SUMMARY OF MAIN ECONOMIC DEVELOPMENTS AND MONETARY POLICY IN OCTOBER 2005

Real Economy

In 2005 Q3, annual GDP growth rate slowed to 1.8 percent from 4.1 percent in Q2; however, the pattern of economic growth changed, with investment becoming the engine of growth against the backdrop of slackening final consumption. Thus, the annual growth rate of gross fixed capital formation accelerated to 10.5 percent despite the impact of a negative base effect; the growth rate of final consumption declined by 3.8 percentage points to 6.7 percent, due mainly to the fall in self-consumption (attributed to a base effect and the adverse weather conditions in 2005).

The negative contribution of net foreign demand to GDP growth narrowed to 4.4 percentage points from 7.2 percentage points given the relatively faster increase in exports (8.4 percent, up 5.1 percentage points over the previous quarter). The growth rate of imports (17.4 percent) remained at a level similar to that recorded in the previous two quarters of 2005, but their contribution to meeting domestic (final and intermediate) demand continued to increase amid gradual worsening of industrial sector performance.

In October, industrial output rose by 0.9 percent year on year against the backdrop of further uneven output performances recorded by the key sectors (manufacturing consolidated its positive dynamics, with output increasing by 1.4 percent, while the improvement seen in mining and energy consisted merely in a reduction of the annual negative growth rates). Although the surveys conducted by the NBR and the NIS foresee positive annual growth rates of industrial output in the period ahead as well, it is unlikely that industrial sector will report strong reinvigoration.

*) deflated by IPPI of the sector

Labour market saw no significant changes from the previous month. Thus: (i) unemployment rate crept up to 5.7 percent¹, 0.1 percentage points higher than in the previous month, on the back of increase in the number of the unemployed receiving unemployment benefits; (ii) annual growth rate of average net wage economy-wide dropped by 1.1 percentage points from September, to 13.1 percent in real terms, following the decline in real wage² in non-budgetary activities and due to a base effect (given the 2004 Q4 elections). These developments offset the 8.1 percent² increase in wages across the budgetary sector.

Against the backdrop of labour market developments, but mainly due to tighter lending requirements (following the prudential regulations³ coming into force in the final months of 2005 Q3), consumer demand continued to slow down. Thus, the growth rate of retail sales turnover decelerated further, as shown by the sales of goods and motorcars; however, the volume of sales of market services delivered to population increased slightly due mainly to the performance of “hotels and restaurants” component.

The trade deficit (fob/fob) continued to widen, reaching in October the highest level year to date (EUR -902 million), up 61.8 percent from September and 83.9 percent from the same year-earlier period. Year-on-year growth of exports declined to 10.8 percent (10.9 percentage points lower from September), given that exports of consumer goods were further hit by competition from the world market, while foreign demand for fuels weakened. Annual growth rate of imports accelerated marginally (0.7 percentage points to 26.9 percent); the relatively faster growth pace of industrial output induced a higher rate of increase in purchases under “industrial supplies” (5.3 percentage points to 21.1 percent), the most important commodity group among imports.

Disinflation stalled in October in terms of industrial producer prices for the domestic market, whose growth rate accelerated by 0.4 percentage points to 11 percent, mainly on the back of the 4 percentage point increase in the dynamics of mining sector producer prices to 26.8 percent. The annual growth rate of producer prices in manufacturing rose by only 0.2 percentage points to 9.4 percent; the deceleration recorded in some major

¹ Data series on unemployment rate was recalculated starting December 2004, taking into consideration the economically active population as of 1 January 2005.

² Against the previous month.

³ NBR Norms No. 10/27 July 2005 and No. 11/8 September 2005.

sub-sectors (light industry, chemicals, metallurgy, machinery and electrical equipment) in a range from 0.9 percentage points to 2.2 percentage points was largely offset by the 3.1 percentage point increase (to 39.8 percent) in the growth rate of producer price of crude oil processing.

The annual growth rate of consumer prices decelerated to 8.1 percent in October, due solely to the influence of administered prices, whose annual growth rate declined by 1.8 percentage points from September to 10.1 percent as a result of: (i) postponement of increase in the heating price for November 2005; (ii) the 1.4 percent drop in the price of natural gas over September; (iii) further cut in prices for medicines due to the lingering effects of the measures adopted by the Ministry of Health⁴ in the latter half of September 2005. The annual growth rate of market prices remained at 7.5 percent, as a result of mounting pressures exerted by food prices (0.4 percentage points to 5.4 percent) brought about mainly by the costlier fruit and vegetables (4.1 percent to 11.8 percent).

Monetary Policy

Policy Rate*

*) maximum interest rate on one-month sterilisation operations

NBR's Deposit-taking Operations

The National Bank of Romania left the key interest rates on hold in October. Specifically, the policy rate was kept at 7.5 percent while the interest rates on the deposit and lending facilities stood at 1 percent and 14 percent respectively.

The central bank increased slightly its open-market operations, yet it continued to mop up only part of excess liquidity by means of these instruments. In October too, the NBR resorted to fixed-rate auctions in order to take one-month deposits; however, the average daily volume of bank deposits with the central bank saw a trend reversal, surging 17.8 percent from the previous month. The average interest rate on deposit-taking operations stood at 7.5 percent, a tad lower from the September reading, as the prior month's cut in the policy rate was fully factored into this indicator in October. The average daily volume of certificates of deposit launched by the National Bank of Romania soared by 109.5 percent, on the back of the record number of CDs – worth RON 5 billion – issued at the auction organised in October. These developments notwithstanding, the average balance on the NBR's open-market operations declined marginally month on month; CDs came to account for a much larger share of total open-market operations.

Banks made further heavy resort to the deposit facility, with the average daily balance of such placements declining only slightly from the previous month. Hence, the average daily rates on the interbank money market remained close to the interest rates on overnight deposits with the National Bank of Romania; in October, the average interbank rates (1.4 percent) stood about 2 percentage points lower than in September.

The average RON/EUR rate rose at a faster pace, given the dampening effect the low money market rates had on volatile capital inflows, on the one hand, and the increase in companies' excess demand for foreign exchange, on the other. In October, the domestic currency saw its first real depreciation versus the euro over the past 18 months.

The average interest rates applied by banks to non-government non-bank clients posted a relatively faster drop. Average interest rate on new time deposits fell 1.5 percentage points, with a sharper decline recorded by interest rate on corporate deposits. Average interest rate on new loans dipped 1.3 percentage points, the average lending rate applied to individuals dropping more sharply.

The key events that left their mark on the Romanian banking system during January-September 2005 were the following: (i) the privatisation strategy of Banca Comerciala Româna was altered in May; (ii) the Romanian branch of the National Bank of Greece ceased to operate in April, following the transfer of its assets and liabilities, as well as the sale of its fixed assets to Banca Româneasca; (iii) HVB Banca pentru Locuinte, a financial institution specialised in housing, started to operate on 13 July; (iv) the privatisation strategy of Casa de Economii si Consemnatiumi was approved in July; (v) RoBank changed its name to OTP BANK ROMANIA on 18 July 2005, following the acquisition of the bank by OTP, a leading Hungary-based bank, in 2004.

At end-September 2005, thirty-nine banks were operating in Romania, of which thirty-one were majority or fully privately-owned banks, two were state-owned banks and six were branches of foreign banks. Private ownership accounted for 95.8 percent of total bank capital, compared with 95.2 percent at end-2004, while the share of foreign capital added 3.9 percentage points to 73.2 percent of total.

January through September 2005, bank capitalisation increased by 25.9 percent, up by a real 19 percent. Banks' net aggregate balance sheet assets rose 28.6 percent from year-end 2004, or 21.6 percent in real terms, to reach RON 115.5 billion at end-September 2005. The market share of credit institutions with majority private capital edged up by 1.4 percentage points to the detriment of credit institutions with state-owned capital. The share of banks with majority foreign capital grew 2.2 percentage points to 64.3 percent of total net assets. Concentration of bank assets of the top five banks remained virtually flat from end-2004, i.e. 59.4 percent as against 59.2 percent.

Behind the increase in banks' net aggregate assets stood the real 30.2 percent rise in interbank operations and the 23.9 percent growth of lending to non-banks. Operations in government securities dropped 3.9 percent over end-2004. As at end-September 2005, operations with non-banks further held the largest share in total assets, i.e. 47.3 percent, ahead of interbank operations on 38.6 percent. The weight of dealings in government securities was little changed (1.7 percent compared with 1.9 percent at the end of the previous year).

The information disclosed by the Credit Information Bureau shows that, in September 2005, banks' loans and commitments went up by a real 20.4 percent against end-2004. As for the distribution by sector, loans and commitments channelled to the service sector grew by 22.6 percent and lending to industry was unchanged in real terms from end-2004. Hence, the weight of lending to the industrial sector narrowed by 6.6 percentage points to 32 percent of total loans and commitments in the banking system and that of lending to the service sector widened to 35.9 percent.

The steady appreciation of the domestic currency against the euro and the lower interest rates on EUR-denominated loans in the period under review caused these loans to increase by a real 55.4 percent, their share expanding by 4.5 percentage points to 51.4 percent of total. The volume of loans and commitments in local currency stepped up 33.2 percent in real terms, their weight increasing by 2.8 percentage points to 29.4 percent of total, from end-2004. USD-denominated loans declined by a real 9.3 percent, accounting for 19 percent of total (down 7.2 percentage points).

According to the monetary balance sheet, **non-government credit** posted an average monthly growth rate of 3.3 percent during January-October 2005. The composition of non-government credit by currency was relatively steady in the first three quarters of 2005, i.e. 40 percent in domestic currency and 60 percent in foreign currency. Mention should be made that October saw a slight rise in the share of RON-denominated credit following the entry into force, in September 2005, of NBR Norms No. 11 on containing exposure from foreign currency-denominated credit. January through October 2005, the monthly growth rate of RON-denominated credit outpaced that of foreign currency-denominated credit amid the rebound in RON-denominated consumer credit. Due to the above-mentioned prudential measures and the significant drop in interest rates on RON-denominated credit, the positive spread between the two growth rates reached nearly 5 percentage points in October.

Household credit accounted for 35.4 percent of non-government credit, its weight widening by 7 percentage points January through October 2005, as compared with 3.7 percentage points in 2004 as a whole. Household credit exceeded in terms of value both production loans and investment loans granted to companies. While at the beginning of the year RON-denominated credit prevailed, foreign currency-denominated credit regained ground, so that in October the two components held relatively similar shares in total household credit. By type of credit, RON-denominated

Doubtful and past-due claims (net)/Total assets (net)	0.2	0.2
Doubtful and past-due claims (net)/Equity (taken from prudential report on own funds)	2.1	2.1
Credit risk ratio*	2.9	3.4
General risk ratio	47.0	47.5
C. Liquidity risk		
Liquidity indicator (Actual liquidity/Required liquidity)	2.3	2.5
D. Profitability		
ROA (Net income/Total assets)	2.0	2.0
ROE (Net income/Total equity)	15.6	16.9

*Unadjusted exposure relative to loans and interest under "doubtful" and "loss"/Total loans and interest, less off-balance sheet items

credit held a larger share in consumer credit (more than 60 percent), whereas foreign currency-denominated credit took an overwhelming share of more than 90 percent in mortgage credit. After having fallen throughout 2004, the share of consumer credit in total credit to households resumed the upward path, reaching 74 percent in October 2005⁵, whilst the share of mortgage and real-estate credits narrowed. By end-October 2005, top five banks granted approximately 75 percent of total credit to households. **Corporate credit** increased at a faster monthly pace in September and October 2005 (by 2.3 percentage points) as compared with the average for the January-August period, owing largely to the rebound in investment loans.

Loan maturities have followed an upward trend in 2005 as well. As of end-October 2005, according to the monetary balance sheet, long-term RON-denominated credit multiplied almost five times over the past 12 months, coming to hold 15 percent of RON-denominated non-government credit, as compared with 4.5 percent in October 2004, and long-term foreign currency-denominated credit rose 1.9 times, accounting for more than 30 percent of foreign currency-denominated non-government credit versus 22.7 percent a year earlier. Short- and medium-term credits witnessed a slower growth rate and their share in non-government credit diminished accordingly.

In compliance with the bank rating criteria established by the NBR, at end-September 2005, not a single bank was fulfilling the requirements imposed for the highest rating. Significant changes occurred under ratings 2 and 3. Thus, the share of assets of 3-rated banks widened by 9 percentage points from end-2004, whereas that of assets of 2-rated banks narrowed by 8.8 percentage points.

The developments in the main prudential indicators show that the step-up in lending had no detrimental effects on the quality of loan portfolio, as the share of doubtful and overdue loans in total loans has remained unchanged. The credit and overall risk ratios edged up, reaching 3.4 percent and 47.5 percent respectively. As for the profitability indicators, ROA posted the same level as that at end-2004 (2 percent), whereas ROE increased by 1.3 percentage points to 16.9 percent.

⁵ Consumer credit accounted for 74 percent of total credit to households at end-2003 and for 66 percent at end-2004.

LEGISLATIVE INDEX

Main Rules and Regulations Adopted in the Economic, Financial and Banking Areas in October 2005

Law No. 283/5 October 2005 approves Government Emergency Ordinance No. 61/2005 on amending and supplementing Law No. 136/1995 concerning insurance and reinsurance in Romania (*Monitorul Oficial al României* No. 897/7 October 2005).

Law No. 285/11 October 2005 approves Government Emergency Ordinance No. 42/2005 on some reorganisation measures ahead of privatisation of the Savings Bank – C.E.C. (*Monitorul Oficial al României* No. 917/13 October 2005).

Government Decision No. 1254/18 October 2005 sets at RON 107.50 per Gcal (including VAT) the national reference price for heating delivered to households via centralised systems for the purpose of ensuring home heating and hot water (*Monitorul Oficial al României* No. 938/20 October 2005).

Government Emergency Ordinance No. 144/18 October 2005 amends and supplements Law No. 76/2002 on unemployment insurance system and promotion of employment (*Monitorul Oficial al României* No. 969/1 November 2005).

Law No. 302/24 October 2005 amends and supplements Law No. 31/1990 regarding commercial companies (*Monitorul Oficial al României* No. 953/27 October 2005).

Order No. 60/24 October 2005 issued by the President of the National Securities Commission approves Regulation No. 13/2005 on the licensing and operation of the central depository institution, clearing houses and central counterparties (*Monitorul Oficial al României* No. 983/4 November 2005).

Government Emergency Ordinance No. 145/27 October 2005 sets forth the use of some privatisation proceeds in foreign currency (*Monitorul Oficial al României* No. 960/28 October 2005).

The following piece of legislation was republished:

Government Ordinance No. 66/1997 on foreign investment in Romania through purchase of government securities (*Monitorul Oficial al României* No. 928/18 October 2005).

Main Regulations Issued by the National Bank of Romania in October 2005

Circular No. 35/3 October 2005 sets at 7.72 percent per annum the reference rate of the National Bank of Romania for October 2005 (*Monitorul Oficial al României* No. 901/7 October 2005).

*) At year-end, losses were covered from net gains resulting from forex assets and liabilities revaluation, according to the law. In 2004, the loss of RON 2,043 million was covered from the balance of special revaluation account, following the NBR Board approval and in accordance with Art. 44 of Law No. 312/2004 on the Statute of the NBR.

*) Refers to exposure to a single debtor, exposure that is equal or above RON 20,000, accounting for 78.9 percent of loans granted by credit institutions at Dec.31, 2004, according to Credit Information Bureau (CIB). The amount represents loans granted under the contract. It is not updated for the current month for the previous loans in foreign currencies.

Methodological Notes

Annex 1 | Monthly data on the main social and economic indicators (data released by the National Institute of Statistics in the Monthly Statistical Bulletin) are preliminary and may be revised subsequently; the final update is made on a yearly basis, based on company surveys and on specific yearly surveys conducted by the National Institute of Statistics. Starting with 2004, the base year for computing the industrial production index has been 2000. Starting with January 2005, the sample underlying the survey used for measuring wages and the number of employees has been subject to alteration. Data series are updated on a regular basis after being released by the National Institute of Statistics.

Annex 2 | For 2005, fixed-base consumer price indices are calculated on the basis of 2003 average prices and weights based on average expenses in Household Survey.

Annex 6 | **BUBID** – interest rate on deposits taken by banks, **BUBOR** – interest rate on deposits made by banks.

Annexes 7, 8 | Starting with May 2003, **interest rates applied by the banking system** have been calculated in compliance with NBR Norms No. 2/21 February 2003. The said Norms govern the methodology for determining and reporting the average interest rates on current loans and deposits, as well as the average interest rates on new loans and deposits. Data are released by Romanian credit institutions: banks, Romanian legal entities, the branches in Romania of banks, foreign legal entities, savings and loan banks for housing, and by the central bodies of credit co-operatives.

Annex 9a | **The monthly reference rate**, laid down by Circular No. 3/1 February 2002, is calculated as an arithmetic mean (weighted by the volume of transactions) between interest rates on deposits taken by the NBR and reverse repo operations in the month prior to that when the release was made. The annual average reference rate of the NBR is calculated as an arithmetic mean (weighted by the volume of transactions) between monthly reference rates of the NBR.

Open market operations performed by the NBR and lending and deposit facilities granted to credit institutions are stipulated in NBR Regulation No. 1/30 March 2000. Open market operations performed by the NBR (deposit-taking operations and issues of certificates of deposit) show daily averages for both transactions performed in the reference period (flow data) and their end-of-period balance (stock data). The average interest rate in the reporting month is calculated as an arithmetic mean weighted by the volume of transactions for interest rates on flow/stock operations.

Annex 9b | **Standing facilities (lending and deposit facilities) granted by the National Bank of Romania to credit institutions** are resorted to by credit institutions, on their initiative.

The interest rate on marginal lending facility is the rate at which banks are granted overnight liquidity. **The interest rate on marginal deposit facility** is the rate at which banks may place with the NBR their liquidity surplus at the end of the business day. The interest rates on standing facilities are established by the NBR Board, in accordance with the monetary policy objectives.

Annex 9c | NBR Regulation No. 6/24 July 2002, as subsequently amended, establishes the regime of required reserves. According to the provisions of the said regulation, banks/central houses of credit co-operatives shall hold funds in RON and foreign currency in accounts opened with the NBR during the maintenance period (from the 24th of the current month to the 23rd of the following month). **Required reserve ratio** applies during the observance period (from the 24th of the previous month to the 23rd of the current month) to the average level of balance sheet liabilities of banks and the aggregate balance sheet liabilities of credit co-operative networks. **Remuneration of required reserves** represents the interest rate equal to at least the average interest rate applied by banks on demand deposits and is applicable to actual reserves.

Annex 10 | Starting with December 2002, the **equity interests in international financial institutions**, as well as the **liabilities** against them have been re-classified as foreign assets and foreign liabilities

respectively. **Interbank assets** cover credits to banks, bank deposits and forex deposits with banks in Romania. **Interbank liabilities** include banks' deposits in both RON and foreign currency with the central bank. **Other assets/liabilities** include items (accounts) relative to the central bank's own activity (assets – tangible fixed assets, debtors, prepaid expenses, etc.; liabilities – settlements, creditors, etc.).

Annexes 10, 12 | **General Account of Treasury** includes receipts and payments accounts related to the government budget, local budgets, state social security budget and extrabudgetary funds with banks.

Annexes 10, 12, 14 | **Monetary gold** represents the central bank's gold holdings and is part of international reserves. The National Bank of Romania's stock of monetary gold is **valued in euro** at the price on the London Bullion Market on the last day of the month. Until the end of 2004, the stock of gold was **valued in domestic currency** at a sole domestic price, while gold inflows and outflows were valued in domestic currency at the current price. The stock of gold will be revalued at end of year only. Starting with January 2005, the stock of gold has been valued in domestic currency at market price.

Annex 11 | The Central House of CREDITCOOP Credit Co-operatives was included in May 2003. The banks whose licences were revoked are included with their last reporting month, i.e. February 2002 for *Banca Româna de Scout*, April 2002 for *Banca Turco-Româna*, April 2003 for *Banca Columna*, by adjusting the item "Household deposits" with payments made to depositors.

Annex 12 | **Net foreign assets** of the banking system are calculated by subtracting foreign liabilities in convertible currency from foreign assets in convertible currency (reserve assets plus equity interests in foreign banks).

Annex 13a | According to the international standard definition, **Romania's international investment position** includes a country's stock of foreign assets and liabilities at a given moment. The standard table on the international investment position comprises the stocks of foreign assets and liabilities at the beginning and at the end of the period, as well as the financial transactions, exchange rate movements, price movements on the international market, and other financial changes over the same period. Financial transactions referred to in the

international investment position are included in the balance-of-payments financial account.

Annex 13b | **Medium- and long-term external debt** (non-guaranteed debt) includes the balance of medium- and long-term deposits of foreign banks with resident banks.

Annex 15a | **Monthly volume of transactions in the interbank forex market** represents the sum of the daily highs of sales and purchases. The average annual volume of forex transactions is calculated as an arithmetic mean of monthly forex transactions.

The average monthly exchange rate (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of daily exchange rates on the forex market communicated by the National Bank of Romania. **The average annual exchange rate** (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of average monthly rates.

Annex 16a | **The BET (Bucharest Exchange Trading) index** is the BSE's first official index launched on 22 September 1997. It reflects the overall trend in prices of the ten most liquid shares, serving as a support for risk management in the trading of derivatives, i.e. futures and options. The index is calculated as a capitalisation-weighted average of the securities that make up the index basket. Shares must be listed on the BSE's first tier and must have the largest market capitalisation (market capitalisation of companies whose shares are in the BET basket must account for more than 60 percent of total stock market capitalisation); as far as liquidity is concerned, the value of trades in the last 3/6/9 months must be higher than 70 percent of total turnover.

The Composite Index of Bucharest Stock Exchange (BET-C) represents the movements of shares traded on the Bucharest Stock Exchange. The calculation method is the same as that used for the BET index. The index basket is updated automatically by including the new entrants, at the price set on the day next to their being listed. Furthermore, the BET-C reflects the changes to the registered capital of listed companies.

Investment funds are not included in the basket of BET and BET-C indices. In order to avoid a small number of companies to weigh on the index, the share of any company in the index basket must not be higher than 20 percent.

BET-FI Index was originally computed for the five Financial Investment Companies listed and is envisaged to include all investment funds to be listed subsequently. The index was launched on 1 November 2000; its start value equalled 1,000 points as of 31 October 2000; the calculation method is the same as that used for the BET-C Index (weighted to capitalisation and updated consistent with capital increases using closing prices).

Annex 16b | **RASDAQ Composite Index** was launched on 31 July 1998, its start value equalling 1,000 points. Every company listed on the RASDAQ Electronic Exchange is included in the index calculation in order to capture the global trend in share prices. In terms of the calculation method, this index belongs to the set of stock market indices computed by weighting to market capitalisation. The share of a symbol in the index is no higher than 25 percent of total capitalisation of the symbols included in RASDAQ-C. **RAQ-I and RAQ-II indices** were launched concurrently with the introduction of the two upper tiers in order to reflect the overall development of the prices of top companies listed on RASDAQ's first and second tiers. The calculation method is the same as that used for RASDAQ-C. They were launched on 28 October 2002 and their start value equalled 1,079.216 points.

Annexes 18a, 18b | Starting 1 January 2003, the methodology of loan classification and establishment of specific risk provisions was changed by Regulation No. 5/2002, as amended by Regulations Nos. 7/2002 and 8/2005. Regulation No. 8/2005 specifies the financial performance of debtors – natural entities, which shall be rated from A to E, according to the criteria set by credit institutions via internal regulations (depending on income characteristics: certainty, currency denomination, amount after payment of other financial obligations, etc.).

Annexes 19a, 19b, 19c, 19d | **The credit risk information** encompasses identification data on a debtor – non-bank, legal or natural entity – and on the following RON- and foreign exchange-denominated operations whereby credit institutions face credit risk exposure to the respective debtor: (a) loans and (b) commitments assumed by the credit institution on behalf of the debtor.

The risk information refers to the exposure of each credit institution in the Romanian banking system to a single debtor, which may be equal to or higher than RON 20,000. Starting with August 2004, following the entry into force of Regulation No. 4/2004 on the organisation and operation of Credit Information Bureau with the National Bank of Romania, the former has also been receiving reports on loans overdue for more than 30 days in respect of individuals whose exposure is less than RON 20,000. Starting with September 2003, CREDITCOOP Central House has also submitted reports to the Credit Information Bureau.

The loan maturity is consistent with Law No. 58/1998 – The Banking Act, as amended and supplemented subsequently; **type of ownership of borrower** is consistent with Methodological Norms No. 370542/1999 issued by the Ministry of Finance (Types of Ownership Nomenclature); this classification meets the analysis requirements of the National Bank of Romania; **type of loans granted to non-bank, legal and natural entities (by risk)** is consistent with the Chart of Accounts for Banks and the norms for its implementation (1997), as amended and supplemented subsequently; **currency denomination of loans** is consistent with applicable regulations worldwide; the classification meets the analysis requirements of the National Bank of Romania; **activity of borrower** is consistent with Order No. 601/2002, issued by the president of the National Institute of Statistics, on updating CANE; the classification meets the analysis requirements of the National Bank of Romania.
