro is set at 0.70 percent per annum; the penalty rate on deficit reserves in domestic currency is set at 30 percent per annum (*Monitorul Oficial al României* No. 321/15 April 2005).

Circular No. 14/21 April 2005 on putting into circulation of RON banknotes and coins, year of issue 2005 (*Monitorul Oficial al României* No. 384/6 May 2005).

METHODOLOGICAL NOTES

Annex 1 | Monthly data on the main social and economic indicators (data released by the National Institute of Statistics in the Monthly Statistical Bulletin) are preliminary and may be revised subsequently; the final update is made on a yearly basis, based on company surveys and on specific yearly surveys conducted by the National Institute of Statistics. Starting 2004, the base year for computing the industrial production index has been 2000. Starting January 2005, the sample underlying the survey used for measuring wages and the number of employees was subject to alteration. Data series are updated permanently after being released by the National Institute of Statistics.

Annex 2 | For 2005, consumer price indices are calculated on the basis of 2003 average prices and weights based on average expenses in Household Survey.

Annex 6 | **BUBID** – interest rate on deposits taken by banks, **BUBOR** – interest rate on deposits made by banks.

Annexes 7, 8 | Starting May 2003, **interest rates applied by banks** have been calculated in compliance with NBR Norms No. 2/21 February 2003. The said Norms govern the methodology for determining and reporting the average interest rates on current loans and deposits, as well as the average interest rates on new loans and deposits. Data are released by Romanian credit institutions: banks, Romanian legal entities, the branches of banks – foreign legal entities – operating in Romania, and by the central bodies of credit co-operatives.

Annexes 9a, 10 | **The monthly reference rate**, laid down by Circular No. 3/1 February 2002, is calculated as an arithmetic mean (weighted by the volume of transactions), between interest rates on deposits taken by the NBR and reverse repo operations in the month prior to that when the release was made. The annual average reference rate of the NBR is calculated as an arithmetic mean (weighted by the volume of transactions), between monthly reference rates of the NBR.

Open market operations performed by the NBR and lending and deposit facilities granted to banks are

stipulated in NBR Regulation No. 1/30 March 2000. Open market operations performed by the NBR (deposit-taking operations and issues of certificates of deposit) show daily averages of both transactions performed in the reference period (flow data) and their end-of-period balance (stock data). The average interest rate in the reporting month is calculated as an arithmetic mean weighted by the volume of transactions for interest rates on flow/stock operations.

Annex 9b | **Standing facilities (lending and deposit facilities) granted by the NBR to banks** are resorted to by banks, on their initiative, in order to cover their temporary liquidity requirements.

The interest rate on marginal lending facility is the rate at which banks are granted overnight liquidity.

The interest rate on marginal deposit facility is the rate at which banks may place with the NBR their liquidity surplus at the end of the business day. The interest rates on standing facilities are established by the NBR Board, in accordance with the monetary policy objectives.

Annex 9c | NBR Regulation No. 6/24 July 2002 establishes the regime of required reserves. According to the provisions of the said regulation, banks/central bodies of credit co-operatives shall hold funds in ROL and foreign currency in accounts opened with the NBR during the maintenance period (from the 24th of the current month to the 23rd of the following month). **Required reserve ratio** applies during the observance period (from the 24th of the previous month to the 23rd of the current month) to the average level of balance sheet liabilities of banks (countrywide) and the aggregate balance sheet liabilities of credit co-operative networks. **Remuneration of required reserves** represents the interest rate equal to at least the average interest rate applied by banks on demand deposits and is applicable to the actual reserves.

Starting December 2002, the **equity interests in international bodies**, as well as the **liabilities** against them have been re-classified as foreign assets and foreign liabilities respectively.

Interbank assets cover credits to banks, State Treasury's investments with banks and forex deposits with banks in Romania. **Interbank liabilities** include banks' deposits in both ROL and foreign currency with the central bank. **Other assets/liabilities** include items (accounts) relative to the central bank's own activity (assets – tangible fixed assets, debtors, prepaid expenses, etc.; liabilities – settlements, creditors, etc.).

Annexes 10, 12 | **General Account of Treasury** includes receipts and payments accounts related to the government budget, local budgets, state social security budget and extrabudgetary funds with banks.

Annexes 10, 12.14 | **Monetary gold** represents the central bank's gold holdings and it is part of international reserves. The National Bank of Romania's stock of monetary gold is **valued in euro** at the price on the London Bullion Market on the last day of the month. Until the end of 2004, the stock of gold was **valued in ROL** at a sole domestic price, while gold inflows and outflows were valued in ROL at the current price. The stock of gold will be revalued at end of year only. Starting January 2005, the stock of gold has been valued in ROL at market price.

Annex 11 | The Central Body of Credit Co-operatives CREDITCOOP was included in May 2003. The banks whose licences were revoked are included with their last reporting month, i.e. February 2002 for *Banca Româna de Scont*, March 2002 for *Banca de Investiții și Dezvoltare*, April 2002 for *Banca Turco-Româna*, April 2003 for *Banca Columna*, by adjusting the item "Household deposits" with payments made to depositors.

Annex 12 | **Net foreign assets** of banks are calculated by subtracting foreign liabilities in convertible currency from foreign assets in convertible currency (reserve assets plus equity interests in foreign banks).

Annex 13a | According to the international standard definition, **Romania's international investment position** includes a country's stock of foreign assets and liabilities at a given moment. The standard table on the international investment position comprises the stocks of foreign assets and liabilities at the beginning and at the end of the period as well as the financial transactions, exchange rate movements, price movements on the international market and other financial changes that occurred over the same period. Financial transactions referred

to in the international investment position are included in the balance-of-payments financial account.

Annex 13b | **Medium- and long term external debt** (private debt, non-guaranteed debt) includes the balance of medium- and long-term deposits of foreign banks with resident banks.

Annex 15a | **Monthly volume of transactions in the interbank forex market** represents the sum of the daily highs of sales and purchases. Average annual volume of forex transactions is calculated as an arithmetic mean of monthly forex transactions. **The average monthly exchange rate** (ROL/EUR and ROL/USD) is calculated as a simple arithmetic mean of daily exchange rates on the forex market communicated by the National Bank of Romania. **The average annual exchange rate** (ROL/EUR and ROL/USD) is calculated as a simple arithmetic mean of average monthly rates.

Annex 16a | **The BET (Bucharest Exchange Trading) index** is the BSE's first official index launched on 22 September 1997. It reflects the overall trend in prices of the ten most liquid shares, serving as a support for risk management in the trading of derivatives, i.e. futures and options. The index is calculated as a capitalisation-weighted average of the securities that make up the index portfolio. Shares must be listed on the BSE's first tier and must have the largest market capitalisation (market capitalisation of companies whose shares are in the BET basket must account for more than 60 percent of total stock market capitalisation); as far as liquidity is concerned, the value of trades in the last 3/6/9 months must be higher than 70 percent of total turnover.

The Composite Index of Bucharest Stock Exchange (BET-C) represents the movements of shares traded on the Bucharest Stock Exchange. The calculation method is the same as that used for the BET index. The index basket is updated automatically by including the new companies, at the price set on the day next to their being listed. Furthermore, the BET-C reflects the changes to the registered capital of listed companies. Investment funds are not included in the basket of BET and BET-C indices. In order to avoid a small number of companies to weigh on the index, the share of any company in the index basket must not be higher than 20 percent.

BET-FI Index was originally computed for the five Financial Investment Companies listed and is envisaged to

include all investment funds to be listed subsequently. The index was launched on 1 November 2000; its start value equalled 1,000 points as of 31 October 2000; the calculation method is the same as that used for the BET-C Index (weighted to capitalisation and updated consistent with capital increases using closing prices).

Annex 16b | **RASDAQ Composite Index** was launched on 31 July 1998, its start value equalling 1,000 points. Every company listed on the RASDAQ Electronic Stock Exchange is included in the index calculation in order to capture the global trend in share prices. In terms of the calculation method, this index belongs to the set of stock market indices computed by weighting for market capitalisation. The share of a symbol in the index is no higher than 25 percent of total capitalisation of the symbols included in RASDAQ-C. **RAQ-I and RAQ-II indices** were launched concurrently with the introduction of the two upper tiers in order to reflect the overall development of the prices of top companies listed on RASDAQ's first and second tiers. The calculation method is the same as that used for RASDAQ-C. They were launched on 28 October 2002 and their start value equalled 1,079.216 points.

Annexes 18a, 18b | Starting 1 January 2003, the **methodology of loan classification and establishment of specific risk provisions** was changed by Regulation No. 5/2002, as amended by Regulation No. 7/2002. The new regulation introduces among others a new loan classification criterion, i.e. the debtor's financial performance that adversely affects the indicators defining asset quality and capital adequacy.

Annexes 19a, 19b, 19c, 19d | **The credit risk information** encompasses identification data on a debtor – non-bank,

legal or natural entity – and on the following ROL- and foreign-exchange-denominated operations whereby credit institutions face credit risk exposure to the respective debtor: (a) loans and (b) commitments assumed by the credit institution on behalf of the debtor. The risk information refers to the exposure of each credit institution in the Romanian banking system to a single debtor, which may be equal to or higher than ROL 200 million. Starting August 2004, following the entry into force of Regulation No. 4/2004 on organisation and operation of Credit Risk Bureau with the National Bank of Romania, the former has also been receiving reports on loans overdue for more than 30 days in respect of individuals whose exposure is less than ROL 200 million.

Starting September 2003, CREDITCOOP – Central Body has also submitted reports to the Credit Information Bureau.

The loan maturity is consistent with Law No. 58/1998 – Banking Act, as amended and supplemented subsequently; **type of ownership of borrower** consistent with Methodological Norms No. 370542/1999 issued by the Ministry of Finance (Types of Ownership Nomenclature); this classification meets the analysis requirements of the National Bank of Romania; **type of loans granted to non-bank, legal and natural entities (by risk)** consistent with the Chart of Accounts for Banks and the norms for its implementation (1997), as amended and supplemented subsequently; **currency-denomination of loans** consistent with applicable regulations worldwide; the classification meets the analysis requirements of the National Bank of Romania; **activity of borrower** according to Order No. 601/2002, issued by the president of the National Institute of Statistics, on updating CANE; the classification meets the analysis requirements of the National Bank of Romania.
