# SUMMARY OF MAIN ECONOMIC DEVELOPMENTS AND MONETARY POLICY IN APRIL 2006

## Real Economy

In 2006 Q1, the annual growth rate of GDP stayed on an upward trend, rising to 6.9 percent, compared with 4.3 percent in the previous quarter. This was mainly due to a faster annual pace of increase of household consumer demand amid weakening contribution of investment and net external demand.

The accelerated annual growth rate of household final consumption (up 4.5 percentage points to 10.9 percent) was somewhat at odds with the performance of purchases of goods and services, whose rate of increase slowed for the third quarter in a row. The pick-up was due mainly to a larger-than-expected slowdown in the negative rate of self-consumption and home industry, thanks to robust growth of stockbreeding (which prevails in the structure of the two components in Q1 of each year). As regards gross fixed capital formation, its annual change plunged to 11.4 percent, from 21.3 percent, especially as a result of the base effect impacting the volume index in 2005 Q4<sup>1</sup>; first-quarter developments point to the deterioration of this indicator, with the sizeable slowdown in retooling<sup>2</sup> driving the quarterly growth rate into negative territory (-0.4 percent). The negative contribution of net external demand to GDP growth widened slightly (from -3.9 percentage points to -4.1 percentage points); nonetheless, the strengthening of the upward trend of annual dynamics of exports (up 3.2 percentage points to 13 percent) failed to offset the pick-up in the growth rate of imports (from 17.2 percent to 18.7 percent), with the latter's share significantly higher (by around 10 percentage points).

In April, the annual growth rate of industrial output (unadjusted series) lost momentum against the previous month (from 104.3 percent to merely 100.5 percent), yet this development was solely due to seasonal factors (the Easter Holidays fell in early May 2005). Thus, the series adjusted by the number of working days are indicative of an annual growth rate of 8.4 percent, far above the March 2006 reading. The opinions of company managers polled by the NBR and the NIS remain optimistic, yet an acceleration in Q2 compared to Q1 is unlikely.

### GDP by Origin

	% change vs. same year-earlier period	
	3 mths 2005	3 mths 2006
<b>Gross Domestic Product</b>	<b>6.0</b>	<b>6.9</b>
Industry	5.2	4.8
Construction	3.8	20.4
Agriculture, forestry and fishery	1.8	-5.3

### GDP by Expenditure

	% change vs. same year-earlier period	
	3 mths 2005	3 mths 2006
<b>Gross Domestic Product</b>	<b>6.0</b>	<b>6.9</b>
Final consumption	11.9	10.2
Households	12.5	10.9
Public administration	5.8	4.3
Gross fixed capital formation	5.2	11.4
Exports	8.8	13.0
Imports	18.4	18.7

Source: NIS

<sup>1</sup> Steep decline in investment volume in 2004 Q4, as a result of some projects being started ahead of schedule over year-end election uncertainties.

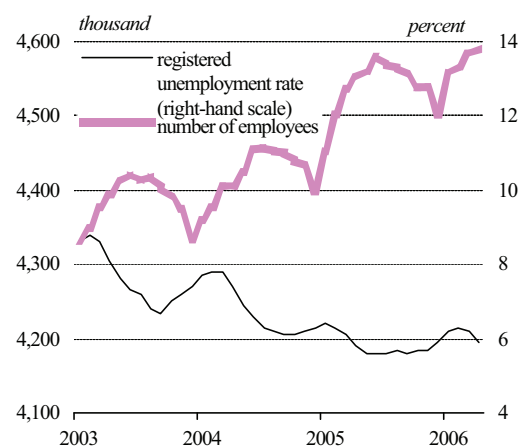

<sup>2</sup> The volume index of equipment purchases dropped to a mere 103 percent from over 115 percent in the two previous quarters.

## Trend of Industrial Output

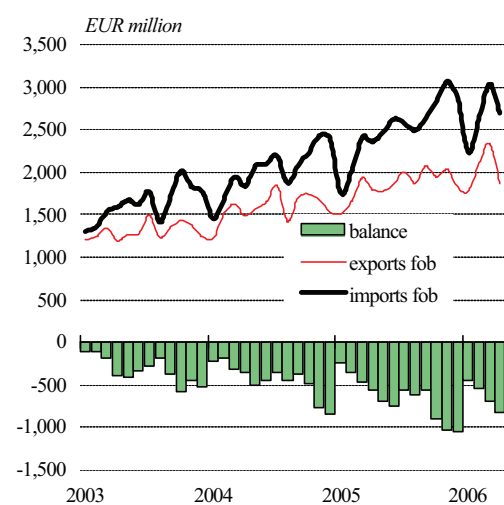

Source: NIS, NBR

## Labour Force

Source: NIS

## Trade Balance

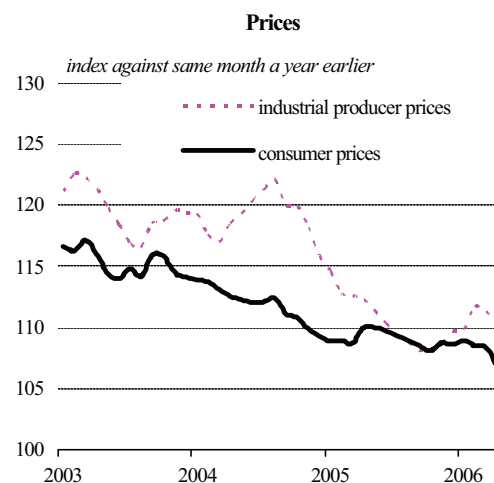

The labour market continued to tighten, as a result of seasonal influences, given that registered unemployment rate fell to 5.9 percent, whereas the seasonally-adjusted rate stuck to 5.7 percent. The annual change in net real wage dropped 2.3 percentage points from March to 5.5 percent, due mainly to a slower pace of wage increases in manufacturing, mining and commercial services; however, this development does not appear to reflect a structural phenomenon, but rather a base effect generated by wage bargaining particularly in March 2006 compared to a more balanced distribution in 2005. It is worth mentioning that wages in manufacturing and commercial services, namely the economic sectors facing stiffer competition, posted annual growth rates well below average (1 to 3 percentage points), unlike oligopolic activities (mining, particularly hydrocarbons sub-sector, and energy) and the budgetary sector.

In April, the growth of retail trade and services lost momentum again, with the annual rate bottoming out at approximately 12 percent, i.e. the lowest level in the last 18 months. This development was attributable mainly to retail sales, whose annual pace of increase slowed 8 percentage points from the previous month (to 16 percent), with major fluctuations in sales of foodstuffs and IT products; nevertheless, in the first four months of 2006, both categories posted cumulative annual growth rates well above the average (up 31 percent and 24.4 percent respectively). Services to population saw an improvement in their negative pace of increase (from -3.6 percent in March to -1 percent in April), with the main components of the consumer basket (hotels and restaurants, travel agencies) recording no significant rises.

The current account deficit continued to deteriorate, being 53 percent higher than in April 2005, mainly against the backdrop of a wider trade deficit, which came in at EUR 827 million. In April, the value of exports fob (EUR 1,862 million) stood only 3.7 percent higher than that in the same year-ago period (the slowest annual pace since February 2004), solely on account of the hike in external prices for some key groups (ores, machinery and equipment, agrifoodstuffs). The value of imports fob rose 14.1 percent in the reported period, owing both to a larger volume of imports (mainly petroleum products, machinery and equipment) and higher prices.

Over the period, the annual growth rate of industrial producer prices for the domestic market shrank further (down 1.2 percentage points month on month to 10.8 percent), due solely to the performance of mining, given that the pace of increase of both manufacturing and energy prices tended to flatten out. In case of manufacturing, this was attributed to the limited number of sub-sectors (leatherwear, oil processing, metallurgy) and may be ascribed to costlier raw materials and/or higher utility prices.

The 12-month inflation rate dropped in April to 6.9 percent (a record low after 1990), owing largely to a base effect. The alleviation of pressures was visible in both administered prices (down 3.7 percentage points to an annual rate of 9.2 percent) and market prices (down 0.9 percentage points to 6.3 percent), with exchange rate movements having a considerable contribution. Favourable influences were also recorded for volatile prices (down 1 percentage point to 13 percent), driven mainly by the psychological effects of bird flu, which led to further negative growth rates of the price for eggs.

## Monetary Policy

\*) maximum interest rate on one-month deposit-taking operations

In April, the central bank continued to implement monetary policy in line with the decisions taken by the National Bank of Romania Board in its March meeting. Thus, the central bank tightened the liquidity control by entirely accepting – for the first time since the launch of fixed-rate auctions in August 2005 – the bids submitted by credit institutions at the deposit auctions organised during April. In addition, unlike the previous month, the volume of CDs issued at the monthly auction increased substantially, exceeding by 25 percent the pre-announced amount. Given the circumstances, the upward trend in the average interest rate on banks' placements with the central bank strengthened, posting the sixth successive increase in as many months.

Average interest rate on interbank deposits added 1.33 percentage points month on month to 7.39 percent. The rise in interbank rates was attributed to the National Bank of Romania's frequent sterilization operations via open-market operations – and credit institutions' lower uncertainties surrounding the results of deposit auctions –, on the one hand, and to the seasonal contractionary impact of autonomous factors of liquidity, on the other.

The relative alleviation of foreign investor scepticism about emerging economies starting with the latter half of April added to the uptrend in money market rates, leading to an increase in net foreign currency sales by non-residents. Foreign currency supply grew due to seasonally-driven increase in remittances from abroad; as a result, the domestic currency continued to strengthen in nominal terms against the euro, albeit at a slower pace than in March.

Conversely, the trend in interest rates on new loans and interest rates on time deposits changed relatively against the previous month. Thus, average interest rate on deposits remained unchanged month on month, i.e. 5.7 percent. In contrast, average interest rates on new loans fell owing to the promotional offers to customers occasioned by the Easter Holiday as well as to the aggressive strategies adopted by some banks in this period, with a view to expanding their market shares.

# LEGISLATIVE INDEX

## **Main Rules and Regulations Adopted in the Economic, Financial and Banking Areas in April 2006**

---

**Law No. 85/5** April 2006 on insolvency proceedings. It sets forth the participants in insolvency proceedings, the progress of proceedings, the liability of executive members, the offences and penalties (*Monitorul Oficial al României* No. 359/21 April 2006).

**Law No. 88/10** April 2006 approves Government Emergency Ordinance No. 174/2005 regulating some financial issues in 2005 (*Monitorul Oficial al României* No. 328/12 April 2006).

**Law No. 90/10** April 2006 approves Government Emergency Ordinance No. 176/2005 regulating some financial issues in 2005 in respect of unemployment insurance (*Monitorul Oficial al României* No. 336/14 April 2006).

**Government Emergency Ordinance No. 32/19** April 2006 on revision of the government budget for 2006 (*Monitorul Oficial al României* No. 375/2 May 2006).

**Law No. 97/25** April 2006 approves Government Ordinance No. 41/2005 regulating some financial issues (*Monitorul Oficial al României* No. 375/2 May 2006).

**Law No. 106/25** April 2006 approves Government Emergency Ordinance No. 154/2005 on revision of the government budget for 2005 (*Monitorul Oficial al României* No. 369/27 April 2006).

**Order No. 666/28** April 2006 issued by the Minister of Public Finance amends and supplements the Regulation on operations in dematerialised government securities (*Monitorul Oficial al României* No. 401/9 May 2006).

## **Main Regulations Issued by the National Bank of Romania in April 2006**

---

**Circular No. 83** April 2006 sets at 8.5 percent per annum the reference rate of the National Bank of Romania for April 2006 (*Monitorul Oficial al României* No. 309/5 April 2006).

**Norms No. 2/20** April 2006 set forth the capital requirements for non-bank financial institutions (*Monitorul Oficial al României* No. 381/3 May 2006).

**Norms No. 3/20** April 2006 on the General Register, Special Register and Entry Register (*Monitorul Oficial al României* No. 381/3 May 2006).

**Norms No. 4/20** April 2006 set forth the notification procedure and the registration of non-bank financial institutions (*Monitorul Oficial al României* No. 381/3 May 2006).

\*) At year-end, losses were covered from net gains resulting from forex assets and liabilities revaluation, according to the law. In 2004, the loss of RON 2,043 million was covered from the balance of special revaluation account, following the NBR Board approval and in accordance with Art. 44 of Law No. 312/2004 on the Statute of the NBR.

## Methodological Notes

### Annex 1

Monthly data on the main social and economic indicators (data released by the National Institute of Statistics in the Monthly Statistical Bulletin) are preliminary and may be revised subsequently; the final update is made on a yearly basis, based on company surveys and on specific yearly surveys conducted by the National Institute of Statistics. Starting with 2004, the base year for computing the industrial production index has been 2000. Starting with January 2006, the sample underlying the survey used for measuring wages and the number of employees has been subject to alteration. Data series are updated on a regular basis after being released by the National Institute of Statistics.

### Annex 2

Starting with January 2006, fixed-base monthly consumer price indices are calculated on the basis of 2004 average prices and weights based on average expenses in Household Survey.

### Annex 6

**BUBID** – interest rate on deposits taken by banks, **BUBOR** – interest rate on deposits made by banks.

### Annexes 7, 8

Starting with May 2003, **interest rates applied by the banking system** have been calculated in compliance with NBR Norms No. 2/21 February 2003. The said Norms govern the methodology for determining and reporting the average interest rates on current loans and deposits, as well as the average interest rates on new loans and deposits. Data are released by Romanian credit institutions: banks, Romanian legal entities, the branches in Romania of banks, foreign legal entities, savings and loan banks for housing, and by the central bodies of credit co-operatives.

### Annex 9a

**The monthly reference rate**, laid down by Circular No. 3/1 February 2002, is calculated as an arithmetic mean (weighted by the volume of transactions) between interest rates on deposits taken by the NBR and reverse repo operations in the month prior to that when the release was made. The annual average reference rate of the NBR is calculated as an arithmetic mean (weighted by the volume of transactions) between monthly reference rates of the NBR.

**Open market operations performed by the NBR and lending and deposit facilities granted to credit institutions** are stipulated in NBR Regulation No. 1/30 March 2000. Open market operations performed by the NBR (deposit-taking operations and issues of certificates of deposit) show daily averages for both transactions performed in the reference period (flow data) and their end-of-period balance (stock data). The average interest rate in the reporting month is calculated as an arithmetic mean weighted by the volume of transactions for interest rates on flow/stock operations.

### Annex 9b

**Standing facilities (lending and deposit facilities) granted by the National Bank of Romania to credit institutions** are resorted to by credit institutions, on their initiative.

**The interest rate on marginal lending facility** is the rate at which banks are granted overnight liquidity. **The interest rate on marginal deposit facility** is the rate at which banks may place with the NBR their liquidity surplus at the end of the business day. The interest rates on standing facilities are established by the NBR Board, in accordance with the monetary policy objectives.

### Annex 9c

NBR Regulation No. 6/24 July 2002, as subsequently amended, establishes the regime of required reserves. According to the provisions of the said regulation, banks/central houses of credit co-operatives shall hold funds in RON and foreign currency in accounts opened with the NBR during the maintenance period (from the 24th of the current month to the 23rd

of the following month). **Required reserve ratio** applies during the observance period (from the 24th of the previous month to the 23rd of the current month) to the average level of balance sheet liabilities of banks and the aggregate balance sheet liabilities of credit co-operative networks. **Remuneration of required reserves** represents the interest rate equal to at least the average interest rate applied by banks on demand deposits and is applicable to actual reserves.

#### **Annex 10**

Starting with December 2002, the **equity interests in international financial institutions**, as well as the **liabilities** against them have been re-classified as foreign assets and foreign liabilities respectively. **Interbank assets** cover credits to banks, bank deposits and forex deposits with banks in Romania. **Interbank liabilities** include banks' deposits in both RON and foreign currency with the central bank. **Other assets/liabilities** include items (accounts) relative to the central bank's own activity (assets – tangible fixed assets, debtors, prepaid expenses, etc.; liabilities – settlements, creditors, etc.).

#### **Annexes 10, 12**

**General Account of Treasury** includes receipts and payments accounts related to the government budget, local budgets, state social security budget and extrabudgetary funds with banks.

#### **Annexes 10, 12, 14**

**Monetary gold** represents the central bank's gold holdings and is part of international reserves. The National Bank of Romania's stock of monetary gold is **valued in euro** at the price on the London Bullion Market on the last day of the month. Until the end of 2004, the stock of gold was **valued in domestic currency** at a sole domestic price, while gold inflows and outflows were valued in domestic currency at the current price. The stock of gold will be revalued at end of year only. Starting with January 2005, the stock of gold has been valued in domestic currency at market price.

#### **Annex 11**

The Central House of CREDITCOOP Credit Co-operatives was included in May 2003. The banks whose licences were revoked were included until end-November 2005, with their last reporting month, i.e. February 2002 for *Banca Româna de Scont*, April 2002 for *Banca Turco-Româna*, April 2003 for *Banca Columna*, by adjusting the item "Household deposits" with payments made to depositors.

#### **Annex 12**

**Net foreign assets** of the banking system are calculated by subtracting foreign liabilities in convertible currency from foreign assets in convertible currency (reserve assets plus equity interests in foreign banks).

#### **Annex 13a**

According to the international standard definition, **Romania's international investment position** includes a country's stock of foreign assets and liabilities at a given moment. The standard table on the international investment position comprises the stocks of foreign assets and liabilities at the beginning and at the end of the period, as well as the financial transactions, exchange rate movements, price movements on the international market, and other financial changes over the same period. Financial transactions referred to in the international investment position are included in the balance-of-payments financial account.

#### **Annex 13b**

**Medium- and long-term external debt** (non-guaranteed debt) includes the balance of medium- and long-term deposits of foreign banks with resident banks.

#### **Annex 15a**

**Monthly volume of transactions in the interbank forex market** represents the sum of the daily highs of sales and purchases. The average annual volume of forex transactions is calculated as an arithmetic mean of monthly forex transactions.

**The average monthly exchange rate** (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of daily exchange rates on the forex market communicated by the National Bank of Romania. **The average annual exchange rate** (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of average monthly rates.

#### **Annex 16a**

**The BET (Bucharest Exchange Trading) index** is the BSE's first official index launched on 22 September 1997. It reflects the overall trend in prices of the ten most liquid shares, serving as a support for risk management in the trading of derivatives, i.e. futures and options. The index is calculated as a capitalisation-weighted average of the securities that make up the index basket. Shares must be listed on the BSE's first tier and must have the largest market capitalisation (market capitalisation of companies whose shares are in the BET basket must account for more than 60 percent of total stock market capitalisation); as far as liquidity is concerned, the value of trades in the last 3/6/9 months must be higher than 70 percent of total turnover.

**The Composite Index of Bucharest Stock Exchange (BET-C)** represents the movements of shares traded on the Bucharest Stock Exchange. The calculation method is the same as that used for the BET index. The index basket is updated automatically by including the new entrants, at the price set on the day next to their being listed. Furthermore, the BET-C reflects the changes to the registered capital of listed companies.

Investment funds are not included in the basket of BET and BET-C indices. In order to avoid a small number of companies to weigh on the index, the share of any company in the index basket must not be higher than 20 percent.

**BET-FI Index** was originally computed for the five Financial Investment Companies listed and is envisaged to include all investment funds to be listed subsequently. The index was launched on 1 November 2000; its start value equalled 1,000 points as of 31 October 2000; the calculation method is the same as that used for the BET-C Index (weighted to capitalisation and updated consistent with capital increases using closing prices).

#### **Annex 16b**

**RASDAQ Composite Index** was launched on 31 July 1998, its start value equalling 1,000 points. Every company listed on the RASDAQ Electronic Exchange is included in the index calculation in order to capture the global trend in share prices. In terms of the calculation method, this index belongs to the set of stock market indices computed by weighting to market capitalisation. The share of a symbol in the index is no higher than 25 percent of total capitalisation of the symbols included in RASDAQ-C. **RAQ-I and RAQ-II indices** were launched concurrently with the introduction of the two upper tiers in order to reflect the overall development of the prices of top companies listed on RASDAQ's first and second tiers. The calculation method is the same as that used for RASDAQ-C. They were launched on 28 October 2002 and their start value equalled 1,079.216 points.

#### **Annexes 18a, 18b**

Starting 1 January 2003, the methodology of loan classification and establishment of specific risk provisions was changed by Regulation No. 5/2002, as amended by Regulations Nos. 7/2002 and 8/2005. Regulation No. 8/2005 specifies the financial performance of debtors – natural entities, which shall be rated from A to E, according to the criteria set by credit institutions via internal regulations (depending on income characteristics: certainty, currency denomination, amount after payment of other financial obligations, etc.).

#### **Annexes 19a, 19b, 19c, 19d**

**The credit risk information** encompasses identification data on a debtor – non-bank, legal or natural entity – and on the following RON- and foreign exchange-denominated operations whereby credit institutions face credit risk exposure to the respective debtor: (a) loans and (b) commitments assumed by the credit institution on behalf of the debtor.

The risk information refers to the exposure of each credit institution in the Romanian banking system to a single debtor, which may be equal to or higher than RON 20,000. Starting with August 2004, following the entry into force of Regulation No.

4/2004 on the organisation and operation of Credit Information Bureau with the National Bank of Romania, the former has also been receiving reports on loans overdue for more than 30 days in respect of individuals whose exposure is less than RON 20,000. Starting with September 2003, CREDITCOOP Central House has also submitted reports to the Credit Information Bureau.

**The loan maturity** is consistent with Law No. 58/1998 –The Banking Act, as amended and supplemented subsequently; **type of ownership of borrower** is consistent with Order No. 918/28.06.2005 issued by the Minister of Public Finance (Types of Ownership Nomenclature); this classification meets the analysis requirements of the National Bank of Romania; **type of loans granted to non-bank, legal and natural entities (by risk)** is consistent with the Chart of Accounts for Banks and the norms for its implementation (1997), as amended and supplemented subsequently; **currency denomination of loans** is consistent with applicable regulations worldwide; the classification meets the analysis requirements of the National Bank of Romania; **activity of borrower** is consistent with Order No. 601/2002, issued by the president of the National Institute of Statistics, on updating CANE; the classification meets the analysis requirements of the National Bank of Romania.
