# SUMMARY OF MAIN ECONOMIC DEVELOPMENTS AND MONETARY POLICY IN MARCH 2006

## Real Economy

March industrial output rose year on year by 4.3 percent in terms of volume, hinting at a pick-up in industrial activity<sup>1</sup> in the first quarter of 2006 compared with the final quarter of 2005. The respondents participating in the surveys conducted by the NIS and the NBR have reaffirmed the likelihood of positive annual growth for 2006 Q2 as well, yet the volume of industrial output is unlikely to grow faster than in the first three-month period of 2006. In fact, the confidence indicator in industry calculated by DGECFIN based on seasonally-adjusted data series fell to a 6-month low, with incidental factors being accountable for the current performance.

The uncertain prospects for the industrial sector are also reflected by the economic agents' concern for restructuring their activities by cutting payrolls further. Nonetheless, the impact of such measures was alleviated by the stronger demand for workforce in construction and services sectors, which caused March unemployment rate to shed 0.1 percentage points to 6.2 percent. In the same vein, seasonally-adjusted data series are indicative of employers' persistent difficulties in hiring adequately skilled staff, which is seen as a potential hindrance to keeping a tight rein on pay rises in the future. It should be pointed out that the annual rate of increase of net real wage economy-wide accelerated by 3 percentage points over February to 7.8 percent. Industrial sector wages posted above-average growth rate of 8.2 percent, the same as in December 2005; the wage increase in industry can be ascribed to the unprecedented pay rises in hydrocarbon extraction sub-sector (up 88 percent from the previous month and 93.7 percent from the same year-ago period), one possible explanation being the earlier-than-scheduled annual wage hikes at Petrom, Romania's major oil company, compared with the year before.

Source: NIS

<sup>1</sup> Based on annual growth rates.

Against the background of slower growth in wage earnings and more difficult access to alternative financing sources in the early months of 2006<sup>2</sup>, the main segments of trade and services sectors saw a deceleration in annual dynamics in March, with the average annual change in total turnover in 2006 Q1 slipping below 20 percent (for the first time in the last four quarters). The deceleration was attributed to the developments recorded in two major segments, i.e. sales of motor vehicles and fuels (15 percent in 2006 Q1, half the average annual growth rate seen in 2005 Q4) and services to population (-0.8 percent, compared with +22.9 percent in 2005 Q4).

March 2006 witnessed a stunning performance of exports, which hit a 15-year high of EUR 2.3 billion, up 20.7 percent from the corresponding year-ago period, due mostly to the rebound in trade with the European Union<sup>3</sup>. With the value of imports advancing 25.9 percent versus March 2005, the trade deficit continued to widen (47.3 percent year on year).

In March, the annual dynamics of industrial producer prices for the domestic market slowed 0.5 percentage points from the previous month to 12 percent, without however spurring first-quarter disinflation, which came to a halt following the February performance. In quarter-on-quarter comparison, the annual inflation rate was sharper in mining (5.3 percentage points to 33.3 percent), causing the gap between the growth rate of producer price in this sector and the average growth rate in industry to widen to 21.7 percentage points, from 17.2 percentage points in the fourth quarter of 2005.

The annual pace of increase of consumer prices continued to lose momentum, touching 8.4 percent in March, down 0.1 percentage points compared with the previous month. Similarly to February, this owed to the appreciation of the domestic currency, which had a more favourable impact on administered prices. The annual growth rate of market prices stayed put at 7.2 percent, whereas that of prices for seasonal products added half of a percentage point to 20.3 percent.

<sup>2</sup> Average annual growth rate of net average wage in 2006 Q1 lagged behind the figure recorded in 2005 Q4 owing solely to the base effect triggered by the introduction of the flat tax rate in January 2005.

<sup>3</sup> The value of first-quarter exports to the EU-25 Member States was 18.8 percent higher than in the same year-ago quarter, compared with an annual growth rate of 11.3 percent in 2005 Q1.

## Monetary Policy

In March, the central bank reiterated its determination to increase the restrictiveness of monetary conditions in response to persistent pressures exerted by domestic demand and to cushion the unfavourable impact from supply-side shocks (administered price adjustment and the change in excise duties). In its meeting of 27 March 2006, the National Bank of Romania Board decided to keep the policy rate at 8.5 percent and continue to substantially sterilise excess liquidity via open market operations; in addition, the Board considered that tightening of monetary conditions would continue also as a result of the increase in the minimum reserve ratio on foreign-exchange-denominated liabilities of credit institutions to 40 percent, from 35 percent, starting with 24 March 2006.

Over the period, monetary control tightening was achieved through the increase in one-month deposit-taking operations, whose daily average flow was more than 19 percent higher than in February, and through the launch of a new issue of CDs. Therefore, the average daily balance of open market operations grew by 5.2 percent month on month, whereas the banks continued to make low resort to the deposit facility. The average interest rate on credit institutions' placements with the central bank stayed on an upward course, reflecting the tightened control over liquidity and the effect of the policy rate hike in the previous month.

Conversely, the average interest rate on interbank deposits (the National Bank of Romania excluded) dropped 2.4 percentage points month on month, exceeding marginally 6 percent. Behind this decline stood chiefly the considerable decline in overnight rates at the end of the maintenance period amid increased cautiousness of credit institutions regarding resource management<sup>4</sup>.

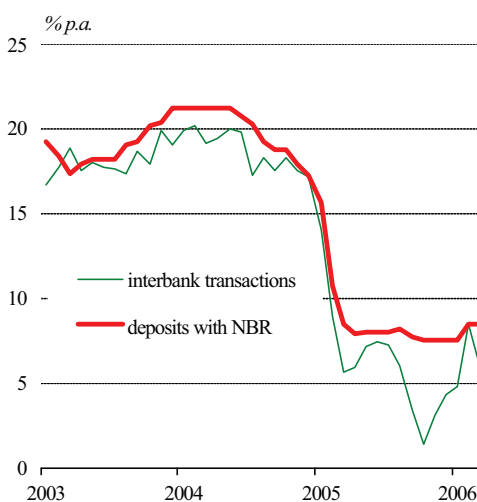

The RON/EUR exchange rate saw a relatively slower upturn and a sharper volatility. In the first half of March, the domestic currency softened noticeably versus the euro due to the adjustment of speculative positions in Central and East European countries following the deteriorating investor sentiment and the rate hikes by the European Central Bank and the Fed. In the latter half of March however, the RON/EUR exchange rate stabilised somewhat, against the background of a relative alleviation of investors' scepticism and the expectations of higher money market rates in the offing.

Policy Rate\*

\*) maximum interest rate on one-month deposit-taking operations

Money Market Rates

<sup>4</sup> Overnight rates dropped occasionally below the interest rate on the deposit facility.

**Bank Interest Rates  
to Non-government Non-bank Clients**

Unlike the trends prevailing in the first two months of 2006, in March average interest rates on new loans and average interest rates on new deposits posted similar developments. The former experienced an increase for the first time in eight months, reaching 13.4 percent, while the latter climbed to 5.7 percent.

## LEGISLATIVE INDEX

### Main Rules and Regulations Adopted in the Economic, Financial and Banking Areas in March 2006

---

**Law No. 31/1** March 2006 on receivables securitisation. It sets forth the principles and the general framework for the use of receivables in order to be granted financing through securitisation, and governs the rights and obligations of the parties in a securitisation operation (*Monitorul Oficial al României* No. 225/13 March 2006).

**Law No. 32/1** March 2006 on mortgage bonds. It sets forth the conditions and the general framework for the issue of mortgage bonds, and governs the rights and obligations of holders of such bonds (*Monitorul Oficial al României* No. 264/23 March 2006).

**Law No. 33/1** March 2006 on mortgage loan banks (*Monitorul Oficial al României* No. 200/3 March 2006).

**Decision No. 252/1** March 2006 issued by the President of the National Regulatory Authority in Natural Gas Sector modifies the criteria and methods for approving prices and setting regulated prices in natural gas sector (*Monitorul Oficial al României* No. 207/7 March 2006).

**Government Decision No. 312/8** March 2006 alters the Methodological Norms for the enforcement of Law No. 76/2002 on unemployment insurance system and promotion of employment, as approved by Government Decision No. 174/2002 (*Monitorul Oficial al României* No. 235/15 March 2006).

**Law No. 46/8** March 2006 amends Government Ordinance No. 66/1997 on the regime of foreign investment in Romania by means of purchasing government securities (*Monitorul Oficial al României* No. 238/16 March 2006).

**Order No. 23/9** March 2006 issued by the President of the National Securities Commission approves Regulation No. 1/2006 on the issuers and operations in securities (*Monitorul Oficial al României* No. 312/6 April 2006).

**Order No. 27/21** March 2006 issued by the President of the National Securities Commission approves Instructions No. 3/2006 on the registration of financial derivatives with the National Securities Commission (*Monitorul Oficial al României* No. 281/29 March 2006).

**Government Emergency Ordinance No. 23/22** March 2006 amends and supplements Government Ordinance No. 39/1996 on the establishment and operation of Bank Deposit Guarantee Fund (*Monitorul Oficial al României* No. 278/28 March 2006).

### Main Regulations Issued by the National Bank of Romania in March 2006

---

**Circular No. 5/1** March 2006 sets at 8.47 percent per annum the reference rate of the National Bank of Romania for March 2006 (*Monitorul Oficial al României* No. 216/9 March 2006).

**Circular No. 6/14** March 2006 sets at 1.70 per annum the interest rate on minimum reserve requirements established in domestic currency starting with 24 February – 23 March 2006 maintenance period (*Monitorul Oficial al României* No. 259/22 March 2006).

**Circular No. 7/28** March 2006 on putting into circulation, for numismatic purposes, of three coins manufactured of gold, silver and copper-plated brass with face value of *leu* 50, 5 and 1 respectively, in the issue “140 Years since the Establishment of the Romanian Academy” (*Monitorul Oficial al României* No. 294/31 March 2006).

\*) At year-end, losses were covered from net gains resulting from forex assets and liabilities revaluation, according to the law. In 2004, the loss of RON 2,043 million was covered from the balance of special revaluation account, following the NBR Board approval and in accordance with Art. 44 of Law No. 312/2004 on the Statute of the NBR.

## Methodological Notes

### Annex 1

Monthly data on the main social and economic indicators (data released by the National Institute of Statistics in the Monthly Statistical Bulletin) are preliminary and may be revised subsequently; the final update is made on a yearly basis, based on company surveys and on specific yearly surveys conducted by the National Institute of Statistics. Starting with 2004, the base year for computing the industrial production index has been 2000. Starting with January 2006, the sample underlying the survey used for measuring wages and the number of employees has been subject to alteration. Data series are updated on a regular basis after being released by the National Institute of Statistics.

### Annex 2

Starting with January 2006, fixed-base monthly consumer price indices are calculated on the basis of 2004 average prices and weights based on average expenses in Household Survey.

### Annex 6

**BUBID** – interest rate on deposits taken by banks, **BUBOR** – interest rate on deposits made by banks.

### Annexes 7, 8

Starting with May 2003, **interest rates applied by the banking system** have been calculated in compliance with NBR Norms No. 2/21 February 2003. The said Norms govern the methodology for determining and reporting the average interest rates on current loans and deposits, as well as the average interest rates on new loans and deposits. Data are released by Romanian credit institutions: banks, Romanian legal entities, the branches in Romania of banks, foreign legal entities, savings and loan banks for housing, and by the central bodies of credit co-operatives.

### Annex 9a

**The monthly reference rate**, laid down by Circular No. 3/1 February 2002, is calculated as an arithmetic mean (weighted by the volume of transactions) between interest rates on deposits taken by the NBR and reverse repo operations in the month prior to that when the release was made. The annual average reference rate of the NBR is calculated as an arithmetic mean (weighted by the volume of transactions) between monthly reference rates of the NBR.

**Open market operations performed by the NBR and lending and deposit facilities granted to credit institutions** are stipulated in NBR Regulation No. 1/30 March 2000. Open market operations performed by the NBR (deposit-taking operations and issues of certificates of deposit) show daily averages for both transactions performed in the reference period (flow data) and their end-of-period balance (stock data). The average interest rate in the reporting month is calculated as an arithmetic mean weighted by the volume of transactions for interest rates on flow/stock operations.

### Annex 9b

**Standing facilities (lending and deposit facilities) granted by the National Bank of Romania to credit institutions** are resorted to by credit institutions, on their initiative.

**The interest rate on marginal lending facility** is the rate at which banks are granted overnight liquidity. **The interest rate on marginal deposit facility** is the rate at which banks may place with the NBR their liquidity surplus at the end of the business day. The interest rates on standing facilities are established by the NBR Board, in accordance with the monetary policy objectives.

### Annex 9c

NBR Regulation No. 6/24 July 2002, as subsequently amended, establishes the regime of required reserves. According to the provisions of the said regulation, banks/central houses of credit co-operatives shall hold funds in RON and foreign currency in accounts opened with the NBR during the maintenance period (from the 24th of the current month to the 23rd

of the following month). **Required reserve ratio** applies during the observance period (from the 24th of the previous month to the 23rd of the current month) to the average level of balance sheet liabilities of banks and the aggregate balance sheet liabilities of credit co-operative networks. **Remuneration of required reserves** represents the interest rate equal to at least the average interest rate applied by banks on demand deposits and is applicable to actual reserves.

#### **Annex 10**

Starting with December 2002, the **equity interests in international financial institutions**, as well as the **liabilities** against them have been re-classified as foreign assets and foreign liabilities respectively. **Interbank assets** cover credits to banks, bank deposits and forex deposits with banks in Romania. **Interbank liabilities** include banks' deposits in both RON and foreign currency with the central bank. **Other assets/liabilities** include items (accounts) relative to the central bank's own activity (assets – tangible fixed assets, debtors, prepaid expenses, etc.; liabilities – settlements, creditors, etc.).

#### **Annexes 10, 12**

**General Account of Treasury** includes receipts and payments accounts related to the government budget, local budgets, state social security budget and extrabudgetary funds with banks.

#### **Annexes 10, 12, 14**

**Monetary gold** represents the central bank's gold holdings and is part of international reserves. The National Bank of Romania's stock of monetary gold is **valued in euro** at the price on the London Bullion Market on the last day of the month. Until the end of 2004, the stock of gold was **valued in domestic currency** at a sole domestic price, while gold inflows and outflows were valued in domestic currency at the current price. The stock of gold will be revalued at end of year only. Starting with January 2005, the stock of gold has been valued in domestic currency at market price.

#### **Annex 11**

The Central House of CREDITCOOP Credit Co-operatives was included in May 2003. The banks whose licences were revoked were included until end-November 2005, with their last reporting month, i.e. February 2002 for *Banca Româna de Scont*, April 2002 for *Banca Turco-Româna*, April 2003 for *Banca Columba*, by adjusting the item "Household deposits" with payments made to depositors.

#### **Annex 12**

**Net foreign assets** of the banking system are calculated by subtracting foreign liabilities in convertible currency from foreign assets in convertible currency (reserve assets plus equity interests in foreign banks).

#### **Annex 13a**

According to the international standard definition, **Romania's international investment position** includes a country's stock of foreign assets and liabilities at a given moment. The standard table on the international investment position comprises the stocks of foreign assets and liabilities at the beginning and at the end of the period, as well as the financial transactions, exchange rate movements, price movements on the international market, and other financial changes over the same period. Financial transactions referred to in the international investment position are included in the balance-of-payments financial account.

#### **Annex 13b**

**Medium- and long-term external debt** (non-guaranteed debt) includes the balance of medium- and long-term deposits of foreign banks with resident banks.

#### **Annex 15a**

**Monthly volume of transactions in the interbank forex market** represents the sum of the daily highs of sales and purchases. The average annual volume of forex transactions is calculated as an arithmetic mean of monthly forex transactions.

The **average monthly exchange rate** (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of daily exchange rates on the forex market communicated by the National Bank of Romania. The **average annual exchange rate** (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of average monthly rates.

#### **Annex 16a**

The **BET (Bucharest Exchange Trading) index** is the BSE's first official index launched on 22 September 1997. It reflects the overall trend in prices of the ten most liquid shares, serving as a support for risk management in the trading of derivatives, i.e. futures and options. The index is calculated as a capitalisation-weighted average of the securities that make up the index basket. Shares must be listed on the BSE's first tier and must have the largest market capitalisation (market capitalisation of companies whose shares are in the BET basket must account for more than 60 percent of total stock market capitalisation); as far as liquidity is concerned, the value of trades in the last 3/6/9 months must be higher than 70 percent of total turnover.

The **Composite Index of Bucharest Stock Exchange (BET-C)** represents the movements of shares traded on the Bucharest Stock Exchange. The calculation method is the same as that used for the BET index. The index basket is updated automatically by including the new entrants, at the price set on the day next to their being listed. Furthermore, the BET-C reflects the changes to the registered capital of listed companies.

Investment funds are not included in the basket of BET and BET-C indices. In order to avoid a small number of companies to weigh on the index, the share of any company in the index basket must not be higher than 20 percent.

**BET-FI Index** was originally computed for the five Financial Investment Companies listed and is envisaged to include all investment funds to be listed subsequently. The index was launched on 1 November 2000; its start value equalled 1,000 points as of 31 October 2000; the calculation method is the same as that used for the BET-C Index (weighted to capitalisation and updated consistent with capital increases using closing prices).

#### **Annex 16b**

**RASDAQ Composite Index** was launched on 31 July 1998, its start value equalling 1,000 points. Every company listed on the RASDAQ Electronic Exchange is included in the index calculation in order to capture the global trend in share prices. In terms of the calculation method, this index belongs to the set of stock market indices computed by weighting to market capitalisation. The share of a symbol in the index is no higher than 25 percent of total capitalisation of the symbols included in RASDAQ-C. **RAQ-I and RAQ-II indices** were launched concurrently with the introduction of the two upper tiers in order to reflect the overall development of the prices of top companies listed on RASDAQ's first and second tiers. The calculation method is the same as that used for RASDAQ-C. They were launched on 28 October 2002 and their start value equalled 1,079.216 points.

#### **Annexes 18a, 18b**

Starting 1 January 2003, the methodology of loan classification and establishment of specific risk provisions was changed by Regulation No. 5/2002, as amended by Regulations Nos. 7/2002 and 8/2005. Regulation No. 8/2005 specifies the financial performance of debtors – natural entities, which shall be rated from A to E, according to the criteria set by credit institutions via internal regulations (depending on income characteristics: certainty, currency denomination, amount after payment of other financial obligations, etc.).

#### **Annexes 19a, 19b, 19c, 19d**

The **credit risk information** encompasses identification data on a debtor – non-bank, legal or natural entity – and on the following RON- and foreign exchange-denominated operations whereby credit institutions face credit risk exposure to the respective debtor: (a) loans and (b) commitments assumed by the credit institution on behalf of the debtor.

The risk information refers to the exposure of each credit institution in the Romanian banking system to a single debtor, which may be equal to or higher than RON 20,000. Starting with August 2004, following the entry into force of Regulation No.

4/2004 on the organisation and operation of Credit Information Bureau with the National Bank of Romania, the former has also been receiving reports on loans overdue for more than 30 days in respect of individuals whose exposure is less than RON 20,000. Starting with September 2003, CREDITCOOP Central House has also submitted reports to the Credit Information Bureau.

**The loan maturity** is consistent with Law No. 58/1998 –The Banking Act, as amended and supplemented subsequently; **type of ownership of borrower** is consistent with Order No. 918/28.06.2005 issued by the Minister of Public Finance (Types of Ownership Nomenclature); this classification meets the analysis requirements of the National Bank of Romania; **type of loans granted to non-bank, legal and natural entities (by risk)** is consistent with the Chart of Accounts for Banks and the norms for its implementation (1997), as amended and supplemented subsequently; **currency denomination of loans** is consistent with applicable regulations worldwide; the classification meets the analysis requirements of the National Bank of Romania; **activity of borrower** is consistent with Order No. 601/2002, issued by the president of the National Institute of Statistics, on updating CANE; the classification meets the analysis requirements of the National Bank of Romania.
