SUMMARY OF MAIN ECONOMIC DEVELOPMENTS AND MONETARY POLICY IN SEPTEMBER 2008

Real Economy

In September, the industrial output volume picked up 3.8 percent from the same year-ago period, with activity in manufacturing still trailing a long way behind mining and energy. Intermediate goods posted the slowest growth rate, up 0.6 percent year on year, possibly amid signals of lower demand. The outlook for industry remains negative in the final months of the year, given the larger number of companies (operating mainly in the metal processing, road transport means and chemicals sub-sectors) having announced their intention to limit production capacities or prioritise the scheduled investment programmes.

The registered unemployment rate advanced to 3.9 percent in September (4.1 percent in case of the seasonally-adjusted series), since data released by the National Employment Agency point to a month-on-month increase of about 30 percent in the number of people out of work and claiming benefit. Gross wage annual dynamics remained alert and at a level comparable to that seen in the previous month (up 24.1 percent in nominal terms), owing to the significantly faster growth rate of the industrial sector (up 5.5 percentage points to 25.4 percent) driven primarily by the bonuses granted in hydrocarbon extraction and processing sub-sectors¹.

The annual pace of increase in the turnover volume of trade and services sectors accelerated in September to stand at about 17 percent. The explanation for this lies with trade performance, with brisker dynamics posted by both retail sales except motor vehicles and fuels (up to 17.1 percent) and vehicle sales (28.9 percent, 5.7 percentage points above the rectified August reading). The turnover volume of market services to population

¹ The bonuses granted in hydrocarbon extraction and processing sub-sectors on the occasion of the Oilman's Day entailed month-on-month pay rises of up to 40 percent.

diminished 6.8 percent from the same period of the previous year, given that the 2.2 percent contraction in receipts of hotels and restaurants and the still sharp decline in tourism (down 58.1 percent from September 2007) were only partly offset by the 11.1 percent rise in the turnover of leisure activities.

In September, preliminary estimates of the NIS point to an export dynamics of 16.6 percent against the same year-ago period, lagging 7.9 percentage points behind the growth rate of imports. This gap may be attributed exclusively to trade with non-EU Member States (20.4 percent in case of exports and 45.7 percent in case of imports), a possible explanation being the purchases of methane gas for the winter months ahead. As far as intra-EU trade is concerned, both trade balance components posted relatively similar annual growth rates of 15-16 percent. Against this backdrop, the trade deficit (fob/fob) hit the highest level year so far, i.e. EUR 1,934 million, up 38.7 percent from the same period of last year.

The annual growth rate of industrial producer prices for the domestic market dropped to 16.95 percent in September, amid a quasi-general deceleration trend across industry. Behind this development stood mainly the alleviated pressures from input costs, with the growth rates of hydrocarbon extraction and processing sub-sectors and food industry witnessing the most pronounced slowdown (12.23 percentage points and 3.5 percentage points respectively).

The 12-month inflation rate fell further to 7.30 percent in September, standing 0.72 percentage points lower than in August. This trajectory was primarily ascribable to a base effect, as the monthly dynamics of consumer prices returned to positive territory (0.4 percent during the reported month). In terms of structure, the major contributor to the slowdown in the 12-month inflation rate was the 2.16 percentage point deceleration in the pace of increase of volatile prices amid favourable developments recorded by both vegetables and fruit (due to the rebound in agricultural output) and fuels (following the further easing of tensions on world oil markets). Administered prices also posted

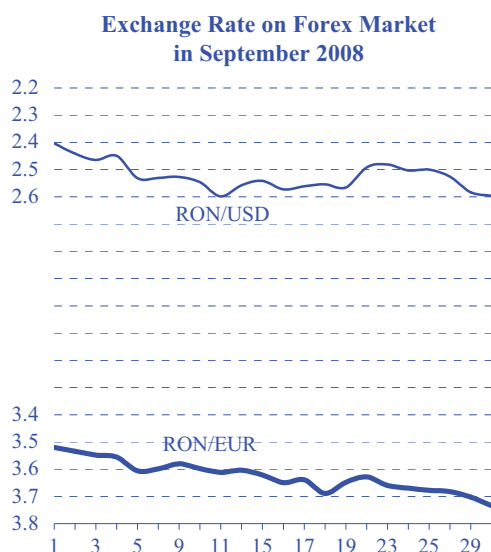

a more sluggish growth rate, albeit of a lower magnitude, to stand at 7.67 percent mainly on the back of the slight drop in fixed telephony rates and prices for railway passenger transport staying flat. The annual dynamics of CORE2 inflation rate also displayed a downward drift to 6.91 percent, influenced essentially – in September as well – by the bumper crop feeding through into the prices of some processed foodstuffs, milling and bakery products in particular.

*) products with volatile prices: vegetables, fruit, eggs, fuels

Monetary Policy

In its meeting of 25 September 2008, the NBR Board discontinued the successive rate hike series and decided to leave the policy rate unchanged at 10.25 percent per annum. Behind this decision stood the resumption of disinflation and higher uncertainty over the resurgence in global financial crisis, on the one hand, and, more importantly, the still fast-paced GDP growth in 2008 Q2, on the other hand. The decision was aimed at additionally tightening broad monetary conditions by expanding the real interest rate spread. Moreover, the NBR Board deemed necessary to keep in place a tight policy stance over a longer period given the prospects in the months ahead of the forecasted annual inflation rate to remain significantly above the upper bound of the 2008 target band. Furthermore, the central bank opted for pursuing firm management of money market liquidity via open-market operations and leaving unchanged the existing minimum reserve requirement ratios on both RON- and foreign currency-denominated liabilities of credit institutions.

Against the background of persistent excess liquidity across the banking system, the NBR performed money-market liquidity management by resorting to liquidity-absorbing operations, primarily one-week deposit-taking operations. The average balance of such operations stood at RON 1,014.1 million in September, the month-on-month rise being accounted for by the heftier liquidity injections attributable to autonomous factors.

In early September however, interbank money market rates remained at relatively elevated levels, due largely to higher uncertainty and wariness of market participants. Specifically, average daily overnight rates ranged between 13 percent and 14 percent. Looser liquidity conditions in the latter part of the reported month as a result of the Treasury's liquidity injections caused a decline in interest rates until the end of the maintenance period for reserve requirements². Nevertheless, interest rates reverted in the last week of September to levels higher than the policy rate. Under these conditions, average interbank rates edged down 0.42 percentage points against August to 11.74 percent.

The RON/EUR exchange rate saw a trend reversal in September and its volatility increased noticeably under the impact, felt also by the other currencies in the region, of the stronger US financial

² Over the period under review, the amounts placed through the deposit facility increased.

turmoil and its fast contagion effects onto the global financial market. Against this backdrop, the Romanian *leu* posted its sharpest depreciation versus the euro in the past eight months, i.e. 2.7 percent, in line with the movements of the Hungarian *forint* and the Polish *zloty*.

Lending and deposit rates on new business continued to edge higher in September, in line with developments observed in both policy rate and interbank rates. The average monthly change in deposit rates on new business of non-financial corporations equalled those seen in the preceding months (up 0.40 percentage points to 12.02 percent). Average monthly deposit rates on new business of households added 0.48 percentage points to 11.15 percent, reflecting the impact of stronger bank demand for RON-denominated funds. Similar developments were recorded by the average lending rate on new business to households, which stood 0.66 percentage points higher at 14.36 percent, whereas the average lending rate on new corporate business rose 0.48 percentage points to 15.68 percent.

LEGISLATIVE INDEX

Main Rules and Regulations Adopted in the Economic, Financial and Banking Areas in September 2008

Decision No. 35 of 4 September 2008 issued by the President of the Private Pension System Supervisory Commission approves Norms No. 19/2008 on the use of net personal assets of participants in privately-managed pension funds in case of disability or death (*Monitorul Oficial al României* No. 656/17 September 2008).

Government Emergency Ordinance No. 108 of 18 September 2008 amends some pieces of legislation in the social field (*Monitorul Oficial al României* No. 661/22.09.2008).

Government Decision No. 1113 of 18 September 2008 amends Government Decision No. 1211/2001 regarding the establishment of the National Loan Guarantee Fund for Small- and Medium-sized Enterprises (*Monitorul Oficial al României* No. 670/29 September 2008).

Government Decision No. 1147 of 18 September 2008 provides for the indexation of certain allowances granted based on special laws (*Monitorul Oficial al României* No. 679/2 October 2008).

Decision No. 36 of 18 September 2008 issued by the President of the Private Pension System Supervisory Commission approves Norms No. 20/2008 on the special supervision of privately-managed pension fund administrators (*Monitorul Oficial al României* No. 689/9 October 2008).

Decision No. 37 of 18 September 2008 issued by the President of the Private Pension System Supervisory Commission approves Norms No. 21/2008 on the special supervision of optional pension fund administrators (*Monitorul Oficial al României* No. 689/9 October 2008).

Government Emergency Ordinance No. 112 of 24 September 2008 on the revision of the 2008 government budget (*Monitorul Oficial al României* No. 680/3 October 2008).

Order No. 2818 of 26 September 2008 issued by the Minister of Economy and Finance approves the issue prospectuses of the discount Treasury certificates and benchmark government securities for October 2008 (*Monitorul Oficial al României* No. 673/30 September 2008).

Main Regulations Issued by the National Bank of Romania in September 2008

Circular No. 27 of 1 September 2008 sets at 10.25 percent per annum the reference rate of the National Bank of Romania for September 2008 (*Monitorul Oficial al României* No. 639/5 September 2008).

Circular No. 28 of 12 September 2008 sets the interest rates on minimum reserve requirements starting with 24 August – 23 September 2008 maintenance period (*Monitorul Oficial al României* No. 658/18 September 2008).

Norms No. 10 of 16 September 2008 amend NBR Norms 6/2008 amending and supplementing General Norms No. 7/1994 issued by the NBR on the trade in cheques carried out by banks and other credit institutions according to Law No. 59/1934 on the cheque, as amended by Government Ordinance No. 11/1993, as approved and amended by Law No. 83/1994 (*Monitorul Oficial al României* No. 660/19 September 2008).

Norms No. 11 of 16 September 2008 amend NBR Norms 7/2008 amending and supplementing General Norms No. 6/1994 issued by the NBR on the trade in bills of exchange and promissory notes carried out by banks and other credit institutions according to Law No. 58/1934 on the bill of exchange and the promissory note, as amended by Government Ordinance No. 11/1993, as approved and amended by Law No. 83/1994 (*Monitorul Oficial al României* No. 660/19 September 2008).

Regulation No. 12 of 16 September 2008 supplements Regulation No. 10/1994 issued by the National Bank of Romania on multilateral netting of paper-based cashless interbank payments (*Monitorul Oficial al României* No. 661/22 September 2008).

Circular No. 29 of 24 September 2008 on the minting and putting into circulation of a numismatic set with the year of issue 2008 (*Monitorul Oficial al României* No. 671/29 September 2008).

Regulation No. 13 of 29 September 2008 amends NBR Regulation No. 1/2001 on organisation and operation of the Payment Incidents Register with the National Bank of Romania (*Monitorul Oficial al României* No. 692/10 October 2008).

*) According to NBR Regulation No.5/2002 as subsequently amended; exposure to a single debtor after deducting the collateral adjusted by the coefficients set forth in the NBR regulations.

10.2. KEY PRUDENTIAL INDICATORS

(percent)

Period	Solvency ratio ^{1,2} (>8%)	Tier-1 equity ratio (Tier-1 equity/ Total assets) ²	General risk ratio	Deposits with and loans to other banks (gross value)/ Total assets (gross value)	Loans granted to clients (gross value)/ Total assets (gross value)	Overdue and doubtful loans (net value)/ Total credit portfolio (net value)
2005	21.07	9.18	47.61	29.50	46.60	0.26
2006	18.12	8.63	53.01	35.97	53.17	0.20
2007	13.78	7.32	56.94	29.98	59.09	0.22
2007 Sep.	14.03	7.91	58.17	27.78	60.59	0.29
Oct.	x	7.67	x	27.54	60.90	0.24
Nov.	x	7.21	x	28.45	60.82	0.26
Dec.	13.78	7.32	56.94	29.98	59.09	0.22
2008 Jan.	x	7.11	x	29.27	60.34	0.23
Feb.	x	7.14	x	28.76	60.88	0.22
Mar.	12.99	7.07	51.14	27.54	62.06	0.21
Apr.	x	6.93	x	27.29	62.40	0.26
May	x	7.05	x	26.50	63.14	0.27
Jun.	12.78	6.96	52.49	26.09	63.47	0.30
Jul.	x	7.08	x	25.65	63.69	0.25
Aug.	x	6.82	x	25.31	63.62	0.25
Sep.	x	...	x

Period	Total past-due and doubtful claims (net value)/ Total assets (net value)	Total past-due and doubtful claims (net value)/ Tier-1 equity (according to prudential reports on own funds) ²	Total past-due and doubtful claims (net value)/ Bank liabilities	Credit risk ratio (unadjusted exposure from loans and interests falling under "Doubtful" and "Loss"/ Total classified loans and interests, excluding off-balance-sheet items) ³	Liquidity ratio (Effective liquidity/ Required liquidity) ⁴
2005	0.15	1.36	0.18	2.61	2.59
2006	0.14	1.54	0.16	2.81	2.31
2007	0.17	2.28	0.19	4.00	2.13
2007 Sep.	0.24	2.91	0.27	3.92	2.31
Oct.	0.20	2.50	0.22	3.92	2.30
Nov.	0.20	2.73	0.23	3.83	2.26
Dec.	0.17	2.28	0.19	4.00	2.13
2008 Jan.	0.19	x	0.21	4.21	2.23
Feb.	0.18	x	0.20	4.32	2.26
Mar.	0.19	x	0.21	4.42	2.29
Apr.	0.22	x	0.24	4.52	2.23
May	0.23	x	0.26	4.61	2.16
Jun.	0.25	x	0.27	4.71	2.30
Jul.	0.22	x	0.24	4.85	2.45
Aug.	0.23	x	0.25	4.93	2.46
Sep.

1) Starting 1 January 2007, the solvency ratio is at least 8%;

2) According to NBR Regulation No.13/2006 and NBR Order No.12/2007;

3) According to NBR Regulation No.5/2002 as subsequently amended;

4) The indicator was introduced in July 2001 (according to NBR Norms No. 1/2001); the minimum accepted level is 1; in June 2003, the calculation method was altered, according to NBR Norms No.7/2003.

10.3. CREDIT RISK INFORMATION

Period	Debts - overall risk (RON mill.)	Past-due debts (RON mill.)	Number of debtors (legal and natural entities)	Number of defaulters (legal and natural entities)	Number of CIB database queries about own and prospective debtors	Number of CIB database authorised queries on prospective debtors with their consent	Number of debtors reported by two or several credit institutions (legal and natural entities)	Number of loans granted and commitments assumed by credit insti- tutions

*) The flow between budgets was left out of account.

Methodological Notes

1. Main macroeconomic indicators

Monthly data on the main social and economic indicators (data released by the National Institute of Statistics in the Monthly Statistical Bulletin) are preliminary and may be revised subsequently; the final update is made on a yearly basis, based on company surveys and on specific yearly surveys conducted by the National Institute of Statistics.

The industrial production index is a volume index that measures the output of industrial sectors. Starting with 2004, the base year for computing the industrial production index has been 2000. The industrial turnover includes all the revenues recorded by companies, from both their main and secondary activities. Indices for turnover are volume indices; they are preliminary and subject to revision based on retroactive rectifications made by companies of a sample group.

Starting with January 2008, the sample underlying the survey used for measuring wages and the number of employees has been subject to alteration. The nominal net wage is calculated by subtracting from the nominal gross wage the wage tax, the employees' contributions to the health social insurance fund, the individual contribution to the state social security fund and the employees' contributions to the unemployment fund. The quarterly labour cost index is a short-term indicator which enables the assessment of the trends in employee-related hourly labour costs incurred by employers. The methodology and data series are established according to the provisions of Regulation No. 450/2003 of the European Parliament and of the Council concerning the labour cost index.

CORE1 is the underlying inflation measure used by the NBR reflecting changes in market prices; CORE1 is calculated based on the consumer price index excluding administered prices.

CORE2 is the underlying inflation measure used by the NBR reflecting changes in market prices and in prices with relatively low volatility; CORE2 is calculated based on the consumer price index excluding administered prices and high-volatility prices (vegetables, fruit, eggs, fuels).

Data series are updated on a regular basis, after being released by the National Institute of Statistics.

2. Prices in economy

2.1. Consumer prices by main goods and services

Starting with January 2008, fixed-base monthly consumer price indices are calculated on the basis of 2006 average prices and weights based on average expenses in Household Survey.

2.2. Industrial producer prices – total, domestic and foreign markets

The industrial producer price index measures the overall change in prices for industrial goods/services that were manufactured and delivered by domestic producers at the first stage of trade, in a certain time period as compared with the reference period. This indicator covers the products manufactured and traded (imports and/or exports) by the companies the main activities of which are included in NACE Rev.1.

3. Monetary policy indicators

3.1. Open-market operations performed by the National Bank of Romania

The monthly reference rate, laid down by Circular No. 3/1 February 2002, is calculated as an arithmetic mean (weighted by the volume of transactions) between interest rates on deposits taken by the NBR and on reverse repos in the month prior to that when the release was made. The annual average reference rate of the NBR is calculated as an arithmetic mean (weighted by the volume of transactions) between monthly reference rates of the NBR.

Open market operations performed by the NBR and lending and deposit facilities granted to credit institutions are stipulated in NBR Regulation No. 1/30 March 2000. Open market operations performed by the NBR (deposit-taking operations and issues of certificates of deposit) show daily averages for both transactions performed in the reference period (flow data) and their balance (stock data). The average interest rate in the reporting month is calculated as an arithmetic mean weighted by the volume of transactions for interest rates on flow/stock operations.

3.2. Standing facilities granted by the National Bank of Romania to credit institutions

Standing facilities (lending and deposit facilities) granted by the National Bank of Romania to credit institutions are resorted to by credit institutions, at their initiative.

The interest rate on marginal lending facility is the rate at which banks are granted overnight liquidity. The interest rate on marginal deposit facility is the rate at which banks may place with the NBR their liquidity surplus at the end of the business day. Starting with 7 May 2008, the interest rates on the NBR standing facilities are set up within a symmetrical corridor of ± 4 percentage points around the monetary policy rate.

3.3. Required reserves

NBR Regulation No. 6/24 July 2002, as subsequently amended, establishes the regime of minimum required reserves. According to the provisions of the said regulation, banks/central houses of credit cooperatives shall hold funds in RON and foreign currency in accounts opened with the NBR during the maintenance period (from the 24th of the current month to the 23rd of the following month). Required reserve ratio applies during the observance period (from the 24th of the previous month to the 23rd of the current month) to the average level of balance sheet liabilities of banks and to the aggregate balance sheet liabilities of credit co-operative networks. Remuneration of required reserves represents the interest rate equal to at least the average interest rate applied by banks on demand deposits and is applicable to actual reserves.

4. Reserve money

Data refer to monetary financial institutions starting January 2007 and to credit institutions in the previous periods.

5. Monetary balance sheets of monetary financial institutions

According to ESA95 methodology (the European System of Accounts), monetary financial institutions include the following institutional sectors: central bank (S121) – the National Bank of Romania and other monetary financial institutions (S122) – financial corporations and quasi-corporations, which are principally engaged in financial intermediation and whose business is to receive deposits and/or close substitutes for deposits from institutional units other than monetary financial institutions, and, for their own account, to grant loans and/or to make investments in securities. This category comprises credit institutions and money market funds.

The aggregate monetary balance sheet of other monetary financial institutions includes the assets and liabilities of credit institutions (banks, Romanian legal persons; branches of foreign credit institutions; credit co-operative organisations), as well as those of money market funds which invested at least 85 percent of their assets in financial instruments such as money market instruments, shares/units of other money market funds, other transferable debt securities with residual maturity of up to one year, as well as bank deposits, aiming at a profit rate close to the interest rates on money market instruments.

The net consolidated balance sheet of monetary financial institutions shows the aggregation of the National Bank of Romania's monetary balance sheet with that of other monetary financial institutions (credit institutions and money market funds), in which the relations within and between the two institutional sectors (S121 and S122) were considered on a net basis.

6. Broad money M3 and its counterpart

Monetary aggregates have been defined in compliance with ECB methodology.

Narrow money (M1) comprises currency in circulation (banknotes and coins) plus overnight deposits (deposits immediately convertible into cash or used for making payments via bank transfer).

Intermediate money (M2) comprises M1 plus deposits with an agreed maturity of up to and including two years and deposits redeemable at a period of notice of up to and including three months. The definition of M2 mirrors the interest in analysing and monitoring a monetary aggregate which, apart from cash, includes highly liquid deposits as well.

Broad money (M3) comprises M2 plus marketable instruments issued by monetary and financial institutions; money market instruments, in particular money market fund shares and units and borrowings from repurchase agreements, are included in this monetary aggregate (their highly-liquid nature makes these instruments be substitutes for deposits).

7. Breakdown of deposits taken and loans extended by institutional sector

The breakdown of financial instruments by institutional sector has been carried out based on the ESA 1995 methodology, as described in detail in NBR Norms No. 13/2006, namely: non-financial corporations; financial corporations (central bank, other monetary financial institutions, other financial intermediaries, financial auxiliaries, insurance corporations and pension funds); general government (central government, local government and social security funds); households; non-profit institutions serving households; non-residents.

7.2. Deposits from non-government clients

All deposits, regardless of maturity, are included.

9. Average interest rates applied by credit institutions

Starting with January 2007, average interest rates applied to deposits and loans and average interest rates on new business are calculated based on the provisions of NBR Norms No. 14/2006 concerning the statistics of interest rates applied by credit institutions, transposing the provisions of the ECB Regulation (ECB/2001/18) concerning statistics on interest rates applied by monetary financial institutions to deposits and loans vis-à-vis households and non-financial corporations.

Average interest rates are calculated as an arithmetic mean of annualised agreed rates weighted by the outstanding amounts of loans/deposits at the end of the reported month or by the extended/taken amounts during the reported month in relation to new business.

The annualised agreed rate is the interest rate agreed between the credit institution and the customer for a deposit or loan, converted to an annual basis and quoted in percentages per annum.

According to the provisions of the above-mentioned Norms, average interest rates are determined for the institutional sectors “Non-financial corporations” and “Households” as well as for the following balance sheet items: loans (total), bank overdrafts, loans for house purchases, consumer loans, loans for other purposes (including loans for business consolidation extended to freelancers and household associations), overnight deposits, deposits redeemable at notice, deposits with agreed maturity and repos.

The time series for January 2004 through December 2006, calculated according to the provisions of NBR Norms No. 2/2003 on determining and reporting average interest rates applied in the banking system, as repealed by NBR Norms No. 14/2006, have been restated in order to ensure comparability with the data calculated based on NBR Norms No. 14/2006 as of January 2007.

10. Credit risk indicators

10.1. Loan classification

Starting 1 January 2003, the methodology of loan classification and establishment of specific risk provisions was changed by Regulation No. 5/2002, as amended by Regulations Nos. 7/2002, 8/2005, 12/2006, 4/2007 and 5/2007. Regulation No. 8/2005 specifies the financial performance of debtors – natural entities, which shall be rated from A to E, according to the criteria set by credit institutions via internal regulations (depending on income characteristics: certainty, currency denomination, amount after payment of other financial obligations, etc.).

10.3. Credit risk information

10.4. Past-due debts for more than 30 days of individuals

10.5. Loans granted and commitments assumed by credit institutions

10.6. Loans granted by credit institutions

The credit risk information encompasses identification data on a debtor – non-bank, legal or natural entity – and on the following RON- and foreign exchange-denominated operations whereby credit institutions face credit risk exposure to the respective debtor: (a) loans and (b) commitments assumed by the credit institution on behalf of the debtor.

The risk information refers to the exposure of each credit institution in the Romanian banking system to a single debtor, which may be equal to or higher than RON 20,000. Starting with August 2004, following the entry into force of Regulation No. 4/2004 on the organisation and operation of Central Credit Register (former Credit Information Bureau) with the National Bank of Romania, the former also received during August 2004 – March 2007 reports on past-due debts (consisting of the loan principal) for more than 30 days in respect of individuals whose exposure was less than RON 20,000.

Type of ownership of borrower is consistent with Order No. 1958/24.06.2008 issued by the Ministry of Economy and Finance (Types of Ownership Nomenclature); type of loans granted to non-bank, legal and natural entities (by risk) is consistent with the Chart of Accounts for Banks and the norms for its implementation (1997), as amended and supplemented subsequently; currency denomination of loans is consistent with applicable regulations worldwide; the classification meets the analysis requirements of the National Bank of Romania; activity of borrower is consistent with Order No. 337/2007, issued by the president of the National Institute of Statistics, on updating NACE; the classification meets the analysis requirements of the National Bank of Romania.

Following the amendment of Regulation No.4/2004 on the organisation and operation of the Central Credit Register with the National Bank of Romania, starting 1 May 2007, credit institutions no longer report to the Central Credit Register past-due

debts longer than 30 days in the repayment of loans by individuals with an exposure below RON 20,000. These indicators are reported by Credit Bureau, based on the data provided by the 30 banks and 10 non-bank financial institutions in the Credit Bureau System - please note that exposure limits no longer apply. In these reports, the outstanding amount recorded with Credit Bureau represents the value of the past-due debt (principal, interest and penalty interest) in relation to the concerned loan, denominated in the loan currency.

11. Money market indicators

According to Norms No. 14 of 1 November 2007 amending and supplement Norms No. 4/1995 on the functioning of the interbank money market, BUBID and BUBOR become ROBID and ROBOR, respectively.

ROBID – interest rate on operations to raise funds; ROBOR – interest rate on operations to place funds.

12. Foreign exchange market indicators

12.1. Interbank foreign exchange market

Monthly volume of transactions in the interbank forex market represents the sum of the daily highs of sales and purchases. The average annual volume of forex transactions is calculated as an arithmetic mean of monthly forex transactions.

The average monthly exchange rate (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of daily exchange rates on the forex market communicated by the National Bank of Romania. The average annual exchange rate (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of average monthly rates.

13. Capital market indicators

13.1. Bucharest Stock Exchange – Regulated market

The BET (Bucharest Exchange Trading) index is the BSE's first official index launched on 19 September 1997. It represents the BSE's reference index, whose methodology allows the establishment of underlying assets for derivatives (futures, options, etc.) and structured products (warrants, certificates, etc.). The index is calculated as a weighted average (with free float capitalisation) of the prices of securities that make up the index basket. The BET index basket comprises the shares of the ten most liquid companies listed on the BSE regulated market, under Tiers I and II.

The Composite Index of Bucharest Stock Exchange (BET-C) was launched on 16 April 1998 and represents the overall performance of all companies listed on the BSE regulated market, under Tiers I and II. The calculation method is the same as that used for the BET index, the representation factor being the only weighting factor. In case of a major operational adjustment of the index as a result of listing and/or delisting a company on/from the BSE, the representation factors shall be revised without delay.

Financial investment companies are not included in the basket of BET and BET-C indices. In order to avoid a small number of companies to weigh on the index, the share of any company in the index basket must not be higher than 20 percent.

BET-FI Index is the first sector index developed by the BSE and was originally computed for the five Financial Investment Companies listed and is envisaged to include all financial investment companies to be listed subsequently. The index was launched on 31 October 2000; the calculation method is the same as that used for the BET-C Index.

Regular revisions and adjustments of all three indices are performed on a quarterly basis, while operational revisions and adjustments are carried out without delay, or according to applicable provisions, depending on the situation that required such an operation.

The ROTX (Romanian Traded Index) was launched on 15 March 2005 and is a real-time reflection of the movements of the most liquid blue-chips traded on the BSE. There is no fixed number of shares included in the ROTX index portfolio, as the key selection criteria are liquidity and market capitalisation. Calculated in RON, EUR and USD and disseminated in real time by Wiener Börse, the ROTX index is projected as a tradable index, which may be used as an underlying asset for derivatives and structured products.

13.2. Bucharest Stock Exchange – RASDAQ market

RASDAQ Composite Index was launched on 31 July 1998, its start value equalling 1,000 points. Every company listed on the RASDAQ market is included in the index calculation in order to capture the global trend in share prices. In terms of the calculation method, this index belongs to the set of stock market indices computed by weighting to market capitalisation. The share of a symbol in the index is no higher than 25 percent of total capitalisation of the symbols included in RASDAQ-C. RAQ-I and RAQ II indices were launched concurrently with the introduction of the two upper tiers in order to reflect the overall

development of the prices of top companies listed on RASDAQ's first and second tiers. The calculation method is the same as that used for RASDAQ-C. They were launched on 28 October 2002 and their start value equalled 1,0710.216 points.

14. Balance of payments and international investment position indicators

14.2. Romania's international investment position – key indicators

Medium- and long-term external debt (non-guaranteed debt) includes the balance of medium- and long-term deposits of foreign banks with resident banks.

14.3. Romania's international investment position

According to the international standard definition, Romania's international investment position includes a country's stock of foreign assets and liabilities at a given moment. The standard table on the international investment position comprises the stocks of foreign assets and liabilities at the beginning and at the end of the period, as well as the financial transactions, exchange rate movements, price movements on the international market, and other financial changes over the same period. Financial transactions referred to in the international investment position are included in the balance-of-payments financial account.
