SUMMARY OF MAIN ECONOMIC DEVELOPMENTS AND MONETARY POLICY IN NOVEMBER 2010

Real economy

In November, the annual growth rate of industrial output volume accelerated considerably (to 7.9 percent), due solely to developments in manufacturing (up 9.3 percent versus the same year-ago period, the highest annual change in 2010). Apart from the significant contribution of oil-processing industry¹, favourable developments were also posted by electronics manufacturing, electrical machinery, machinery and equipment, road transport means, whose annual growth rates ranged from 16.6 percent to 30 percent, mainly on the back of external demand, but also due to the faster pace of domestic sales². The prospects for manufacturing improved further, the confidence indicator calculated by DG ECFIN for December 2010-February 2011 adding another 0.9 points to -4.5 points.

Registered unemployment rate declined further to 6.9 percent, due largely to the delayed registration with the NEA of the recently dismissed employees as well as to the larger number of persons that gave up looking for a job with the help of this agency after the expiry of the unemployment benefit period, amid the persistently low number of vacancies. With regard to incomes, the annual dynamics of the nominal net wage economy-wide returned to positive territory (0.8 percent) in November, after staying in the negative territory for four months in a row. Behind this trend reversal stood both pay rises in the private sector and the slower pace of decline in public sector wages, mainly as a result of the base effect generated by the unpaid furlough in November-December 2009.

In the month under review, the decline in the activity in trade and services was significantly slower (about -1 percent), due partially to some temporary factors. On the one hand, the consumption decision was further affected by the contained disposable income and the pessimistic prospects for job security and future financial standing, the volume of retail purchases (except motor vehicles) standing 7 percent lower than in the same year-ago period. other hand, trade of motor vehicles increased in November (up 13.8 percent year on year), just before the completion of the car-scrapping programme. This development was also associated with the decision to make earlier-than-planned purchases of motor vehicles ahead of the substantial increase in car pollution tax starting with 1 January 2011. In addition, receipts from services rendered saw a faster growth pace (22.2 percent as compared with 13.5 percent in October), amid the thriving activity of hotels, restaurants and travel agencies.

According to preliminary data³, the export value continued to increase in November (up 30.9 percent versus the same year-ago period, given the fast-paced increase in external demand for raw materials (agrifoodstuffs and metals). Structural analysis shows the persistence of a robust growth rate of exports of machinery and transport equipment, the subsector holding the largest share in export value, due to the faster increase in sales of Dacia⁴ motorcars on the external markets. Furthermore, in the period under consideration, the annual growth rate of import value picked up to reach 24.9 percent, amid the rise in imports of intermediate goods for export-oriented production, as well as the reliance on imports of food items. Consequently, the fob/fob trade deficit narrowed year on year at a significantly slower pace than in the preceding months (down 3.8 percent to EUR 562 million).

In November, the annual dynamics of industrial producer prices for the domestic market accelerated further to 7.3 percent, owing largely to the uptrend in import prices of raw materials. The same as in previous months, price increases were particularly visible in the case of energy products and intermediate goods, whose annual growth rates picked up further to 8.4 percent. The annual dynamics of producer prices for capital goods remained unchanged at 4.6 percent, whereas in the case of durables, this indicator continued to rise to 1.8 percent, staying however considerably below the aggregate level. The annual growth rate of producer prices for non-durables stood further at 7.7 percent, under the impact of the persistent upward trend in producer prices in food industry⁵.

In the reviewed month, annual inflation rate went down 0.15 percentage points versus the previous month to 7.73 percent, owing to some favourable base effects manifest in the case of

⁵ Annual growth rate of 8.7 percent.

tobacco and fuel. Food items were further hit by inflationary pressures, as a joint effect of the persistent uptrend in external prices, the supply deficit on the domestic market and the increased import reliance in the period under consideration. Such factors affected particularly volatile prices, yet they had an unfavourable impact on adjusted CORE2 inflation as well. Moreover, the adjustment of heating prices (in order to cover costs and as a result of the rise in the VAT rate⁶) led to a faster annual growth rate of administered prices.

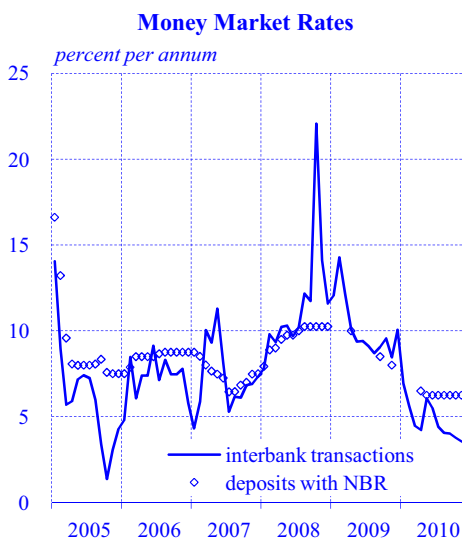

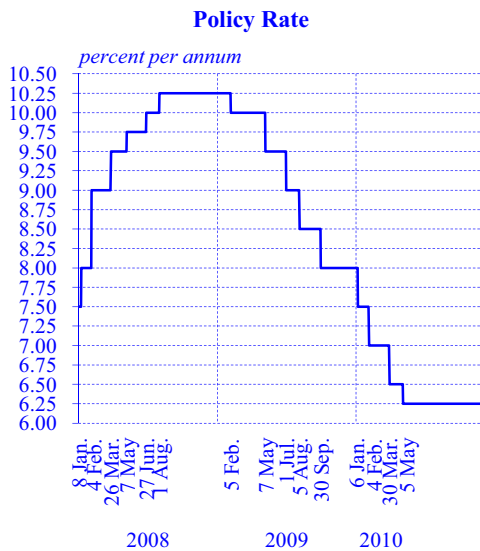

* products with volatile prices: vegetables, fruit, eggs, fuels

Source: NIS, NBR calculations.

⁶ Statistics captured the price change resulting from the rise in the VAT rate after heating started to be supplied to households.

Monetary policy

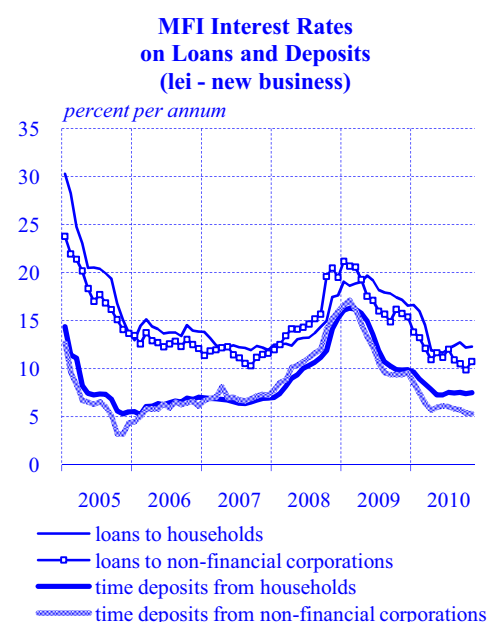

In its 2 November 2010 meeting, the National Bank of Romania Board decided to leave unchanged both the policy rate (at 6.25 percent per annum) and the existing levels of minimum reserve requirement ratios on both leu- and foreign currency-denominated liabilities of credit institutions. At the same time, the central bank kept in place the status-quo in the management of liquidity in the banking system. The decisions were aimed at firmly anchoring inflation expectations given the emergence of risks relating to second-round effects of the VAT rate hike and to sharper adjustments in administered prices. Moreover, the prudent monetary policy stance was also substantiated by the persistence of uncertainties surrounding the impact of fiscal consolidation measures given the tense political and social climate.

Deposit rates for very short maturities on the interbank money market declined relatively faster in November than in the previous months, down from about 4.5 percent close to the interest rate on the deposit facility. Once the new maintenance period began, they started rising slightly, the current levels standing however almost 3 percentage points below the policy rate. This evolution occurred against the background of a small increase in the reserve surplus under the impact of autonomous factors of liquidity. Excess liquidity was drained by the central bank largely through the recourse to the deposit facility; the central bank also conducted a fixed-rate (policy rate) deposit taking operation with maturity of one week⁷. Against this background, the average interest rate on interbank deposits fell 0.22 percentage points month on month to 3.55 percent. In turn, interbank money rates at the longer end of the yield curve (3M-12M ROBOR) entered a sharper downtrend in the final week of November, with their monthly averages decreasing by 0.1 percentage points over the entire maturity range. This adjustment was manifest in the context of lower uncertainties of credit institutions as regards the future developments in liquidity conditions, also as a result of clearer signs conveyed by the National Bank of Romania with regard to sticking, at least in the short term, to its current approach to liquidity management. The downward trend in interest rates was also fuelled by the successful launch of a foreign currency-denominated government securities issue by the Ministry of Public Finance on the domestic market.

⁷ Banks' bids amounted to a total of lei 4.6 billion and were allotted up to the pre-announced limit of lei 0.5 billion at the auction held on 16 November.

Over the period under review, the average RON/EUR exchange rate posted a slightly upward trajectory. This movement reflected the relative increase in global risk aversion amid escalating investor concerns regarding: (i) the sustainability of public finance in Ireland and the state of the country's banking system⁸, (ii) a possible spreading of the sovereign debt crisis to other peripheral euro area countries, and (iii) the armed conflict in the Korean Peninsula. Adding to this external context were the persistent uncertainties regarding the duly adoption/implementation of fiscal consolidation measures and structural reforms agreed with the EU and the IMF. Against this backdrop, the worsening of market sentiment was to some extent cushioned by the slightly lower-than-expected levels of current account deficit and consolidated general government budget.

In contrast to the previous month, most of the average lending and deposit rates on banks' new business vis-à-vis non-bank clients advanced slightly in November. Thus, the average lending rate on new business added 0.1 percentage points to 12.31 percent in the case of households and 0.89 percentage points to 10.75 percent in the case of non-financial corporations; as for the latter clients, the move was also ascribable to some changes in the composition of loans granted. In turn, the average interest rates on new term deposits of households rose by 0.1 percentage points to 7.48 percent, especially as a result of starting/keeping in place some promotional products. By contrast, the average interest rate on new deposits of non-financial corporations remained on a downward drift, shedding 0.09 percentage points from October to 5.31 percent.

⁸ The Irish government passed the decision to ask for foreign financial assistance. On 28 November 2010, euro-area finance ministers approved the borrowing, but this appeased only temporarily the tensions in external financial markets given (i) the heightening political instability in Ireland and (ii) Standard & Poor's lowering by two notches Ireland's rating and Moody's announcing a possibly similar decision.

LEGISLATIVE INDEX

Main rules and regulations adopted in the economic, financial, and banking areas in November 2010

Law No. 207 of 11 November 2010 supplements Law No. 273/2009 amending Law No. 19/2000 on the public pension scheme and other social security benefits (*Monitorul Oficial al României* No. 767/17 November 2010).

Law No. 211 of 11 November 2010 amends and supplements the Law No. 226/2009 on organisation and operation of official statistics in Romania (*Monitorul Oficial al României* No. 765/16 November 2010).

Order No. 100 of 16 November 2010 issued by the President of the National Securities Commission approves Regulation No. 27/2010 concerning the electronic oversight via reports (*Monitorul Oficial al României* No. 797/29 November 2010).

Order No. 2718 of 19 September 2010 issued by the Minister of Public Finance approves the issue prospectuses for the EUR-denominated government securities launched in November 2010 (*Monitorul Oficial al României* No. 780/22 November 2010).

Government Emergency Ordinance No. 103 of 22 November 2010 on the 2010 government budget revision (*Monitorul Oficial al României* No. 780/22 November 2010).

Government Decision No. 1193 of 24 November 2010 sets the gross minimum basic wage country-wide (*Monitorul Oficial al României* No. 824/9 December 2010).

Main regulations issued by the National Bank of Romania in November 2010

Circular No. 36 of 1 November 2010 sets at 6.25 percent per annum the reference rate of the National Bank of Romania for November 2010 (*Monitorul Oficial al României* No. 727/1 November 2010).

Order No. 1069 of 2 November 2010 lays down the erasure from the General Register of Non-bank Financial Institutions of STERLING FACTOR joint-stock company (*Monitorul Oficial al României* No. 777/19 November 2010).

Circular No. 37 of 8 November 2010 sets the interest paid on minimum reserve requirements starting with 24 October - 23 November 2010 maintenance period (*Monitorul Oficial al României* No. 777/19 November 2010).

Circular No. 38 of 12 November 2010 concerning the putting into circulation of a gold collector coin celebrating the 135th anniversary of the birth of Queen Marie (*Monitorul Oficial al României* No. 777/19 November 2010).

Circular No. 39 of 26 November 2010 concerning the putting into circulation of a silver collector coin dedicated to poet Grigore Alexandrescu (*Monitorul Oficial al României* No. 825/9 December 2010).

Order No. 1194 of 29 November 2010 lays down the erasure from the General Register of Non-bank Financial Institutions of ETRA LEASING joint-stock company (*Monitorul Oficial al României* No. 828/10 December 2010).

Order No. 24 of 29 November 2010 supplements Order No. 15/2009 issued by the National Bank of Romania on the preparation, for information purposes, of individual annual financial statements by credit institutions in compliance with International Financial Reporting Standards (*Monitorul Oficial al României* No. 834/13 December 2010).

Order No. 1191 din 29 November 2010 supplements Order No. 34/2008 by the Governor of the National Bank of Romania concerning the designation of systems governed by Law No. 253/2004 on settlement finality in payment and securities settlement systems (*Monitorul Oficial al României* No. 836/14 December 2010).

1) Starting 1 January 2007, the solvency ratio is at least 8%;

2) According to NBR Regulation No. 13/2006 and NBR Order No. 12/2007;
starting January 2008, calculations are based on average assets;

3) According to NBR Regulations No. 5/2002 and No. 3/2009, as subsequently amended;

4) The indicator was introduced in July 2001 (according to NBR Norms No. 1/2001); the minimum accepted level is 1;
starting June 2003, the calculation method was altered, according to NBR Norms No. 7/2003;
starting 2009, the calculation method was altered, according to NBR Norms No. 7/2009 amending NBR Norms No. 1/2001
on banks' liquidity and NBR Regulation No. 24/2009 on credit institutions' liquidity;5) Indicators for banks-Romanian legal entities and Creditcoop; foreign bank branches do not report Capital Adequacy, Own Funds and
Loans Classification Statement.

11.3. Credit Risk Information*

Period	Total debts - overall risk (lei mill.)	Total past-due debts (lei mill.)	Number of debtors (legal and natural entities)	Number of defaulters (legal and natural entities)	Number of CCR database queries about own and prospective debtors	Number of CCR database queries on prospective debtors with their consent	Number of loans granted and commitments assumed by credit insti- tutions	Number of debtors reported by two or several reporting (natural and legal) entities**	Number of debtors total reporting (legal and natural) entities**	Number of defaulters total reporting (legal and natural) entities**

Methodological Notes

1. Main macroeconomic indicators

Monthly data on the main social and economic indicators (data released by the National Institute of Statistics in its Monthly Statistical Bulletin) are preliminary and may be revised subsequently; the final update is made on a yearly basis, based on company surveys and on specific yearly surveys conducted by the National Institute of Statistics (NIS).

The indices underlying the key indicators of economic activity are calculated in accordance with the new version of the statistical classification of economic activities (NACE Rev. 2) and by changing the base year (2005); therefore, the data series released previously were subject to revision.

The industrial production index is a volume index that measures the output of industrial sectors. The base year is 2005.

Starting with January 2010, the sample underlying the survey used for measuring wages and the number of employees has been changed. The nominal net wage is calculated by subtracting from the nominal gross wage the wage tax, the employees' contributions to the health social insurance fund, the individual contribution to the state social security fund and the employees' contributions to the unemployment fund. The quarterly labour cost index is a short-term indicator allowing the assessment of the trends in employee-related hourly labour costs incurred by employers. The methodology and data series are established according to the provisions of Regulation No. 450/2003 of the European Parliament and of the Council concerning the labour cost indices.

Annual data for "Employment in economy" and "Monthly average wage" are average values based on the "Statistical survey on labour costs (S3)" conducted by the NIS.

Registered unemployment rate for 2010 was recalculated based on active population on 1 January, 2010.

Starting with Monthly Bulletin No. 10/2010, annual data regarding "Labour cost in economy" differ from those previously published due to the use of a new base year (2008 average).

CORE1 is the underlying inflation measure used by the NBR reflecting changes in market prices; CORE1 is calculated based on the consumer price index excluding administered prices.

CORE2 is the underlying inflation measure used by the NBR reflecting changes in market prices and in prices with relatively low volatility; CORE2 is calculated based on the consumer price index excluding administered prices and highly volatile prices (vegetables, fruit, eggs, fuels).

The harmonised index of consumer prices (HICP) complies with the Eurostat methodology.

Statistical data series for "Domestic credit" and "Monetary aggregates" regarding the 2005-2006 period are restated in order to ensure comparability.

Data series are updated on a regular basis, after being released by the NIS.

2. Prices in economy

2.1. Consumer prices by main goods and services

Starting with January 2010, fixed-base monthly consumer price indices are calculated on the basis of 2008 average prices and weights based on average expenses in the Household Survey.

2.2. Industrial producer prices – total, domestic and non-domestic markets

The industrial producer price index measures the overall change in prices for industrial goods/services that were manufactured and delivered by domestic producers at the first stage of trade, in a certain time period as compared with the reference period. This indicator covers the products manufactured and traded (imports and/or exports) by the companies the main activities of which are included in NACE Rev.2.

3. Monetary policy indicators

3.1. Open-market operations performed by the National Bank of Romania

The monthly reference rate laid down by Circular No. 3/1 February 2002 is calculated as an arithmetic mean (weighted by the volume of transactions) of interest rates on deposits taken by the NBR as well as reverse repo and repo transactions in the month prior to that when the release was made. The average annual reference rate of the NBR is calculated as an arithmetic mean (weighted by the volume of transactions) of monthly reference rates of the NBR.

Considering the NBR's gradual shift from a debtor position to a creditor position vis-à-vis the banking system during October 2008-January 2009, as well as the increase in the volume of repo transactions (liquidity injections), the NBR Board decided to tailor accordingly the calculation formula for the reference rate. Consequently, starting with February 2009, repo transactions

have been added to the other open-market operations conducted by the NBR that had been included in the calculation formula, i.e. deposit-taking operations and reverse repo operations.

Open-market operations performed by the NBR and lending and deposit facilities granted to credit institutions are stipulated in NBR Regulation No. 1/30 March 2000. Open-market operations performed by the NBR (deposit-taking operations and issues of certificates of deposit) show daily averages for both transactions performed in the reference period (flow data) and their balance (stock data). The average interest rate in the reporting month is calculated as an arithmetic mean weighted by the volume of transactions for interest rates on flow/stock operations.

3.2. Standing facilities granted by the National Bank of Romania to credit institutions

Standing facilities (lending and deposit facilities) granted by the National Bank of Romania to credit institutions are resorted to by credit institutions, at their initiative.

The interest rate on the marginal lending facility is the rate at which banks are granted overnight liquidity. The interest rate on the marginal deposit facility is the rate at which banks may place with the NBR their liquidity surplus at the end of the business day. Starting with 7 May 2008, the interest rates on the NBR standing facilities are set up within a symmetrical corridor of ± 4 percentage points around the monetary policy rate.

3.3. Required reserves

NBR Regulation No. 6/24 July 2002, as subsequently amended, establishes the regime of minimum required reserves. According to the provisions of the said regulation, banks/central houses of credit cooperatives shall hold funds in lei and foreign currency in accounts opened with the NBR during the maintenance period (from the 24th of the current month to the 23rd of the following month). Required reserve ratio applies during the observance period (from the 24th of the previous month to the 23rd of the current month) to the average level of balance sheet liabilities of banks and to the aggregate balance sheet liabilities of credit co-operative networks. Remuneration of required reserves represents the interest rate equal to at least the average interest rate applied by banks on demand deposits and is applicable to actual reserves.

4. Reserve money

Data refer to monetary financial institutions starting with January 2007 and to credit institutions in the previous periods.

5. Monetary balance sheets of monetary financial institutions

According to ESA95 methodology (the European System of Accounts), monetary financial institutions include the following institutional sectors: central bank (S121) – the National Bank of Romania and other monetary financial institutions (S122) – financial corporations and quasi-corporations, which are principally engaged in financial intermediation and whose business is to receive deposits and/or close substitutes for deposits from institutional units other than monetary financial institutions, and, for their own account, to grant loans and/or to make investments in securities. This category comprises credit institutions and money market funds.

The aggregate monetary balance sheet of other monetary financial institutions includes the assets and liabilities of credit institutions (banks, Romanian legal persons; branches of foreign credit institutions; credit co-operative organisations), as well as those of money market funds which invested at least 85 percent of their assets in financial instruments such as money market instruments, shares/units of other money market funds, other transferable debt securities with residual maturity of up to one year, as well as bank deposits, aiming at a profit rate close to the interest rates on money market instruments.

The net consolidated balance sheet of monetary financial institutions shows the aggregation of the National Bank of Romania's monetary balance sheet with that of other monetary financial institutions (credit institutions and money market funds), in which the relations within and between the two institutional sectors (S121 and S122) were considered on a net basis.

6. Broad money M3 and its counterpart

Monetary aggregates have been defined in compliance with the methodology of the European Central Bank (ECB).

Narrow money (M1) comprises currency in circulation (banknotes and coins) plus overnight deposits (deposits immediately convertible into cash or used for making payments via bank transfer).

Intermediate money (M2) comprises M1 plus deposits with an agreed maturity of up to and including two years and deposits redeemable at a period of notice of up to and including three months. The definition of M2 mirrors the interest in analysing and monitoring a monetary aggregate which, apart from cash, includes highly liquid deposits as well.

Broad money (M3) comprises M2 plus marketable instruments issued by the monetary and financial institutions; money market instruments, in particular money market fund shares/units and borrowings from repurchase agreements, are included in this monetary aggregate (their highly-liquid nature makes these instruments be close substitutes for deposits).

7. Breakdown of monetary financial institutions' deposits and loans by institutional sector

The breakdown of financial instruments by institutional sector has been carried out based on the ESA95 methodology, as described in detail in NBR Norms No. 13/2006, namely: non-financial corporations; financial corporations (central bank, other monetary and financial institutions, other financial intermediaries, financial auxiliaries, insurance corporations and pension funds); general government (central government, local government and social security funds); households; non-profit institutions serving households; non-residents.

Starting June 2010, Norms No. 10/2009 issued by the NBR came into force. They replaced Norms No. 13/2006 on the statistical reporting of data for preparing the monetary balance sheet.

7.1. Deposits from non-government resident clients

All deposits, regardless of maturity, are included.

8. Assets and liabilities of investment funds

Starting December 2008, Regulation (EC) 958/2007 of the European Central Bank of 27 July 2007 concerning statistics on the assets and liabilities of investment funds (ECB/2007/8), hereinafter referred to as the 'Regulation', came into effect. It was transposed by the National Bank of Romania via the Methodology for reporting statistical data under the Regulation, hereinafter referred to as the 'Methodology'. Based on this Regulation, investment undertakings and/or self-managed investment companies have sent monthly reports including statistics on the assets and liabilities of investment funds (IFs) under their management.

Investment funds are defined in Article 1 of Regulation ECB/2007/8 as collective investment undertakings that invest in financial and non-financial assets to the extent to which their objective is to invest capital raised from the public.

Pension funds and money market funds are not included. The latter are defined consistent with Regulation (EC) 25/2009 of the European Central Bank of 19 December 2008 concerning the consolidated balance sheet of the monetary financial institutions sector (recast) transposed by the National Bank of Romania via Norms No. 10/2009 on the statistical reporting of data for preparing the monetary balance sheet.

According to the said Norms, money market funds shall send monthly reports containing statistics on their assets and liabilities to the National Bank of Romania. The money market funds are listed, for statistical purposes, on the NBR's website (www.bnr.ro).

The types of instruments representing assets and liabilities of investment funds as well as the classification of its counterpart by institutional sector are fully harmonised with the ESA95 methodology.

10. Average interest rates applied by credit institutions

Starting with January 2007, average interest rates on deposits and loans and average interest rates on new business are calculated based on the provisions of NBR Norms No. 14/2006 concerning the statistics of interest rates applied by credit institutions, transposing the provisions of Regulation ECB/2001/18 concerning statistics on interest rates applied by monetary financial institutions to deposits and loans vis-à-vis households and non-financial corporations.

Average interest rates are calculated as an arithmetic mean of annualised agreed rates weighted by the outstanding amounts of loans/deposits at the end of the reported month or by the extended/taken amounts during the reported month in relation to new business.

The annualised agreed rate is the interest rate agreed between the credit institution and the customer for a deposit or loan, converted to an annual basis and quoted in percentages per annum.

Pursuant to the Norms, average interest rates are determined for the following institutional sectors: Non-financial Corporations and Households, as well as for the following balance-sheet items: loans (total), overdrafts, revolving credit, claims related to (extended and opportunity) credit cards, lending for house purchase, consumer credit, other lending (including also business development loans granted to free lancers and family associations), overnight deposits, deposits redeemable at notice, term deposits and repo agreements.

The time series for January 2004 through December 2006, calculated according to the provisions of NBR Norms No. 2/2003 on determining and reporting average interest rates applied in the banking system, as repealed by NBR Norms No. 14/2006, have been restated in order to ensure comparability with the data calculated based on NBR Norms No. 14/2006 from January 2007 through May 2010.

Starting June 2010, in order to implement the amendments to Regulation ECB/2001/18 incorporated in Regulation ECB/2009/7, Norms No. 14/2006 issued by the NBR were replaced by Norms No. 11/2009 issued by the NBR with a view to implementing Regulation (EC) No. 63/2002 concerning statistics on interest rates applied by monetary financial institutions to deposits and loans vis-à-vis households and non-financial corporations (ECB/2001/18).

11. Credit risk indicators

11.1. Loan classification of banks (Romanian legal entities)

During 1 January 2003 – 31 March 2009, the classification methodology for loans and specific risk provisions was established by NBR Regulation No. 5/2002, as subsequently amended (NBR Regulations Nos. 7/2002, 8/2005, 12/2006, 4/2007, 5/2007 and 4/2008). With the coming into force of NBR Regulation No. 3/2009 on the classification of loans and provisions, as well as the establishment, regularisation and use of specific risk provisions (amended by Regulations Nos. 7 and 13/2009) and NBR Order No. 5/2009 on the reporting statements on classification of exposures from loans/deposits and the related loan loss reserve requirements, credit institutions have begun implementing the provisions of the new regulation starting with the month when the Supervision Department of the NBR notified them of the decision on validating their in-house norms or with the month following that when their norms were validated, but no later than 30 September 2009. Over the transition period, both regulations were in force and the former framework was replaced by credit institutions depending on the time of validation by the NBR of their in-house norms.

According to NBR Regulation No. 3/2009, credit institutions may reflect gross exposure in the form of loss in two categories, as follows:

- category 1, i.e. exposure from loans classified under “loss” for which debt service is of at most 90 days and for which legal proceedings were opened against the operation/debtor; and
- category 2, i.e. exposure from loans classified under “loss” for which debt service is higher than 90 days and/or for which legal proceedings were opened against the operation/debtor.

11.3. Credit risk information

11.4. Loans granted and commitments assumed by credit institutions

11.5. Loans granted by credit institutions

11.6. Past-due debts for more than 30 days incurred by individuals

11.7. Loans granted and commitments assumed by NFIs included in the Special Register

11.8. Loans granted by non-bank financial institutions included in the Special Register

The credit risk information encompasses identification data on a debtor – non-bank, legal or natural entity – and on the following lei- and foreign exchange-denominated operations whereby credit institutions face credit risk exposure to the respective debtor: (a) loans and (b) commitments assumed by the credit institution on behalf of the debtor.

The risk information refers to the exposure of each credit institution in the Romanian banking system to a single debtor, which may be equal to or higher than lei 20,000. Starting with August 2004, following the entry into force of Regulation No. 4/2004 on the organisation and operation of Central Credit Register with the National Bank of Romania, the former also received during August 2004 – March 2007 reports on past-due debts (consisting of the loan principal alone) for more than 30 days in respect of individuals whose exposure was less than lei 20,000.

Type of ownership of borrower is consistent with Order No. 1879/22 June 2010 issued by the Ministry of Public Finance (Types of Ownership Nomenclature); type of loan granted to non-bank, legal and natural entities (by risk) is consistent with the Chart of Accounts applicable to credit institutions, non-bank financial institutions and the Deposit Guarantee Fund in the Banking System (2008); currency denomination of loans is consistent with applicable regulations worldwide; the classification meets the analysis requirements of the National Bank of Romania; activity of borrower is consistent with Order No. 337/2007, issued by the President of the National Institute of Statistics, on updating NACE; the classification meets the analysis requirements of the National Bank of Romania.

Following the amendment of Regulation No. 4/2004 on the organisation and operation of the Central Credit Register with the National Bank of Romania, starting 1 May 2007, credit institutions no longer report to the Central Credit Register past-due debts longer than 30 days in the repayment of loans by individuals with an exposure below lei 20,000. These indicators are reported by the Credit Bureau, based on the data provided by the 34 banks and, starting August 2010, 15 non-bank financial institutions in the Credit Bureau System – please note that exposure limits no longer apply. In these reports, the outstanding amount recorded with Credit Bureau represents the value of the past-due debt (principal, interest and penalty interest) in relation to the concerned loan, denominated in the loan currency.

12. Money market indicators

According to Norms No. 14 of 1 November 2007 amending and supplementing Norms No. 4/1995 on the functioning of the interbank money market, BUBID and BUBOR become ROBID and ROBOR, respectively.

ROBID – interest rate on operations to raise funds; ROBOR – interest rate on operations to place funds.

13. Foreign exchange market indicators

13.1. Interbank foreign exchange market

Monthly volume of transactions in the interbank forex market represents the sum of the daily highs of sales and purchases. The average annual volume of forex transactions is calculated as an arithmetic mean of monthly forex transactions.

The average monthly exchange rate (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of daily exchange rates on the forex market communicated by the National Bank of Romania. The average annual exchange rate (RON/EUR and RON/USD) is calculated as a simple arithmetic mean of average monthly rates.

14. Capital market indicators

14.1. Bucharest Stock Exchange – Regulated market

The BET (Bucharest Exchange Trading) index is the BSE's first official index launched on 19 September 1997. It represents the BSE's reference index, whose methodology allows the establishment of underlying assets for derivatives (futures, options, etc.) and structured products (warrants, certificates, etc.). The index is calculated as a weighted average (with free float capitalisation) of the prices of securities that make up the index basket. The BET index basket comprises the shares of the ten most liquid companies listed on the BSE regulated market, under Tiers I and II.

The Composite Index of Bucharest Stock Exchange (BET-C) was launched on 16 April 1998 and represents the overall performance of all companies listed on the BSE regulated market, under Tiers I and II. The calculation method is the same as that used for the BET index, the representation factor being the only weighting factor. In case of a major operational adjustment of the index as a result of listing and/or delisting a company on/from the BSE, the weighting factors are revised without delay.

Financial investment companies are not included in the basket of BET and BET-C indices. In order to avoid a small number of companies to weigh on the index, the share of any company in the index basket must be no higher than 20 percent.

BET-FI Index is the first sector index developed by the BSE and was originally computed for the five Financial Investment Companies listed and is envisaged to include all financial investment companies to be listed subsequently. The index was launched on 31 October 2000; the calculation method is the same as that used for the BET-C Index.

Regular revisions and adjustments of all three indices are performed on a quarterly basis, while operational revisions and adjustments are carried out without delay, or according to applicable provisions, depending on the situation that required such an operation.

The ROTX (Romanian Traded Index) was launched on 15 March 2005 and is a real-time reflection of the movements of the most liquid blue-chips traded on the BSE. There is no fixed number of shares included in the ROTX index portfolio, as the key selection criteria are liquidity and market capitalisation. Calculated in RON, EUR and USD and disseminated in real time by *Wiener Börse*, the ROTX index is projected as a tradable index, which may be used as an underlying asset for derivatives and structured products.

14.2. Bucharest Stock Exchange – RASDAQ market

RASDAQ Composite Index was launched on 31 July 1998, its start value equalling 1,000 points. Every company listed on the RASDAQ market is included in the index calculation in order to capture the across-the-board trend in share prices. In terms of the calculation method, this index belongs to the set of stock market indices computed by weighting to market capitalisation. The share of a symbol in the index is no higher than 25 percent of total capitalisation of the symbols included in RASDAQ-C. RAQ-I and RAQ II indices were launched concurrently with the introduction of the two upper tiers in order to reflect the overall developments in prices of top companies listed on RASDAQ's first and second tiers. The calculation method is the same as that used for RASDAQ-C. They were launched on 28 October 2002 and their start value equalled 1,079.216 points.

15. Balance of payments and international investment position indicators

15.2. Romania's international investment position – key indicators

Medium- and long-term external debt (non-guaranteed debt) includes the balance of medium- and long-term deposits of foreign banks with resident banks.

15.3. Romania's international investment position

According to the international standard definition, Romania's international investment position includes a country's stock of foreign assets and liabilities at a given moment. The standard table on the international investment position comprises the stocks of foreign assets and liabilities at the beginning and at the end of the period, as well as the financial transactions, exchange rate movements, price movements on the international market, and other financial changes over the same period. Financial transactions referred to in the international investment position are included in the balance-of-payments financial account.
